Out of Place John B. Lyon,2016-11-17 In late nineteenth century Germany the onset of modernity transformed how people experienced place In response to increased industrialization and urbanization the expansion of international capitalism and the extension of railway and other travel networks the sense of being connected to a specific place gave way to an unsettling sense of displacement Out of Place analyzes the works of three major representatives of German Realism Wilhelm Raabe Theodor Fontane and Gottfried Keller within this historical context It situates the perceived loss of place evident in their texts within the contemporary discourse of housing and urban reform but also views such discourse through the lens of twentieth century theories of place Informed by both phenomenological Heidegger and Casey as well as Marxist Deleuze Guattari and Benjamin approaches to place John B Lyon highlights the struggle to address issues of place and space that reappear today in debates about environmentalism transnationalism globalization and regionalism **Cities of Power** G-ran Therborn,2021-10-12 Why are cities centers of power A sociological analysis of urban politics In this brilliant very original survey of the politics and meanings of urban landscapes leading sociologist G-ran Therborn offers a tour of the world's major capital cities showing how they have been shaped by national popular and global forces Their stories begin with the emergence of various kinds of nation state each with its own special capital city problematic In turn radical shifts of power have impacted on these cities development in popular urban reforms or movements of protest and resistance in the rise and fall of fascism and military dictatorships and the coming and going of Communism Therborn also analyzes global moments of urban formation of historical globalized nationalism as well as the cities of current global image capitalism and their variations of skyscraping gating and displays of novelty Through a global historical lens and with a thematic range extending from the mutations of modernist architecture to the contemporary return of urban revolutions Therborn questions received assumptions about the source manifestations and reach of urban power combining perspectives on politics sociology urban planning architecture and urban iconography He argues that at a time when they seem to be moving apart there is a strong link between the city and the nation state and that the current globalization of cities is largely driven by the global aspirations of politicians as well as those of national and local capital With its unique systematic overview from Washington D

C and revolutionary Paris to the flamboyant twenty first century capital Astana in Kazakhstan its wealth of urban observations from all the populated continents and its sharp and multi faceted analyses Cities of Power forces us to rethink our urban future as well as our historically shaped present Neighbors and Enemies Pamela E. Refuge in Hell Daniel B. Silver,2021-03-19 Fascinating footnote to Holocaust history a Jewish hospital in the heart of Berlin that treated patients to the very end of Hitler s reign Kirkus Reviews starred review One of the most incredible stories of World War II Dallas Morning News How did Berlin s Jewish Hospital in the middle of the Nazi capital survive as an institution where Jewish doctors and nurses cared for Jewish patients throughout World War II How could it happen that when Soviet troops liberated the hospital in April 1945 they found some eight hundred Jews still on the premises Daniel Silver carefully uncovers the often surprising answers to these questions and through the skillful use of primary source materials and the vivid voices of survivors reveals the underlying complexities of human conscience The story centers on the intricate machinations of the hospital s director Herr Dr Lustig a German born Jew whose life and death power over medical staff and patients and finely honed relationship with his own boss the infamous Adolf Eichmann provide vital pieces to the puzzle some have said the miracle of the hospital s survival Silver illuminates how the tortured shifts in Nazi policy toward intermarriage and so called racial segregation provided a further if hugely counterintuitive shelter from the storm for the hospital s resident Jews Scenes of daily life in the hospital paint an often heroic and always provocative picture of triage at its most chillingly existential Not since Schindler s List have we had such a haunting story of the costs and mysteries of individual survival in the midst of a human created hell Gripping one physician s actions are depicted in all their fascinating complexity The Washington Post Book World

The Design of Frontier Spaces Carolyn Loeb,Andreas Luescher,2016-03-09 In a globalizing world frontiers may be in flux but they remain as significant as ever New borders are established even as old borders are erased Beyond lines on maps however borders are spatial zones in which distinctive architectural graphic and other design elements are deployed to signal the nature of the space and to guide if not actually control behaviour and social relations within it This volume unpacks how manipulations of space and design in frontier zones historically as well as today set the stage for specific kinds of interactions and convey

meanings about these sites and the experiences they embody Frontier zones organize an array of functions to facilitate the passage of goods information and people and to define and control access Bringing together studies from Asia Africa the Middle East Europe and North America this collection of essays casts a wide net to consider borders of diverse sorts Investigations of contemporary political frontiers are set within the context of examinations of historical borders borders that have existed within cities and virtual borders This range allows for reflection on shifts in how frontier zones are articulated and the impermanence of border emplacements as well as on likely scenarios for future frontiers This text is unique in bringing together a number of scholarly perspectives in the arts and humanities to examine how spatial and architectural design decisions convey meaning shape or abet specific social practices and stage memories of frontier zones that no longer function as such It joins and expands discussions in social science disciplines in which considerations of border practices tend to overlook the role of built form and material culture more broadly in representing social practices and meanings

Expelling the Germans Matthew Frank, 2008-03-06 *Expelling the Germans* focuses on how Britain perceived the mass movement of German populations from Poland and Czechoslovakia at the end of the Second World War Drawing on a wide range of British archival material Matthew Frank examines why the British came to regard the forcible removal of Germans as a necessity and evaluates the public and official responses in Britain once mass expulsion became a reality in 1945 Central to this study is the concept of population transfer the

contemporary idea that awkward minority problems could be solved rationally and constructively by removing the population concerned in an orderly and gradual manner while avoiding unnecessary human suffering and economic disruption Dr Frank demonstrates that while most British observers accepted the principle of population transfer most were also consistently uneasy with the results of putting that principle into practice This clash of principle with practice reveals much not only about the limitations of Britain's role but also the hierarchy of British priorities in immediate post war Europe **The**

Hochscherf, Christoph Laucht, Andrew Plowman, 2010-12-01 The Allied agreement after the Second World War did not only partition Germany it divided the nation along the fault lines of a new bipolar world order This inner border made Germany a unique place to experience the Cold War and the German question in this post 1945 variant remained inextricably entwined with the vicissitudes of the Cold War until its end This volume explores how social and cultural practices in both German states between 1949 and 1989 were shaped by the existence of this inner border putting them on opposing sides of the ideological divide between the Western and Eastern blocs as well as stabilizing relations between them This volume's interdisciplinary approach addresses important intersections between history politics and culture offering an important new appraisal of the German experiences of the Cold War *Cities and Wetlands* Rod Giblett, 2016-08-11 This book is available

Steve Brown, Cari Goetcheus, 2023-02-14 Cultural landscapes which in the field of heritage studies and practice relates to caring for and safeguarding heritage landscapes is a concept embedded in contemporary conservation Heritage conservation has shifted from an historical focus on buildings city centres and archaeological sites to encompass progressively more

diverse forms of heritage and increasingly larger geographic areas embracing both rural and urban landscapes While the origin of the idea of cultural landscapes can be traced to the late 19th century Euro American scholarship it came to global attention after 1992 following its adoption as a category of site by the UNESCO World Heritage Committee Today cultural landscape practice has become increasingly complex given the expansion of the values and meanings of heritage the influence of environmental challenges such as human induced climate change technological advancements and the need to better understand and interpret human connections to place and landscapes The aim of this handbook is to strike a balance between theory and practice which we see as inseparable while also seeking to achieve a geographical spread disciplinary diversity and perspectives and a mix of authors from academic practitioner management and community backgrounds
