, 2004 Archis, 2002 **Behind the Postcolonial** Abidin Kusno, 2014-04-04 In *Behind the Postcolonial* Abidin Kusno shows how colonial representations have been revived and rearticulated in postcolonial Indonesia The book shows how architecture and urban space can be seen both historically and theoretically as representations of political and cultural tendencies that characterize an emerging as well as a declining social order It addresses the complex interactions between public memories of the present and past between images of global urban cultures and the concrete historical meanings of the local It shows how one might write a political history of postcolonial architecture and urban space that recognizes the political cultures of the present without neglecting the importance of the colonial past In the process it poses serious questions for the analysis and understanding of postcolonial states **Dutch Art + Architecture Today**, 1986-12

architecture as a chaotic adventure Nothing could be more true than that of the last two decades Never has architecture been so unbridled and so extraordinary the architectural cast has never been so wide and their works so diverse What though if you are new to the subject How is it possible to make sense of this seemingly unruly architectural landscape There are so many different types of architecture so many designers with such varying and even contradictory approaches This book is a much needed navigation guide for anyone interested in modern architecture Organised chronologically it enables you to find your way through one of the most prolific periods of building design It looks at buildings in often contrasting styles that have been built almost simultaneously across the world with their roots in very different tendencies and schools of thought A loose but effective framework is provided which pulls all these multiple threads together while key buildings are described individually with a unique clarity and precision Aaron Betsky Director of Cincinnati Art Museum Comprehensive coherent and cogent Puglisi's book sorts out the messy history of the last quarter century of the world's best architecture Professor Iain Borden Head Bartlett School of Architecture UCL Illuminating and insightful a must have read for students Hans Ibelings Editor of *A10 new European architecture* Lucid and concise Charles Jencks Architecture Critic and Author A compelling comprehensive overview of the avant garde since 1988 as it oscillates in and out of the global star system Bill Menking Editor of *The Architect's Newspaper* This is the first clear and systematic study of the culture of architecture from the reds of deconstruction to the sustainable greens
