Animal Oppression and Human Violence David A. Nibert, 2013-05-07 Jared Diamond and other leading scholars have argued that the domestication of animals for food labor and tools of war has advanced the development of human society But by comparing practices of animal exploitation for food and resources in different societies over time David A Nibert reaches a strikingly different conclusion He finds in the domestication of animals which he renames domesecration a perversion of human ethics the development of large scale acts of violence disastrous patterns of destruction and growth curbing epidemics of infectious disease Nibert centers his study on nomadic pastoralism and the development of commercial ranching a practice that has been largely controlled by elite groups and expanded with the rise of capitalism Beginning with the pastoral societies of the Eurasian steppe and continuing through to the exportation of Western meat centered eating habits throughout today s world Nibert connects the domesecration of animals to violence invasion extermination displacement enslavement repression pandemic chronic disease and hunger In his view conquest and subjugation were the results of the need to appropriate land and water to maintain large groups of animals and the gross amassing of military power has its roots in the economic benefits of the exploitation exchange and sale of animals Deadly zoonotic diseases Nibert shows have accompanied violent developments throughout history laying waste to whole cities societies and civilizations His most powerful insight situates the domesecration of animals as a precondition for the oppression of human populations particularly indigenous peoples an injustice impossible to rectify while the material interests of the elite are inextricably linked to the exploitation of animals Nibert links domesecration to some of the most critical issues facing the world today including the depletion of fresh water topsoil and oil reserves global warming and world hunger and he reviews the U S government s military response to the inevitable crises of an overheated hungry resource depleted world Most animal advocacy campaigns reinforce current oppressive practices Nibert argues Instead he suggests reforms that challenge the legitimacy of both domesecration and capitalism
