

The background of the cover is a textured, sepia-toned illustration. It depicts a landscape with prominent, jagged cracks or fault lines running across it. In the lower-left foreground, there is a bridge with multiple arches, possibly a railway bridge, crossing a deep, shadowed ravine. The overall style is reminiscent of a geological cross-section or a weathered map.

Fault Lines In Chinas Economic Terrain:

Fault Lines in China's Economic Terrain, 2003 The focus of this research is the potential adversities or fault lines the terms are used synonymously facing China's economy and affecting its prospects for sustaining high growth through the coming decade Thus we deliberately concentrate on what might go seriously awry in the economy and in the process slow or even reverse China's double digit growth rates in the 1980s and high single digit growth in the 1990s and the early part of the 21st century This book is the product of a project jointly sponsored by the Office of Net Assessment in the Department of Defense and the Smith Richardson Foundation Their sponsorship was based on a mutual understanding that their joint support would enable the work to be expanded beyond what would have been possible if funding were confined to one sponsor alone The project was implemented through RAND's National Defense Research Institute NDRI a federally funded research and development center sponsored by the Office of the Secretary of Defense the Joint Staff the unified commands and the defense agencies The book should be of interest and use to those in the policy community and the academic community concerned with China and with the economic and security environment in the Asia Pacific region **Fault Lines**

in China's Economic Terrain Charles Jr. Wolf, K. C. Yeh, Benjamin Zycher, Nicholas Eberstadt, Sungho Lee, 2003-06-24 The authors consider how and by how much China's stellar economic performance might be impaired by eight potential adversities that China may face in the next decade unemployment poverty and social unrest corruption HIV AIDS and epidemic diseases water resource problems and pollution energy consumption and prices the fragile financial system and state owned enterprises curtailed foreign direct investment and serious military conflicts **Fault Lines In China's**

Economic Terrain Tora K. Bikson, Sally Ann Law, Bridger M. Mitchell, 2003 What are the major challenges fault lines and potential adversities these terms are used synonymously that China's economic development will encounter over the next decade How severely will China's overall economic performance be affected if these adversities occur separately or in clusters This book addresses these key questions China has confronted in the past two decades five of the eight fault lines that the authors consider unemployment corruption water resources HIV AIDS and financial fragility and nonetheless it has sustained high rates of economic growth Therefore in assessing the potential effects of these fault lines on China's future economic performance the authors focus on whether why and by how much their intensities may increase that is on changes rather than on the prevailing levels of each fault line For the other three fault lines examined which have not previously occurred or recurred oil price shocks foreign direct investment shrinkage and serious military conflicts the authors consider the circumstances under which they might arise and their resulting economic effects China's Great Economic

Transformation Loren Brandt, Thomas G. Rawski, 2008-04-14 This landmark study provides an integrated analysis of China's unexpected economic boom of the past three decades The authors combine deep China expertise with broad disciplinary knowledge to explain China's remarkable combination of high speed growth and deeply flawed institutions Their work

exposes the mechanisms underpinning the origin and expansion of China's great boom. Penetrating studies track the rise of Chinese capabilities in manufacturing and in research and development. The editors probe both achievements and weaknesses across many sectors including China's fiscal, legal and financial institutions. The book shows how an intricate minuet combining China's political system with sectorial development, globalization, resource transfers across geographic and economic space and partial system reform delivered an astonishing and unprecedented growth spurt.

Revenge of the Forbidden City James W. Tong, 2009-10-14 By 1999 the Falungong religious movement had spread widely and broadly throughout China. While on the surface its ideology of spiritual and physical cultivation did not seem threatening, the Chinese government felt otherwise. *Revenge of the Forbidden City* is the definitive account of China's response to Falungong. As James Tong shows, the episode tells us a great deal about the Chinese state's political institutions, its media apparatus and its formidable ability to crush dissent. The result is a book that will be essential for any scholar interested in how the Chinese state actually operates.

China and the Global Political Economy S. Breslin, 2016-04-30 This IPE Classic considers one of the most pressing issues of the Twenty First century: the relationship between domestic configurations of power and globalized production processes in shaping the process and implications of China's re-engagement with the global economy.

The Three Faces of Chinese Power David M. Lampton, 2008-04-30 By learning more not only about China but from China, America is more likely to sustain a constructive relationship with the rising China. Lampton insightfully provides us with the much needed guidance. Zbigniew Brzezinski Center for Strategic and International Studies. Professor Lampton's stimulating and well researched book provides a comprehensive framework for intelligent thinking about the implications for the United States and the world of the rapid expansion of China's economic and military power. Serious students of world affairs and non-specialists concerned about the outlook for U.S.-China relations will all benefit from the historically based insights and judgments that fill the pages of this thought provoking volume. J. Stapleton Roy, former United States ambassador to China.

