Yurko, Shripad T. Revankar, 2021-09-13 Complex Problem Solving Beyond the Psychometric Approach Wolfgang Schoppek, Joachim Funke, Magda Osman, Annette Kluge, 2018-09-28 Complex problem solving CPS and related topics such as dynamic decision making DDM and complex dynamic control CDC represent multifaceted psychological phenomena In abroad sense CPS encompasses learning decision making and acting in complex and dynamic situations Moreover solutions to problems that people face in such situations are often generated in teams or groups This adds another layer of complexity to the situation itself because of the emerging issues that arise from the social dynamics of group interactions This framing of CPS means that it is not a single construct that can be measured by using a particular type of CPS task e g minimal complex system tests which is a view taken by the psychometric community The proposed approach taken here is that because CPS is multifaceted multiple approaches need to be taken to fully capture and understand what it is and how the different cognitive processes associated with it complement each other Thus this Research Topic is aimed at showcasing the latest work in the fields of CPS as well as DDM and CDC that takes a holist approach to investigating and theorizing about these abilities The collection of articles encompasses conceptual approaches as well as experimental and correlational studies involving established or new tools to examine CPS DDM and CDC This work contributes to answering questions about what strategies and what general knowledge can be transferred from one type of complex and dynamic situation to another what learning conditions result in transferable knowledge and skills and how these features can be trained *Aeronautical Engineering: A Cumulative Index to a Continuing Bibliography (supplement 274)* ,1992 Applications of Advanced Control and Artificial Intelligence in Smart Grids Qiuye Sun, Jianfang Xiao, Yonghao Gui, Dazhong Ma, Lei Xi, 2022-05-11 Advances in agri-food robotics Professor Eldert van Henten, Professor Yael Edan, 2024-03-26 Provides a comprehensive review of the recent advances in agricultural robotics such as advances in sensing and perception as well as technologies and actuation Addresses our understanding of the social ethical and economic aspects of agricultural robotics including the regulatory frameworks and standards required to authorise their adoption Provides examples of the practical application of agricultural robotics in an array of agricultural settings from greenhouse and orchard cultivation to meat fish processing **Subject Guide to Books in Print** ,1997 Electrical & Electronics Abstracts ,1997 *Foundations of Generic Optimization* R.
