Fear Memory Integration A Natural Health Alternative To Conventional Psychotherapies:

Fear Memory Integration Jim Pullaro, 2005-11 Neurosis is not a medical condition Rather it is a chronic functional disorder of the autonomic nervous system resulting from environmental conditioning which begins in the womb It is caused by the imprinting of and the continuous retrieval and repression of fear memories This imbalance interferes with the nervous system s ability to correctly respond to present sensory input and precipitates toxicosis of the autonomic nervous system The nervous system s attempts to detoxify itself results in ongoing exaggerated autonomic responses such as rage anxiety and depression Neurosis can be healed by intentional fear memory retrieval in portions that are small enough to be holistically integrated This process reverses the condition of neural toxicosis thereby relieving excessive mood swings Neurotic tension and the act out that is driven by this tension is also decreased in direct proportion to the amount of fear memory that is processed All of the symptoms that are presently being catalogued and grouped into separate and overlapping categories of mental illness are actually each person s unique learned responses to their automatic fear memory recall The neurotic act out is a symptom which is a projection of the constantly occurring fear response onto a present situation *Subject Guide to Books in Print* ,1971 **The Complete Illustrated Encyclopedia of Alternative Healing Therapies** C.