China in 2020 Angang Hu, 2012-11-26 Explains how China as the world's largest emerging market will impact global economic growth, FDI flows, energy consumption, climate change and other arenas with a proposed strategic framework that would guide the country's rise while maximizing positive impacts and minimizing any negative externalities. Competition Laws, Globalization and Legal Pluralism Qianlan Wu, 2014-07-18 Building upon a theoretical framework and empirical research, this book provides a thought provoking analysis of the interests, strategies and challenges that China has faced in developing its Anti Monopoly Law (AML) in the context of economic globalization. The book comprises three main parts. Part I reviews the directions of convergence of global competition law. Part II provides a contextual analysis of China's market governance and its strategic interests, and Part III examines the latest enforcement of the Anti Monopoly Law by focusing on the interactions between global actors and China, the relationships between Chinese competition and sectoral regulators and the enforcement of global competition law norms in the Chinese context. This book is

one of the first to provide a critical understanding of China's experience as a new competition regulator set against the background of the plural sources of global competition laws

The Rise of China Gary Schmitt, 2009-05-26 Although the United States is rightly preoccupied with the threat of Islamist terrorism and the two conflicts in Iraq and Afghanistan there is a wide consensus among American strategic thinkers that America's greatest challenge over the next decades will be the rise of China. With its expanding economy and formidable military growth China is positioning itself to challenge the United States as the greatest international power on the world stage. *The Rise of China* is a collection of essays about the nature of that threat and what the U.S. and its allies might do in the areas of foreign and defense affairs to meet it. Contributing authors: Michael R. Auslin, Dan Blumenthal, Ellen Bork, Nicholas Eberstadt, Robert Kagan, Gary J. Schmitt and Ashley J. Tellis. The book contemplates how these two rising ambitious powers are contesting for leadership in East Asia and asks if the sanguine forecasts for a peaceful century will hold true. Although the Chinese have been very careful to look like a cautious power and in key respects have been they see the international scene as fundamentally one of antagonism. And this is unlikely to change until and unless the regime changes. It is this China the authors of *The Rise of China* assert that we will be dealing with for some time to come.

The New Chinese Leadership Yun-han Chu, Zhicheng Luo, Ramon H. Myers, 2004-03-18 This volume presents a concise history of how China's Communist Party (CCP) selected a new generation of leaders in late 2002 and why the individuals in their late 40s and 50s were so well qualified to govern China. These leaders are trying to lead China to become a regional and world power in which their people can enjoy a modest living standard and take pride in the nation's achievements. Addressed to the expert or ordinary reader these essays see China's leaders as challenged by a new trend visible only in the last decade of a widening gap between the losers in society and the winners of the recent economic and political reforms. The leaders of the largest single ruling party and state authority in the world must somehow reverse that trend if China is to survive as one nation. This volume explains they are doing that by reconfiguring their huge command economy promoting a market economy and undertaking gradual political reforms. It is unflinching in its discussion of how China's leaders face mounting political corruption, spreading unemployment, growing disparity of wealth and income and a crisis of belief.

internationalization on developed markets will be are the foci of this book

The Culture of Leadership in Contemporary China Paul Michael Linehan, 2017-12-06 The resurgence of Confucianism Daoism and Buddhism in the context of Chinese leadership values has emerged as a foundation for a new generation of leaders The once in a decade transition of China's leadership witnessed the ascendancy of a consensus oriented fifth generation of leaders supporting a central authoritative figure whose priority will likely include the reconciliation of a waning communist ideology juxtaposed with its ostensible embrace of capitalism How will Chinese Communist Party authority ideology and control address the encroachment of Western values that are centered on Roman law Greek philosophy and Christian religion which prioritizes individual freedom and democracy This book examines the role of traditional Chinese values ideology and philosophy as a key determinant in modern China's leadership succession The author asserts that as communist ideology wanes Chinese leaders will turn to their own traditional values found in Confucianism Daoism and Buddhism to establish legitimacy to rule as they seek to promote Chinese prominence and greatness in the world The author's research assesses China's promotion of its own traditional values in rejecting foreign value influence Since the inception of modern China at the beginning of the 20th century China's leadership transition has evolved from an authoritarian cult like dictatorship to a consensus oriented process In researching this metamorphosis this book offers social political cultural and historical perspectives to demonstrate that Chinese human values and character factors have risen in prominence as key elements in the mandate of Chinese governance and leadership The author concludes that Chinese leadership values and its study and diffusion across sectors of Chinese leadership including business organizations and government have become a means to accentuate Chinese values as a viable alternative to Western claims of absolute and universally accepted values

The Economic and Strategic Rise of China and India D. Denoon,2007-09-03

This book demonstrates the connection between economic and strategic developments in Asia with several interrelated arguments The author asserts that there is no single explanation for the 1997 financial crisis in the Pacific Rim states nor for the slow recovery afterwards The author also points out that China is not the only major power rising in Asia India is close behind and warns that while many observers are proceeding as if current U S treaties will continue indefinitely Asia is already preparing for changing patrons

A Contest for Supremacy: China, America, and the Struggle for Mastery in Asia Aaron L. Friedberg,2011-08-15 Sober and well informed A careful and compelling examination of the U S Chinese relationship from a number of angles Financial Times There may be no denying China s growing economic strength but its impact on the global balance of power remains hotly contested Political scientist Aaron L Friedberg argues that our nation s leaders are failing to act expeditiously enough to counter China s growing strength He explains how the United States and China define their goals and reveals the strategies each is now employing to achieve its ends Friedberg demonstrates in this provocative book that the ultimate aim of Chinese policymakers is to win without fighting displacing the United States as the leading power in Asia while avoiding direct confrontation The United States on the other hand sends misleading signals about our commitments and resolve putting us at risk for a war that might otherwise have been avoided A much needed wake up call to U S leaders and policymakers A Contest for Supremacy is a compelling interpretation of a rivalry that will go far to determine the shape of the twenty first century
