

Fatal Asthma

The background of the slide is a photograph of a sunset or sunrise. A bright, glowing sun is positioned on the left side, creating a strong lens flare and illuminating the sky with warm orange and yellow light. The sky transitions from a deep orange near the horizon to a darker teal or blue at the top. In the lower right portion of the image, there are silhouettes of clouds or distant landmasses.

Fatal Asthma:

Emergency Asthma Barry E. Brenner, 1999-02-23 This landmark work represents the first book focusing on the acute asthmatic in the emergency department This superb reference provides a wide range of practical yet thorough state of the art perspectives on the evaluation and treatment of acute asthma It features a unique collaboration between authorities in emergency medicine intensive care

Severe Asthma Yong Chul Lee, So Ri Kim, Seong Ho Cho, 2017-10-30 This book presents state of the art knowledge on severe asthma with the aim of providing readers with a clear understanding of first the heterogeneity of the condition and of patients symptom profiles and responses to therapy and second the future implications of this heterogeneity for individualized patient care After an opening section that offers an overview of severe asthma including its clinical significance the pathogenesis available diagnostic approaches and treatment options are described in detail The sections on diagnosis and treatment cover the role of biomarkers the use of radiologic diagnostic modalities and both pharmacologic and non pharmacologic therapies including emerging options that will address hitherto unmet needs of patients The outcomes of cutting edge preclinical and clinical research are carefully documented and numerous useful tips provided on patient management The inclusion of many informative schematic figures will assist readers in grasping the contents easily The book will be of high value for medical students researchers general physicians specialists and paramedical staff

Difficult and Severe Asthma in Children Andrew Bush, Giorgio Piacentini, Francesca Santamaria, Nicola Ullmann, Renato Cutrera, 2019-09-23 Globally severe asthma is defined by the WHO as either A untreated severe asthma B difficult to treat severe asthma and C treatment resistant severe asthma Untreated severe asthma is a political problem the children do not have access to the basic tools for asthma management and when this is corrected asthma outcomes are transformed The problem in difficult to treat severe asthma is not the airway disease but co morbidities and behavioral factors This is the group in which there are most asthma deaths underscoring that severe asthma cannot be solely defined by levels of prescribed therapy Treatment resistant severe asthma is rare and challenging and the problem is the airway pathology These children require new and innovative therapies

Focus on Asthma Research Miroslav Tersa, 2004 Asthma is a disease that affects the lungs It causes repeated episodes of wheezing breathlessness chest tightness and nighttime or early morning coughing Tens of millions of people throughout the world suffer from asthma Airways are the paths that carry air to the lungs As the air moves through the lungs the airways become smaller like branches of a tree During an attack the sides of the airways in the lungs become inflamed and swollen Muscles around the airways tighten and less air passes in and out of the lungs Excess mucus forms in the airways clogging them even more The attack also called an episode can include coughing chest tightness wheezing and trouble breathing Environmental exposures such as house dust mites and environmental tobacco smoke are important triggers of an attack This new book presents important new research on the causes on asthma as well as its diagnosis and treatment

Airway Wall Remodelling in Asthma A. G.

Stewart,2020-10-28 Asthma is a disease of high prevalence that has shown a trend toward increasing incidence morbidity and mortality over the last three decades despite apparently effective drug treatments and increasing awareness of the need for better disease management Often the inflammatory component of asthma is studied however the tissue remodelling process is a significant process that should not be overlooked This valuable reference synthesizes current data and concepts developed to determine the relationship between airway wall remodelling and the pathogenesis of asthma It discusses evidence for structural changes in asthmatic airway the relationship between airway thickening and hyperresponsiveness the relationship between cytokine production and tissue remodelling and inflammation the significance of epithelial changes and the extracellular matrix and in vivo and in vitro experimental approaches to the assessment of remodelling Pharmacological and biochemical mechanisms that control cell proliferation are also examined The consequences of airway wall remodelling for airway hyperresponsiveness is the unique focus of this volume offering a fresh perspective of advances in asthma research

Severe Asthma, An Issue of Immunology and Allergy Clinics of North America Rohit K. Stem Cell Therapy for Autoimmune Disease Richard K. Burt, 2019-11-11 Stem cell transplantation may be complicated by treatment related mortality and like the immune system that it regenerates has equal potential to either create and preserve or destroy The dual nature that defines stem cells is differentiation that ultimately leads to death and self renewal which leads to immortality What types of stem cells are there How are they collected What are their attributes and characteristics This textbook devotes many chapters to familiarize the reader with the basic science clinical aspects and new questions being raised in the field of stem cell biology Blood stem cells for tolerance and tissue regeneration are a rapidly developing research and clinical field that is being applied to autoimmune diseases In clinical trials autologous hematopoietic blood stem cells are being used to reduce the cytopenic interval following intense immune suppressive transplant regimens While as yet not delineated some possible mechanisms and pathways leading to tolerance after hematopoietic stem cell transplantation are suggested in these chapters Tissue regeneration from blood stem cells is also suggested by animal experiments on stem cell plasticity or metamorphosis i.e. change in fate as described within this textbook Ongoing early clinical trials on tissue regeneration from blood stem cells are described in the chapter on stem cell therapy for cardiac and peripheral vascular disease Whether autologous hematopoietic stem cells

through the process of mobilization and reinfusion may be manipulated to contribute to tissue repair in autoimmune diseases is a future area for translational research

Airway Epithelium Jonathan Widdicombe, 2012-11-01 The airways are lined with a film of fluid 10 m deep that acts as the first line of defense against inhaled pathogens dirt and noxious vapors Transepithelial fluid movements driven by active transepithelial ion transport serve to regulate the depth of this airway surface liquid In the larger airways a mucus gel derived from both glands and surface epithelium entraps inhaled particles which are then removed by the coordinated beating of cilia Both glands and epithelium secrete a wide variety of antimicrobial and other

protective substances in addition to mucins Substances released across the basolateral surface of the epithelium attract leukocytes and influence neighboring tissues Here after reviewing the basic structure of mammalian airway epithelium I discuss its various defensive functions and how they are altered in airway disease **Autopsy Pathology** Walter E.
