Fearful Crossing Harold Curran, 1982 *SP035: A Geologic and Natural History Tour Through Nevada and Arizona Along U.S. Highway 93* Joseph V. Tingley, 2010 **Naval Air Station Fallon Geothermal Energy Development for Generation of Electrical Power, Churchill County**, 1991 Sierra Crossing Thomas Frederick Howard, 1998 Documents the building of the first roads over the Sierra Nevada in the 19th century in projects launched by emigrants former gold miners state government officials the War Department the Interior Department local politicians town businessmen stagecoach operators and other entrepreneurs eager to establish land routes between California and the rest of the country **Hard Road West** Keith Heyer Meldahl, 2020-03-04 The dramatic journeys of the 19th century Gold Rush come to life in this geologist's tour of the American West and the events that shaped the land In 1848 news of the discovery of gold in California triggered an enormous wave of emigration toward the Pacific The dramatic terrain these settlers crossed is so familiar to us now that it is hard to imagine how frightening even godforsaken its sheer rock faces and barren deserts once seemed to them Hard Road West brings their perspective vividly to life weaving together the epic overland journey of the covered wagon trains and the compelling story of the landscape they encountered Taking readers along the 2 000 mile California Trail Keith Meldahl uses settler's diaries and letters as well as his own experiences on the trail to reveal how the geology and geography of the West shaped our nation's westward expansion He guides us through a landscape of sawtooth mountains following the meager streams that served as lifelines through an arid land all the way to California itself where colliding tectonic plates created breathtaking scenery and planted the gold that lured travelers west in the first place Alternates seamlessly between vivid accounts of the 19th century journey and lucid explanations of the geological events that shaped the landscape traveled Library Journal **Eligibility/feasibility Study and Environmental Assessment for National Historic Trail Authorization** United States. Modeling Nutrient and Dissolved-oxygen Transport in the Truckee River and Truckee Canal Downstream from Reno, Nevada Jon O. Nowlin,1987 *Desperate Passage* Ethan

Rarick,2008-02-04 In late October 1846 the last wagon train of that year s westward migration stopped overnight before resuming its arduous climb over the Sierra Nevada Mountains unaware that a fearsome storm was gathering force After months of grueling travel the 81 men women and children would be trapped for a brutal winter with little food and only primitive shelter The conclusion is known by spring of the next year the Donner Party was synonymous with the most harrowing extremes of human survival But until now the full story of what happened what it tells us about human nature and about America s westward expansion remained shrouded in myth Drawing on fresh archaeological evidence recent research on topics ranging from survival rates to snowfall totals and heartbreaking letters and diaries made public by descendants a century and a half after the tragedy Ethan Rarick offers an intimate portrait of the Donner party and their unimaginable ordeal a mother who must divide her family a little girl who shines with courage a devoted wife who refuses to abandon her husband a man who risks his life merely to keep his word But Rarick resists both the gruesomely sensationalist accounts of the Donner party as well as later attempts to turn the survivors into archetypal pioneer heroes The Donner Party Rarick writes is a story of hard decisions that were neither heroic nor villainous Often the emigrants displayed a more realistic and typically human mixture of generosity and selfishness an alloy born of necessity A fast paced heart wrenching clear eyed narrative history A Desperate Hope casts new light on one of America s most horrific encounters between the dream of a better life and the harsh realities such dreams so often must confront The Deadliest Indian War in the West Gregory Michno,2007 Gregory Michno author of several critically acclaimed books on America s Indian wars gives readers the first comprehensive look at the natives soldiers and settlers who clashed on the high desert of Idaho Nevada Utah Oregon and Northern California in a struggle that over a four year period claimed more lives than any other western Indian War

