Feathers Of Death:

The Feathers of Death Simon Raven, 1972 **The Feathers of Death (Valancourt 20th Century Classics)** Simon Raven, 2018-05-29 When Lieutenant Alastair Lynch shoots young Drummer Malcolm Harley in the back for desertion in the face of an enemy attack his action seems to be clearly justified by military precedent But after a court martial is convened to examine the facts of the case a different story emerges A tale of passionate love possessiveness and jealousy between the two men a brazen and scandalous relationship that ended in Harley s violent death The tension builds as the truth about the two men s liaison and Lynch s decision to pull the trigger gradually emerges leading to a shocking finale Simon Raven s classic first novel *The Feathers of Death* 1959 is a gripping thriller told in the clever witty and compulsively readable style for which Raven is known This edition features a new introduction by Gregory Woods One of the finest novelists of the post war years the most entertaining of writers a novelist of supreme merit Charles Spencer *The Telegraph* Extraordinary entertaining gripping and in fact memorable *Sunday Times* An exceptional gift for storytelling told with a narrative verve so rare those with the stomach for a tough and ugly tale will find it enthralling *The Times* London *Feather, a Child's Death and Life* Robert Peters, 1997 With great tenderness poet and critic Robert Peters recalls the brief life and sudden death of his son Richard a four year old called Feather by his sister Meredith and brother Rob Feather returns home ill one day from nursery school spends the afternoon in bed with his father and his stuffed toy seal and dies that evening Looking back after decades on that February day in 1960 when the skinned knees colds and fevers of childhood were obliterated by the unthinkable fatal meningitis Peters sees with harrowing clarity the image of that little boy in the tugboat pajamas lying still on a gurney one bare foot visible at the edge of the sheet He recalls his anger his confusion What shall I do with my hands Feather *A Child's Death and Life* is an album of poetic and sometimes visceral snapshots portraits of a family a house a strained marriage a father reading poems to his children a young academic struggling to establish himself Peters catches his family in moments of almost transcendent joy and crushing grief The children s happiness on Christmas morning in summer at a Canadian lake or ice skating is shadowed by lessons in accepting death a succession of pet turtles mice and goldfish succumb Dad butchers the Thanksgiving turkey nicknamed Gobble in the snowy backyard The fourth book in Robert Peters series of memoirs *Feather* not only illuminates the lives of father and child but also reflects a moment in the life of a writer as Peters grief for his son finds expression in his first collection of poetry *Songs for a Son* *The Death of Aztec Tenochtitlan, the Life of Mexico City* Barbara E. Mundy, 2018-03-22 Winner Book Prize in Latin American Studies Colonial Section of Latin American Studies Association LASA 2016 ALAA Book Award Association for Latin American Art Arvey Foundation 2016 The capital of the Aztec empire Tenochtitlan was in its era one of the largest cities in the world Built on an island in the middle of a shallow lake its population numbered perhaps 150 000 with another 350 000 people in the urban network clustered around the lake shores In 1521 at the height of Tenochtitlan s power which extended over much of Central Mexico Hernando Cort s and his

followers conquered the city Cortés boasted to King Charles V of Spain that Tenochtitlan was destroyed and razed to the ground. But was it? Drawing on period representations of the city in sculptures, texts, and maps, *The Death of Aztec Tenochtitlan: The Life of Mexico City* builds a convincing case that this global capital remained through the sixteenth century very much an Amerindian city. Barbara E. Mundy foregrounds the role the city's indigenous peoples, the Nahuas, played in shaping Mexico City through the construction of permanent architecture and engagement in ceremonial actions. She demonstrates that the Aztec ruling elites, who retained power even after the conquest, were instrumental in building and then rebuilding the city. Mundy shows how the Nahuas entered into mutually advantageous alliances with the Franciscans to maintain the city's sacred nodes. She also focuses on the practical and symbolic role of the city's extraordinary waterworks, the product of a massive ecological manipulation begun in the fifteenth century, to reveal how the Nahuas struggled to maintain control of water resources in early Mexico City.

The Feathers of Death, 1997. *The Metaphysics of Death* John Martin Fischer, 1993. This collection of seventeen essays deals with the metaphysical as opposed to the moral issues pertaining to death. For example, the authors investigate among other things the issue of what makes death a bad thing for an individual if indeed death is a bad thing. This issue is more basic and abstract than such moral questions as the particular conditions under which euthanasia is justified if it is ever justified. Though there are important connections between the more abstract questions addressed in this book and many contemporary moral issues such as euthanasia, suicide, and abortion, the primary focus of this book is on metaphysical issues concerning the nature of death. What is the nature of the harm or bad involved in death? If it is not pain, what is it, and how can it be bad? Who is the subject of the harm or bad if the person is no longer alive? how can he be the subject of the bad? And if he is not the subject, who is? Can one have harm with no subject? When does the harm take place? Can a harm take place after its subject ceases to exist? If death harms a person, can the harm take place before the death occurs? If death can be a bad thing, would immortality be a desirable alternative? This family of questions helps to frame the puzzle of why and how death is bad. Other subjects addressed include the Epicurean view that death is not a misfortune for the person who dies, the nature of misfortune and benefit, the meaningfulness and value of life, and the distinction between the life of a person and the life of a living creature who is not a person. There is an extensive bibliography that includes science fiction treatments of death and immortality.

Dying and Death in 18th-21st Century Europe Marius Rotar, 2011-07-12. This book features a selection of the most representative papers presented during the international conference *Dying and Death in 18th-21st Century Europe* (ABDD). It invites you on a fascinating journey across the last three centuries of Europe with death as your guide. The past and present realities of the complex phenomena of death and dying in Romania, the United Kingdom, Bulgaria, Serbia, the Czech Republic, the Netherlands, and Italy are dealt with by authors from varying backgrounds: historians, sociologists, priests, humanists, anthropologists, and doctors. This is yet more proof that death as a topic cannot be confined to one science; the deciphering of its meanings and of the shifts in its effects requiring a joint
