Elephants In The Distance:

Elephants in the Distance Daniel Stashower, 1989 Paul Galliard is a magician by training and heredity his father died performing the Bullet Catch an infamous trick that over the centuries has claimed the lives of more than a dozen magicians A pragmatist Paul confines his conjuring to commercials he shows up often on TV screens demonstrating the magical power of some brand of household cleanser Then he gets a call A producer wants to do a show highlighting his father's old cronies those grizzled vets of the glory days of TV magic acts Their top hats are moth eaten their rabbits have arthritis but they're desperate for one last shot at the limelight Paul would like to give it to them these fellows all but raised him But there's a catch a Bullet Catch to be precise Either Paul does the trick that killed his father or the show doesn't go on Stashower works powerful magic of the literary kind this is a model whodunit expertly constructed and executed with real finesse New York Times

The Amboseli Elephants Cynthia Moss, Harvey Croze, Phyllis C. Lee, 2011-03-15 Elephants have fascinated humans for millennia Aristotle wrote of them with awe and Hannibal used them in warfare This book is the summation of what's been learned from the Amboseli Elephant Research Project AERP the longest continuously running elephant research project in the world

Measuring the Universe Kitty Ferguson, 2013-01-31 Suppose you and I still wondered whether all of the pinpoints of light in the night sky are the same distance from us Suppose none of our contemporaries could tell us whether the Sun orbits the Earth or vice versa or even how large the Earth is Suppose no one had guessed there are mathematical laws underlying the motions of the heavens How would how did anyone begin to discover these numbers and these relationships without leaving the Earth What made anyone

even think it was possible to find out how far without going there In Measuring the Universe we join our ancestors and contemporary scientists as they tease this information out of a sky full of stars Some of the questions have turned out to be loaded and a great deal besides mathematics and astronomy has gone into answering them Politics religion philosophy and personal ambition all have played roles in this drama There are poignant personal stories of people like Copernicus Kepler Newton Herschel and Hubble Today scientists are attempting to determine the distance to objects near the borders of the observable universe far beyond anything that can be seen with the naked eye in the night sky and to measure time back to its origin The numbers are too enormous to comprehend Nevertheless generations of curious people have figured them out one resourceful step at a time Progress has owed as much to raw ingenuity as to technology and frontier inventiveness is still not out of date

Animal Seed Dispersal: An Ecosystem Service in Crisis Anna Traveset, Haldre S. Rogers, Isabel Donoso, Evan Fricke, 2022-08-11

Elephants and Savanna Woodland Ecosystems Christina Skarpe, Johan T. du Toit, Stein R. Moe, 2014-04-02 During the nineteenth century ivory hunting caused a substantial decrease of elephant numbers in southern Africa Soon after that populations of many other large and medium sized herbivores went into steep decline due to the rinderpest pandemic in the 1890s These two events provided an opportunity for woodland establishment in areas previously intensively utilized by elephants and other herbivores The return of elephants to currently protected areas of their former range has greatly influenced vegetation locally and the resulting potential negative effects on biodiversity are causing concern among stakeholders managers and scientists This book focuses on the ecological effects of the increasing elephant population in northern Botswana presenting the importance of the elephants for the heterogeneity of the system and showing that elephant ecology involves much wider spatiotemporal scales than was previously thought Drawing on the results of their research the authors discuss elephant caused effects on vegetation in nutrient rich and nutrient poor savannas and the potential competition between elephants on the one hand and browsers and mixed feeders on the other Ultimately this text provides a comprehensive review of ecological processes in African savannas covering long term ecosystem changes and human wildlife conflicts It summarises new knowledge on the ecology of the sub humid African savanna ecosystems to advance the general functional understanding of savanna ecosystems across moisture and nutrient gradients

Introduction to Statistical Investigations Nathan Tintle, Beth L. Chance, George W. Cobb, Allan J. Rossman, Soma Roy, Todd Swanson, Jill VanderStoep, 2020-09-16 Introduction to Statistical Investigations Second Edition provides a unified framework for explaining variation across study designs and variable types helping students increase their statistical literacy and appreciate the indispensable role of statistics in scientific research Requiring only basic algebra as a prerequisite the program uses the immersive simulation based inference approach for which the author team is known Students engage with various aspects of data collection and analysis using real data and clear explanations designed to strengthen multivariable understanding and reinforce concepts Each chapter follows a coherent six step statistical exploration and investigation

method ask a research question design a study explore the data draw inferences formulate conclusions and look back and ahead enabling students to assess a variety of concepts in a single assignment Challenging questions based on research articles strengthen critical reading skills fully worked examples demonstrate essential concepts and methods and engaging visualizations illustrate key themes of explained variation The end of chapter investigations expose students to various applications of statistics in the real world using real data from popular culture and published research studies in variety of disciplines Accompanying examples throughout the text user friendly applets enable students to conduct the simulations and analyses covered in the book Perceiving in Depth, Volume 3: Other Mechanisms of Depth Perception Ian P.

