Physics Lawrence M. Krauss, 1993 Since the 19th century physicists have talked a private language they share only with mathematicians And since the 1920s physics has not even shared our everyday idea of space and time the sub atomic world of the quantum seems to be ruled by weirder rules than we can understand This book cuts through the maths and the strangeness to the underlying concepts the basic intuitions about the way the world works that guide the researchers of physics such as Feynman Hawking Penrose and Weinberg Lawrence Krauss is the author of *The Fifth Essence* *Werner*

Herzog - A Guide for the Perplexed Paul Cronin, 2014-08-05 This edition of Herzog on Herzog presents a completely new set of interviews in which Werner Herzog discusses his career from its very beginnings to his most recent productions Herzog was once hailed by Francois Truffaut as the most important director alive Famous for his frequent collaborations with mercurial actor Klaus Kinski including the epics *Aguirre the Wrath of God* and *Fitzcarraldo* and the terrifying *Nosferatu* and more recently with documentaries such as *Grizzly Man* *Cave of Forgotten Dreams* and *Into the Abyss* Herzog has built a body of work that is one of the most vital in post war German cinema **Introductory Physics** , 2010 **The War on Science**

Electric Universe David Bodanis, 2006-02-28 The bestselling author of *E mc2* weaves tales of romance divine inspiration and fraud through an account of the invisible force that permeates our universe electricity and introduces us to the virtuoso scientists who plumbed its secrets For centuries electricity was seen as little more than a curious property of certain substances that sparked when rubbed Then in the 1790s Alessandro Volta began the scientific investigation that ignited an explosion of knowledge and invention The force that once seemed inconsequential was revealed to be responsible for everything from the structure of the atom to the functioning of our brains In harnessing its power we have created a world of wonders complete with roller coasters and radar computer networks and psychopharmaceuticals In *Electric Universe* the great discoverers come to life in all their brilliance and idiosyncrasy including the visionary Michael Faraday who struggled against the prejudices of the British class system and Samuel Morse a painter who before inventing the telegraph ran for mayor of New York City on a platform of persecuting Catholics Here too is Alan Turing whose dream of a marvelous thinking machine what we know as the computer was met with indifference and who ended his life in despair after British authorities forced him to undergo experimental treatments to cure his homosexuality From the frigid waters of the Atlantic to the streets of Hamburg during a World War II firestorm to the interior of the human body *Electric Universe* is a mesmerizing journey of discovery
