The ICD 9 CM Coding Handbook is the only guide published in collaboration with the Central Office on ICD 9 CM of the American Hospital Association. The Central Office is the official industry body that prepares the AHA Coding Clinic for ICD 9 CM. The Handbook helps coders understand the principles behind the classification system so they can apply the official coding advice found in the ICD 9 CM Coding Manual. Academic and in-service instructors can easily arrange course outlines and study exercises around Handbook chapters to train new and experienced coders. Each Handbook contains 100 plus exercises and review questions plus 269 case summary exercises that are based on real patient records.

**Faye Brown's ICD-9-CM Coding Handbook** Faye Brown, 2001

Published in cooperation with the Central Office on ICD 9 CM of the American Hospital Association, the New 2000 Edition of the ICD 9 CM Coding Handbook is the only reference that incorporates the official ICD 9 CM changes for fiscal year 2001. The most widely used publication for teaching ICD 9 CM, designed for use by both entry level and more experienced coders. There are more than 100 review exercises interspersed throughout the text and at the end of the chapters. These exercises describe additional information about a patient's background or present condition and allow coders to practice their coding skills on examples that closely resemble actual patient records. The answers to these exercises not only provide the correct codes and principal diagnoses; they also explain why a particular code is correct or what information is most important in a certain case.

This Workbook is a self-learning exercise companion to the ICD 9 CM Coding Handbook 2006 and it can be used as an ancillary text for classroom study. It contains hundreds of self-learning exercises based on real health records. The case summary style of the exercises requires the student to consider the patient's condition as well as all relevant information provided: medical history, reason for admission or encounter, laboratory results, procedures performed, and the diagnoses listed. In all exercises, students need to apply pertinent coding principles and official

coding guidelines in making code assignments and designating the principal diagnosis and procedure for each episode of care in clean technically correct language Challenging practice drills test the users coding skills in a variety of realistic health care settings from the physician office to inpatient care The Workbook is also available with a Answer Key Supplement ICD 9 CM Workbook for Beginning Coders 2006 With Answer Key 2005 78 pages 8 1/2 x 11 soft cover ISBN 1 55648 327 9
