Fat Chance:

Fat Chance Robert H. Lustig, 2013-12-31 The landmark New York Times best seller that reveals how the explosion of sugar in our diets has created an obesity epidemic and what we can do to save ourselves Robert Lustig is at the forefront of war against sugar showing us that it's toxic it's addictive and it's everywhere because the food companies want it to be His 90 minute YouTube video Sugar The Bitter Truth has been viewed more than 7 million times Now in this landmark book he documents the science and the politics that have led to personal misery and public crisis the pandemic of obesity and chronic disease over the last thirty years In the late 1970s when the U S government declared that we needed to get the fat out of our diets the food industry responded by pumping in more sugar to make food more palatable and more salable and by removing the fiber to make food last longer on the shelf The result has been a perfect storm for our health disastrously altering our biochemistry to make us think we're starving drive our eating habits out of our control and turn us into couch potatoes If we cannot control how we eat it's because of the catastrophic excess of sugar in our diet the resulting hormonal imbalances have rewired our brains To help us lose weight and recover our health Lustig presents strategies we can each use to readjust the key hormones that regulate hunger reward and stress as well as societal strategies to improve the health of the next generation With scientific rigor and even a little humor **Fat Chance** categorically proves that a calorie is not a calorie and takes that knowledge to its logical conclusion an overhaul of the global food system

Summary of Fat Chance by Robert Lustig: Chance Beating the Odds Against Sugar, Processed Food, Obesity, and Disease thomas francis, 2024-06-07 **Fat Chance** **Fat Chance Beating the Odds Against Sugar Processed Food Obesity and Disease** by Robert Lustig sets the stage for the rest of the book by providing a comprehensive overview of the current state of our society's relationship with food and health Lustig begins by highlighting the stark reality of the obesity and metabolic disease epidemics citing alarming statistics and trends that demonstrate the severity of the problem He notes that these conditions are not only devastating for individuals but also have a profound impact on our healthcare system and economy The author then delves into the root causes of these epidemics arguing that they are not solely the result of personal choice or lack of willpower Rather they are the consequence of a complex interplay between biology environment and societal factors Lustig contends that our modern diet dominated by processed foods and added sugars is a primary driver of these epidemics
