Elephant Dilemma:

The Elephant's Dilemma Jon Bostock, 2020-08-04 You know the moments of inspiration that come out of nowhere Maybe it's an idea for a product that will change people's lives or a way to solve a conflict No matter the epiphany this surge of excitement is often as fleeting as the good ideas we abandon too quickly But what if we took a chance What if we used our momentum to see our ideas through Our ancestors used their ideas for change They took big risks to improve the lives of future generations doing whatever it took with few alternatives Now it's our turn to take the risks and change the world but we're comfortable and complacent even when we shouldn't be In *The Elephant's Dilemma* Jon Bostock shares how he took a chance with his fascinating story of business success He shows how we're chained to our current reality and what can happen when we break free and reimagine our future His book is an urgent battle cry asking us to step forward live a more fulfilled life and leave a legacy for future generations

Biodiversity Conservation and Environmental Change Lindsey Gillson,2015-04-09

Ecosystems today are dynamic and complex leaving conservationists faced with the paradox of conserving moving targets New approaches to conservation are now required that aim to conserve ecological function and process rather than attempt to protect static snapshots of biodiversity To do this effectively long term information on ecosystem variability and resilience is needed While there is a wealth of such information in palaeoecology archaeology and historical ecology it remains an underused resource by conservation ecologists In bringing together the disciplines of neo and palaeoecology and integrating

them with conservation biology this novel text illustrates how an understanding of long term change in ecosystems can in turn inform and influence their conservation and management in the Anthropocene By looking at the history of traditional management climate change disturbance and land use the book describes how a long term perspective on landscape change can inform current and pressing conservation questions such as whether elephants should be culled how best to manage fire and whether ecosystems can or should be re wilded Biodiversity Conservation and Environmental Change is suitable for senior undergraduate and post graduate students in conservation ecology palaeoecology biodiversity conservation landscape ecology environmental change and natural resource management It will also be of relevance and use to a global market of conservation practitioners researchers educators and policy makers [Catalog of Copyright Entries.
