clat de cette littérature morale française de la seconde moitié du XVII^e siècle. Telles sont les questions auxquelles cet essai s'attache et prendra pour base *Composition, non-composition* Jacques Lucan, 2009-01-01. En architecture composer signifie concevoir un bâtiment selon des principes de régularité et d'harmonie ou selon des principes de mise en équilibre. Toutefois ce n'est qu'à partir du XIX^e siècle que la composition devient véritablement la conception architecturale notamment grâce à Jean Nicolas Louis Durand et son noncement de la Marche suivre dans la composition d'un projet quelconque. Le concept se répand rapidement au cours du XX^e siècle l'adoption de dispositifs architecturaux neutres le recours des processus agrégatifs le développement d'opérations objectives constituant autant de tentatives de dépassement des principes compositionnels. C'est cette histoire indite des théories architecturales qui invite à *Composition non composition*. L'ouvrage permet de comprendre les enjeux d'attitudes qui souvent se opposent à l'effacement de certaines conceptions l'émergence de nouvelles et il donne des clés de lecture originales pour comprendre l'architecture contemporaine. Il constitue ce titre une référence didactique pour les étudiants en architecture ainsi que pour tous les architectes et historiens concernés.