Rough-Hewn Land Keith Heyer Meldahl, 2013-05 Rough Hewn Land tells the geologic story of the American West the story of its rocks rivers mountains earthquakes and mineral wealth including gold It tells it by taking you on a 1000 mile long field trip across the rough side of the continent from the California coast to the Rocky Mountains This book puts you on the outcrop geologic hammer in hand to explore the evidence for how the spectacular rough hewn lands of the West came to be When North America broke free from Eurasia and Africa some 200 million years ago it triggered a cascade of violent geologic events that shaped the West we see today As the west moving continent crunched across the seabed of the ancient Pacific islands and assorted pieces of ocean floor collected against its prow to build California and plant gold there too Meanwhile mountains squeezed upward from California to Colorado and vast quantities of molten rock seeded the crust with precious metals while spewing volcanic fire across the land Later the land stretched like an accordion to form the washboard like Basin and Range province and Great Basin within it while California began to crackle along the San Andreas fault Throughout the West today a near constant drumroll of earthquakes testifies to a world still reshaping itself in response to the ceaseless movements of the Earth s tectonic plates Rough Hewn Land weaves these stories into the human history of the West As we follow the adventures of John C Fr mont Mark Twain the Donner party and other historic characters we see how geologic forces have shaped human experience just as they direct the fate of the West today

The Genesis of Reno

Jack Harpster, 2016-09-13 Over 157 years ago before there was a Reno Nevada before there was a state of Nevada and even before there was a Nevada Territory there was a bridge over the Truckee River at a narrow deeply rutted cattle and wagon trail that would one day become Virginia Street There was also a small rustic inn and tavern occupying a plot of ground at the southern end of the log and timber bridge catering to thirsty cowboys drovers and miners The inn and the bridge were the first two structures in what would one day be a bustling metropolitan area and to this day they still form the nucleus of the city The Genesis of Reno traces their history up to the present day The 111 year old concrete bridge that was replaced in 2016 by a magnificent new structure was honored for its longevity and unique character with placement on the National Register of Historic Places in 1980

Nevada Michael S. Green, 2015-03-23 Nevada A History of the Silver State has been named a CHOICE Outstanding Title Michael S Green a leading Nevada historian provides a detailed survey of the Silver

State's past from the arrival of the early European explorers to the predominance of mining in the 1800s to the rise of world class tourism in the twentieth century and to more recent attempts to diversify the economy. Of the numerous themes central to Green's analysis of Nevada's history, luck plays a significant role in the state's growth. The miners and gamblers who first visited the state all bet on luck. Today the biggest contributor to Nevada's tourist economy, gaming, still relies on that same belief in luck. Nevada's financial system has generally been based on a one industry economy: first mining and more recently gaming. Green delves deeply into the limitations of this structure while also exploring the theme of exploitation of the land and the overuse of the state's natural resources. Green covers many more aspects of the Silver State's narrative including the dominance of one region of the state over another, political forces and corruption, and the citizens' often tumultuous relationship with the federal government. The book will appeal to scholars, students, and other readers interested in Nevada history.

Sacrifice Zones Steve Lerner, 2012-09-21. The stories of residents of low income communities across the country who took action when pollution from heavy industry contaminated their towns. Across the United States thousands of people, most of them in low income or minority communities, live next to heavily polluting industrial sites. Many of them reach a point at which they say, "Enough is enough." After living for years with poisoned air and water, contaminated soil, and pollution-related health problems, they start to take action: organizing, speaking up, documenting the effects of pollution on their neighborhoods. In *Sacrifice Zones*, Steve Lerner tells the stories of twelve communities from Brooklyn to Pensacola that rose up to fight the industries and military bases causing disproportionately high levels of chemical pollution. He calls these low income neighborhoods "sacrifice zones." And he argues that residents of these sacrifice zones, tainted with chemical pollutants, need additional regulatory protections. *Sacrifice Zones* goes beyond the disheartening statistics and gives us the voices of the residents themselves, offering compelling portraits of accidental activists who have become grassroots leaders in the struggle for environmental justice and details the successful tactics they have used on the fence line with heavy industry.
