**Faut-il brûler Dumézil?** Didier Eribon, 1992      *Michel Serres and French Philosophy of Science* Massimiliano Simons, 2022-03-24 Massimiliano Simons provides the first systematic study of Serres's work in the context of 20th century French philosophy of science. By proposing new readings of Serres's philosophy, Simons creates a synthesis between his predecessors Gaston Bachelard, Georges Canguilhem, and Louis Althusser, as well as contemporary Francophone philosophers of science such as Bruno Latour and Isabelle Stengers. Simons situates Serres's unique contribution through his notion of the quasi-object, a concept he argues organizes great parts of Serres's work into a promising philosophy of science as well as a challenge to the narrower field of French epistemology to which it has often been limited. Simons highlights how the concept encompasses Serres's commitment to positive relations between science and culture and his rejection of pleas to purify the scientific self from imaginative and cultural elements. It helps to situate Serres between the distinct traditions of Bachelard and Latour, as well as progressing the innovative aspects of Serres's philosophy for current debates in the philosophy of science, history, and sociology of science. Showing how Serres's philosophy can serve as a normative approach to science and technology, *Michel Serres and French Philosophy of Science* takes in themes of materiality, religiosity, modernity, and ecology to advance a timely alternative to philosophy of science for contemporary life.

*The Politics of Replacement* Sarah Bracke, Luis Manuel Hernández Aguilar, 2023-12-01 *The Politics of Replacement* explores current demographic conspiracy theories and their entanglement with different forms of racism and exclusionary politics such as sexism. The book focuses on population replacement conspiracy theories that is those imaginaries and discourses centered on the idea that the national population is under threat of being overtaken or even wiped out by those considered as alien to the nation and that this is the result of concerted efforts by elites. Replacement conspiracy theories are on the rise again from Eurabia fantasies to Renaud Camus's The Great Replacement, white supremacist discourses are thriving and increasingly broadcasting in mainstream venues. To account for their rise and spread, this edited volume brings together research on various dimensions of population replacement conspiracy theories: different theoretical and methodological approaches, different social scientific and humanities interdisciplinary backgrounds, different geographical case studies across Europe, North America, Southeast Asia, and Oceania, different time periods: medieval archives, colonial archives, Nazi archives, postcolonial migrations post 9/11, and different forms of racialization and racisms: Islamophobia, antisemitism, racism against migrants and refugees. It also explores the entanglement of population replacement discourse with gendered violence. The book is organized into four sections: 1. exploring the historical background of the current rise of demographic conspiracy theories; 2. tracing the neoliberal governmentalities in and through which replacement discourse operates; 3. analyzing the particularly intense focus on the threat of Muslims in contemporary replacement conspiracy theories; and 4. investigating the connection between replacement conspiracies, gender, and violence. This title is essential reading for scholars, journalists, and activists interested in the

contemporary far right conspiracy theories and racisms      The Anthropological Turn Jacob Collins, 2020-04-24 A close look at post 1968 French thinkers Rgis Debray Emmanuel Todd Marcel Gauchet and Alain de Benoist In The Anthropological Turn Jacob Collins traces the development of what he calls a tradition of political anthropology in France over the course of the 1970s After the social revolution of the 1960s brought new attention to identities and groups that had previously been marginal in French society the country entered a period of stagnation the economy slowed the political system deadlocked and the ideologies of communism and Catholicism lost their appeal In this time of political cultural and economic indeterminacy political anthropology as Collins defines it offered social theorists grand narratives that could give greater definition to the social by anchoring its laws and histories in the deep and sometimes archaic past Political anthropologists sought to answer the most basic of questions what is politics and what constitutes a political community Collins focuses on four influential yet typically overlooked French thinkers Rgis Debray Emmanuel Todd Marcel Gauchet and Alain de Benoist who from Left to far Right represent different political leanings in France Through a close and comprehensive reading of their work he explores how key issues of religion identity citizenship and the state have been conceptualized and debated across a wide spectrum of opinion in contemporary France Collins argues that the stakes have not changed since the 1970s and rival conceptions of the republic continue to vie for dominance Political and cultural issues of the moment the burkini for example become magnified and take on the character of an anthropological threat In this respect he shows how the anthropological turn as it figures in the work of Debray Todd Gauchet and Benoist is a useful lens for viewing the political and social controversies that have shaped French history for the last forty years      **Approaches to Greek Myth** Lowell

writing and the practice of Athenian democracy Lincoln then turns his attention to the period when myth was recuperated as a privileged type of narrative a process he locates in the political and cultural ferment of the eighteenth and nineteenth centuries Here he connects renewed enthusiasm for myth to the nexus of Romanticism nationalism and Aryan triumphalism particularly the quest for a language and set of stories on which nation states could be founded In the final section of this wide ranging book Lincoln advocates a fresh approach to the study of myth providing varied case studies to support his view of myth and scholarship on myth as ideology in narrative form     From Triads to Pentads Robert Parkin,2025-03-01 N J Nick Allen had an extensive academic career which for the most part was spent in Oxford He passed away in 2020 This edited volume brings together a selection of his anthropological papers They cover two major fields and a supplementary one Indo European mythical comparison and his own notion of tetradic kinship supplemented by a long term interest in the work of Marcel Mauss and his uncle mile Durkheim It follows key areas of his research in which his contributions were novel innovative stimulating and plausible     **Wolves of Rome** Krešimir Vuković,2022-12-05 The study is a fresh interpretation of the Roman foundation myth and one of the most important Roman festivals the Lupercalia an annual celebration of youth and sexuality by Roman men and women Written with clarity and force the book spans the whole of Roman history and takes the Lupercalia back to its Indo European roots by presenting clear parallels between Roman and Indian traditions     The Indo-Europeans Jean-Paul Demoule,2023 The existence of an Indo European linguistic family allowing for the fact that several languages widely dispersed across Eurasia share numerous traits has been demonstrated for several centuries now But the underlying factors for this shared heritage have been fiercely debated by linguists historians archaeologists and anthropologists The leading theory of which countless variations exist argues that this similarity is best explained by the existence at one given point in time and space of a common language and corresponding population This ancient prehistoric population would then have diffused across Eurasia eventually leading to the variation observed in historical and modern times The Indo Europeans Archaeology Language Race and the Search for the Origins of the West argues that despite its acceptance and use by most researchers from different disciplines such a model is inherently flawed This book describes how beginning in the late eighteenth century Europeans began a quest for a supposed original homeland from which a small conquering people would one day spread out bringing their language to Europe and parts of Asia India Iran Afghanistan This quest was often closely tied to ideological preoccupations and it was in its name that the Nazi leadership claiming for the Germans the status of the purest Indo Europeans or Aryans waged genocide The last part of the book summarizes the current state of knowledge and current hypotheses in the fields of linguistics archaeology comparative mythology and genetics The culmination of three decades of research this book offers a sweeping survey of the historiography of the Indo European debate and poses a devastating challenge to the Indo European origin story at its roots
