Conference on Electro-Rheological Fluids and Magneto-Rheological Suspensions Rongjia Tao, 2000

Electrorheological ER and magnetorheological MR fluids which can be transformed from the liquid state into the solid state in milliseconds by applying an electric or a magnetic field are smart fluids having the potential to revolutionize several industrial sectors. The Seventh International Conference on Electrorheological Fluids and Magnetorheological Suspensions took place at a time when some MR and ER applications were beginning to appear on the market making a notable impact on industries. Scientists and engineers in multidisciplinary areas came together to explore the state of the art technology and identify thrust areas to be focused on. This volume of proceedings collects contributions from most leading experts in the field. It reviews the most recent MR and ER applications, discusses the materials technology, explores the basic science research on ER and MR fluids and examines the novel properties of these fluids. It provides the most up to date and probably the best information about the area. It can serve as a stimulating and valuable reference for research workers and students in materials science, condensed matter physics, engineering and chemistry. The valuable information not only reports on the leading edge of research and applications but also provides an overview of the field. **Electro-rheological Fluids And Magneto-rheological Suspensions - Proceedings Of The 12th International Conference** Rongjia Tao, 2011-05-26

This unique volume presents the scientific progress, state of art technology and thrust areas to be focused in electrorheology ER and magnetorheology MR. In the last couple of years this area produced significant impacts on automobile industry, bridge and building construction, aerospace industry and defense industry. Recent innovation in this area led to new technology which has great impact on energy production and energy conservation. This book includes all papers presented at the 12th International Conference on ER Fluids and MR Suspensions held in Philadelphia USA August 16 to 20 2010 providing a comprehensive overview of this flourishing area. It is an essential source of reference for chemists, engineers, physicists and materials scientists. It is also suitable for science and engineering students.
