Developing and Supporting Teachers for Science Education in the Middle Years Susan Loucks-Horsley, 1990

The Practice of Constructivism in Science Education Kenneth G. Tobin, 2012-11-12 This volume provides a needed elaboration of theories and potential applications of constructivism in

science education Although the term constructivism is used widely there has been a dearth of materials to guide science educators concerning the potential of constructivism to influence what is done in the field In fact there has been a tendency for constructivism to be viewed as a method that can be used in a classroom This view tends to diminish the power of constructivism as a way of thinking about education and in particular about science education The chapters in this book address the need to document the theoretical roots of constructivism and to describe how practitioners have applied constructivist oriented beliefs in the practice of K 12 teaching of science and mathematics as well as teacher education Not only does this book contain different theoretical perspectives on constructivism but it also features a chapter that critiques constructivism as an epistemology Specific topics covered include cooperative learning the negotiation of meaning problem centered learning social construction of knowledge science in culturally diverse settings curriculum planning and implementation and instructional technology Issues associated with the preparation and enhancement of science teachers and the reform of science education are also explored *Office of Educational Research and Improvement Bulletin* ,1990

It's Elementary! Elementary Grades Task Force Report DIANE Publishing Company,1996-02 Focuses on the changing school population changing expectations for the elementary school and the changing view of how children learn Primarily designed to be used as a road map for the school team of teachers parents and administrators this report points the way for elementary education reform to help bring a rich and rigorous education to all students One of the most significant statements on the reform and restructuring of elementary education in the U S Award Winner Over 100 000 copies sold
