A Bibliography on National Income Accounting in China Rebecca A. Hatch, 1986 *The World of Economics* John Eatwell, Murray Milgate, Peter Newman, 1991-05-13 What are the central questions of economics and how do economists tackle them This book aims to answer these questions in 100 essays written by economists and selected from The New Palgrave A Dictionary of Economics It shows how economists deal with issues ranging from trade to taxation **Emergency Management of the National Economy: Volume II: Basic Economics Refresher Notes** Industrial College of the Armed Forces, 2024-08-23 The Industrial College of the Armed Forces was established to prepare selected officers of the Armed Forces both Regular and Reserve and civilian executives for important managerial positions in time of emergency Instruction is provided in three forms 1 resident 2 correspondence and 3 traveling lecture teams The base for all three types of instruction is the same **National Saving and Economic Performance** John B. Shoven, B. Douglas Bernheim, 2009-02-15 The past decade has witnessed a decline in saving throughout the developed world the United States has the dubious distinction of leading the way The consequences can be serious For individuals their own economic security and that of their families is jeopardized For society inadequate rates of saving have been blamed for a variety of ills decreasing the competitive abilities of American industry slowing capital accumulation increasing our trade deficit and forcing the sale of capital stock to foreign investors at bargain prices Restoring acceptable rates of saving in the United States poses a major challenge to those who formulate national economic policy especially since economists and policymakers alike still understand little about what motivates people to save In *National Saving and Economic Performance* edited by B Douglas Bernheim and John B Shoven that task is addressed by offering the results of new research with recommendations for policies aimed to improve saving Leading experts in diverse fields of economics debate the need for more accurate measurement of official saving data examine how corporate decisions to retain or distribute earnings affect household level consumption and saving and investigate the effects of taxation on saving behavior correlations between national saving and international investment over time and the influence of economic growth on saving Presenting the most comprehensive and up to date research on saving this volume will benefit both academic and government economists The Penguin History of Economics Roger E Backhouse, 2002-01-31 The definitive guide to the history of economic thought fully revised twenty years after first publication Roger Backhouse s definitive guide takes the story of economic thinking from the ancient world to the present day with a brand new chapter on the twenty first century and updates throughout to reflect the latest scholarship

Covering topics including globalisation inequality financial crises and the environment Backhouse brings his breadth of expertise and a contemporary lens to this original and insightful exploration of economics revealing how we got to where we are today **Applied Intermediate Macroeconomics** Kevin D. Universal Basic Income in Historical Perspective Peter Sloman,Daniel Zamora Vargas,Pedro Ramos

Pinto,2021-11-19 This new edited collection brings together historians and social scientists to engage with the global history of Universal Basic Income UBI and offer historically rich perspectives on contemporary debates about the future of work In particular the book goes beyond a genealogy of a seemingly utopian idea to explore how the meaning and reception of basic income proposals has changed over time The study of UBI provides a prism through which we can understand how different intellectual traditions political agents and policy problems have opened up space for new thinking about work and welfare at critical moments Contributions range broadly across time and space from Milton Friedman and the debate over guaranteed income in the post war United States to the emergence of the European basic income movement in the 1980s and the politics of cash transfers in contemporary South Africa Taken together these chapters address comparative questions why do proposals for a guaranteed minimum income emerge at some times and recede into the background in others What kinds of problems is basic income designed to solve and how have policy proposals been shaped by changing attitudes to gender roles and the boundaries of social citizenship What role have transnational networks played in carrying UBI proposals between the global north and the global south and how does the politics of basic income vary between these contexts In short the book builds on a growing body of scholarship on UBI and lays the groundwork for a much richer understanding of the history of this radical proposal Chapter 3 is available open access under a Creative Commons Attribution 4 0 International License via link [springer.com](https://www.springer.com) [Index Numbers in Economic Theory and Practice](#) R. G. D. Allen,2017-07-12 There is no book currently

available that gives a comprehensive treatment of the design construction and use of index numbers However there is a pressing need for one in view of the increasing and more sophisticated employment of index numbers in the whole range of applied economics and specifically in discussions of macroeconomic policy In this book R G D Allen meets this need in simple and consistent terms and with comprehensive coverage The text begins with an elementary survey of the index number problem before turning to more detailed treatments of the theory and practice of index numbers The binary case in which one time period is compared with another is first developed and illustrated with numerous examples This is to prepare the ground for the central part of the text on runs of index numbers Particular attention is paid both to fixed weighted and to chain forms as used in a wide range of published index numbers taken mainly from British official sources This work deals with some further problems in the construction of index numbers problems which are both troublesome and largely unresolved These include the use of sampling techniques in index number design and the theoretical and practical treatment

of quality changes It is also devoted to a number of detailed and specific applications of index number techniques to problems ranging from national income accounting through the measurement of inequality of incomes and international comparisons of real incomes to the use of index numbers of stock market prices Aimed primarily at students of economics whatever their age and range of interests this work will also be of use to those who handle index numbers professionally
