Singh, A.K. Shrivastava, 2007-05-01 The present book on the Biodiversity of Ranthambhore Tiger Reserve deals with 539 species of higher plants and 361 species of animals vertebrates Besides geographical position and topography the abiotic components viz geology soils water climatic conditions etc which determine the composition of biota in an ecosystem have been discussed in details Correct and valid names have been adopted for the floral and faunal elements along with local and English names The keys have been provided for plant species from infra specific to family level for easy identification The short diagnostic description phenology ecology and distributional aspects have been provided under each plant species Besides statistical analysis of floral composition the phytogeographical and biological spectra have also been worked out to determine the routes of migration and phytoclimate respectively Bioperspective value of the Reserve has been assessed to determine the economic potentiality and sustainable utilization of bioresources The faunal diversity includes vertebrate fauna only arranged in a classified manner The shelter and feeding habits along with dependency of fauna on vegetation have been provided to determine plant animal relationship and flow of energy Details about endemic and threatened species of plants and animals along with causes of threats have been given for proper management of the Reserve About 107 colour photographs of habitat and plants and animals with 36 illustrations of plant species have been provided Several maps pie charts graphs figures etc along with data tables are appended to illustrate the findings It is hoped that the book will prove a milestone in the management of the Reserve      **Faunal Ecology and**

**Entomology in the Doon Valley (Garhwal Himalaya) A Stronghold for Insect Research** B.K. Tyagi, Vijay Veer, 2016-08-01 Entomology in the Doon Valley Garhwal Region is a unique journey into annals of the country's most fascinating and highly entomofauna rich habitat the Dehra Dun or the Doon Valley tucked in the cosy climate of the foothills of the lower Himalayan region Notwithstanding an unprecedented quantum of fragmented information available on the insects of the Doon Valley courtesy various different long term research programmes carried out at the three major research institutions viz the Forest Research Institute Colleges the Zoological Survey of India and The Dayanand Anglo Vedic PG College all located in Dehra Dun yet no single entomological treatise detailing all the insect orders supported by relevant local references was ever offered to have a firsthand knowledge on the Doon Valley's buoyant research tradition For the first time therefore the present treatment comes forward to satiate a nature lover's desire to know completely about their own insect fauna Besides offering an uncanny history of research along with a string of researchers and institutions engaged in entomological research in the Doon Valley the book describes entomologic characteristics of all the 32 Orders of Class Insecta with emphasis on research contributions on the local and endemic fauna To facilitate our understanding the book offers as an example inventories of the extant taxa of a couple of orders and still more importantly bio bibliographies of a few Doon Valley entomologists as inspirational life stories for the beginners The Book written in a lucid language will surely serve a good purpose for both the undergraduates postgraduates and research scholars engaged in insect research on one hand and the professional entomologists not only from the Grahwal region but also across the country and beyond on the other

Prakash,Pratap Singh,2005-06-01 Small mammals Rodents and Insectivores constitute 31

18% of total mammal species found in India In spite of their abundance this largest group among mammals has received little attention of ecologists From the geomorphological standpoint Rajasthan offers multiple possibilities The Aravallis diagonally bisect the state into western arid and eastern semi arid and mesic zones The southern and southeastern parts of state have various rock systems Present book is an endeavour to cover small mammals of the whole state The book is first of its kind in India which takes into account habitat preference food and feeding behaviour home range activity pattern reproductive behaviour biochemical communication and physiology of small mammals of desert and hilly terrain It also includes zoogeography of small mammals found in Rajasthan and changes in faunistic composition being brought by canal and tube well irrigation It is expected that book will be quite useful for students researchers and teachers of Ecology and Zoology
