**Elements of Shona (Zezuru Dialect)** George Fortune,1957      **Social Motivations for Codeswitching** Carol Myers-Scotton,1993 Codeswitching may be broadly defined as the use of two or more linguistic varieties in the same conversation Using data from multilingual African context Carol Myers Scotton advances a theoretical argument which aims at a general explanation of the motivations underlying the phenomenon She treats codeswitching as a type of skilled performance not as the alternative strategy of a person who cannot carry on a conversation in the language in which it began Speakers exploit the socio psychological values associated with different linguistic varieties in a particular speech community by switching codes speakers negotiate a change in social distance between themselves and other participants in a conversation Switching between languages has much in common with making stylistic choices within the same language it is as if bilingual and multilingual speakers have an additional style at their command when they engage in codeswitching \_

*Languages and Education in Africa* Birgit Brock-Utne,Ingse Skattum,2009-05-11 The theme of this book cuts across disciplines Contributors to this volume are specialized in education and especially classroom research as well as in linguistics most being transdisciplinary themselves Around 65 sub Saharan languages figure in this volume as research objects as means of instruction in connection with teacher training language policy lexical development harmonization efforts information technology oral literature and deaf communities The co existence of these African languages with English French and Arabic is examined as well This wide range of languages and subjects builds on recent field work giving new empirical evidence from 17 countries Botswana Ethiopia Ghana Kenya Madagascar Malawi Mali Mozambique Niger Nigeria Senegal South Africa Swaziland Tanzania Uganda Zambia and Zimbabwe as well as to transnational matters like the harmonization of African transborder languages As the Editors a Norwegian social scientist and a Norwegian linguist both working in Africa have wanted to give room for African voices the majority of contributions to this volume come from Africa

A Resource Handbook for African Languages ,1986      *Creole Languages and Linguistic Typology* Parth Bhatt,Tonjes Veenstra,2013-12-15 It is generally assumed that Creole languages form a separate category from the rest of the world s languages The papers in this volume written by internationally renowned scholars in the field of Creole studies seek to explore more deeply this commonly held assumption by comparing the linguistic properties of specific Creole languages to each other and also to non Creole languages Using a variety of methodological and analytical approaches the contributions to this volume show that the linguistic classification of Creole languages continues to be a topic of intense debate that requires the re examination of the premises of linguistic typology What is the linguistic motivation for considering that languages are related or unrelated How and why do common linguistic properties arise Are Creoles indeed exceptional This volume examines these questions and provides a strong foundation for continued research into the phonological morphological syntactic and semantic features found in Creole languages Most of these articles were previously published in the Journal of

Pidgin and Creole Languages 26 1 2011 The article by Jeff Good was previously published in the Journal of Pidgin and Creole Languages 27 1 2012 The Shona and Ndebele of Southern Rhodesia Hilda Kuper,A. Kula,Jochen Zeller,2025-08-19 This volume brings together leading scholars from Africa Europe the Americas and beyond to provide a detailed account of the languages of the Bantu family which cover an area from Cameroon and Kenya in the north to South Africa in the south The Bantu family

is part of the Niger Congo phylum and one of the world's biggest language groups comprising around 500 languages. The family includes major languages with large numbers of speakers such as Zulu, Kinyarwanda and Swahili the most widely spoken and taught African language as well as many community languages and several endangered languages. Bantu languages feature prominently in the complex and multilingual language ecologies that are characteristic of the linguistic situation in much of Africa and they provide rich evidence for the study of theoretical and comparative linguistics, language contact and language change. They play an important role in education, commerce, culture and artistic expression in the media and public discourse in governance and social justice and are central to the future of the continent and the well-being of its communities. The first part of *The Oxford Guide to the Bantu Languages* provides background and context with chapters exploring the history of research in the field, language and prehistory in Bantu speaking Africa and typology and variation. Chapters in the second part offer broad comparative overviews of Bantu phonology, morphology, syntax, semantics and pragmatics, socio and applied linguistics before Parts III–VII cover more specific topics in Bantu linguistics across a variety of subfields ranging from structural issues such as the augment and melodic tone to historical and sociolinguistic topics such as Bantu languages in the diaspora and language policy and standardization. The chapters in the final part offer individual structural overviews of a range of languages from across the Bantu speaking area. The book will be an essential resource for students and researchers specializing in the Bantu languages and for typologists and comparative linguists more broadly.

Vowel Epenthesis in Loanword Adaptation Christian Uffmann, 2012-02-14 While it is commonly assumed that languages epenthese free default vowels, this book shows that in loanword adaptation several strategies are found which interact intricately. Large loanword corpora in Shona, Sranan, Samoan and Kinyarwanda are analyzed statistically and the patterns are modeled in a version of Optimality Theory which introduces constraints on autosegmental representations. The focus of this book is on English loans in Shona providing an in-depth empirical and formal analysis of epenthesis in this language. The analysis of additional languages allows for solid typological generalizations. In addition a diachronic study of epenthesis in Sranan provides insight into how insertion patterns develop historically. In all languages analyzed default epenthesis exists alongside vowel harmony and spreading from adjacent consonants. While different languages prefer different strategies, these strategies are subject to the same set of constraints however. In spreading feature markedness plays an important role alongside sonority. We suggest universal markedness scales which combine with constraints on autosegmental configurations to model the patterns found in individual languages and at the same time to constrain the range of possible crosslinguistic variation.

Paul's Ethics of Reconciliation in Dialogue with Ndebele and Shona Ethnic Cohesion Gusha, Ishanesu Sextus, 2022-09-21 The tension between the Ndebele and Shona people dates back to the pre-colonial era and this has been one of the major threats to Zimbabwe's peace. The book proposes Paul's ethics of reconciliation in the Corinthian correspondence as inspiration for social cohesion between the Ndebele and Shona tribes. The volume

deploys Pauline key symbols Christ the Cross of Christ Ambassador New Creation and Baptism as epistemological lenses in promoting identity tags that go beyond ethnicity For these symbols to be effective the author proposes setting up of the Truth and Reconciliation Commission TRC refraining from using ethnic offensive language introduction of Ndebele and Shona languages in schools substituting ethnic provincial names with neutral ones substituting ethnic registration system of people with a neutral one and the devolution of power     Language Contact and Language Conflict Unn Røyneland,1997
