Ways Illa Podendorf,1978 Discusses the characteristics of a representative sample from the world s wide variety of animals and plants The Lost Wolves of Japan Brett L. Walker,2009-11-23 Many Japanese once revered the wolf as Oguchi no Magami or Large Mouthed Pure God but as Japan began its modern transformation wolves lost their otherworldly status and became noxious animals that needed to be killed By 1905 they had disappeared from the country In this spirited and absorbing narrative Brett Walker takes a deep look at the scientific cultural and environmental dimensions of wolf extinction in Japan and tracks changing attitudes toward nature through Japan s long history Grain farmers once worshiped wolves at shrines and left food offerings near their dens beseeching the elusive canine to protect their crops from the sharp hooves and voracious appetites of wild boars and deer Talismans and charms adorned with images of wolves protected against fire disease and other calamities and brought fertility to agrarian communities and to couples hoping to have children The Ainu people believed that they were born from the union of a wolflike creature and a goddess In the eighteenth century wolves were seen as rabid man killers in many parts of Japan Highly ritualized wolf hunts were instigated to cleanse the landscape of what many considered as demons By the nineteenth century however the destruction of wolves had become decidedly unceremonious as seen on the island of Hokkaido Through poisoning hired hunters and a bounty system one of the archipelago s largest carnivores was systematically erased The story of wolf extinction exposes the underside of Japan s modernization Certain wolf scientists still camp out in Japan to listen for any trace of the elusive canines The quiet they experience reminds us of the profound silence that awaits all humanity when as the Japanese priest Kenko taught almost seven centuries ago we look on fellow sentient creatures without feeling compassion The Library of Pioneering and Woodcraft: Wild animal ways Ernest Thompson Seton,1916 **Humans, Animals, Machines** Glen A.