Howard,2012-01-27 The three volume work Perceiving in Depth is a sequel to Binocular Vision and Stereopsis and to Seeing in Depth both by Ian P Howard and Brian J Rogers This work is much broader in scope than the previous books and includes mechanisms of depth perception by all senses including aural electrosensory organs and the somatosensory system Volume 1 reviews sensory coding psychophysical and analytic procedures and basic visual mechanisms Volume 2 reviews stereoscopic vision Volume 3 reviews all mechanisms of depth perception other than stereoscopic vision The three volumes are extensively illustrated and referenced and provide the most detailed review of all aspects of perceiving the three dimensional world Volume 3 addresses all depth perception mechanisms other than stereopsis The book starts with an account of monocular cues to depth including accommodation vergence eye movements perspective interposition shading and motion parallax A chapter on constancies in depth perception such as the ability to perceive the sizes and shapes of objects as they move or rotate in depth is followed by a chapter on the ways in which depth cues interact The next chapter reviews sources of information such as changing disparity image looming and vergence eye movements used in the perception of objects moving in depth Various pathologies of depth perception including visual neglect stereoanomalies and albinism are reviewed Visual depth perception mechanisms through the animal kingdom are described starting with insects and progressing through crustaceans fish amphibians reptiles birds and mammals The chapter includes a discussion of how stereoscopic vision may have evolved The next chapter describes how visual depth perception is used to guide reaching movements of the hand avoiding obstacles and walking to a distant object The next three chapters review non visual mechanisms of depth perception Auditory mechanisms include auditory localization echolocation in bats and marine mammals and the lateral line system of fish Some fish emit electric discharges and then use electric sense organs to detect distortions of the electric field produced by nearby objects Some beetles and snakes use heat sensitive sense organs to detect sources of heat The volume ends with a discussion of mechanisms used by animals to navigate to a distant site Ants find their way back to the nest by using landmarks and by integrating their walking movements Several animals navigate by the stars or by polarized sunlight It seems that animals in several phyla navigate by detecting the Earths magnetic field **The ^ALiving Elephants** Raman Sukumar,2003-09-11 This book pulls together the available information on both Indian and African elephants synthesizing

the biology ecology behavior evolution and conservation of elephants and covering the history of human interactions with elephants There is no other braod treatment of the subject **African Ungulates** Walter Leuthold,2012-12-06 This book has been written mostly within sight of wild African ungulates at the research center in Tsavo East National Park V oi Kenya While this had many positive aspects there were also a few drawbacks The main one of these is the fact that Voi is not exactly at the hub of scientific activity even if we restrict ourselves to African ungulates Thus whereas I had felt initially that I was sufficiently familiar with ethological work on these animals to write a useful review it soon became woefully evident that this assumption was erroneous Over the last few years studies on African ungulates have pro liferated and results are being published in journals almost all over the world My location in East Africa was sometimes less than ideal with respect to access to the most recent literature and I depended to a considerable extent on the goodwill of colleagues in giving or lending me relevant papers I am happy to report that I received a great deal of support and cooperation in this respect Nevertheless I may have over looked some important papers inadvertently their authors should not feel slighted by such omissions which only reflect availability of literature to me Readers may also notice a considerable geographical bias in favor of East Africa at the expense of other African regions particularly South Africa Elephant management Robert (Bob) Scholes,Kathleen G Mennell,2008-03-01 Elephants are among the most magnificent but also most problematic members of South Africa s wildlife population While they are sought after by South African and foreign tourists alike they also have a major impact on their environment As a result elephant management has become a highly complex and often controversial discipline The information needed to underpin vital decisions about elephant management has largely been unavailable to decision makers contested by experts or simply unknown As a result the South African Minister for Environmental Affairs and Tourism convened a round table to advise him on this issue The round table recommended that a scientific assessment of elephant management be undertaken to gather evaluate and present all the relevant information on this topic Its main findings and recommendations are contained in this volume Elephant Management is the first book of its kind combining the work of more than 60 national and international experts Extensively reviewed by policy makers and other stakeholders it is the most systematic and comprehensive review of savanna elephant populations and factors relevant to managing them to date As such it is of interest to a broad spectrum of readers in South Africa and elsewhere Above all it is aimed at helping conservation policy makers and practitioners to choose the best possible options for the sustainable preservation of these iconic animals *Advances in Signal Processing and Intelligent Recognition Systems* Sabu M. Thampi,Sri Krishnan,Rajesh M. Hegde,Domenico Ciuonzo,Thomas Hanne,Jagadeesh Kannan R.,2021-02-06 This book constitutes the refereed proceedings of the 6th International Symposium on Advances in Signal Processing and Intelligent Recognition Systems SIRS 2020 held in Chennai India in October 2020 Due to the COVID 19 pandemic the conference was held online The 22 revised full papers and 5 revised short papers presented were carefully reviewed and selected from 50 submissions The papers cover

wide research fields including information retrieval human computer interaction HCI information extraction speech recognition

Spirit Unleashed Anne Benvenuti, 2014-06-09 In *Spirit Unleashed* Anne Benvenuti uses analysis of real encounters with wild animals to take us on an intellectual tour of our thinking about animals by way of biological sciences scientific psychology philosophy and theology to show that we have been wrong in our understanding of ourselves amongst other animals The good news is that we can correct our course and make ourselves happier in the process Drawing us into encounters with a desert rattlesnake an offended bonobo an injured fawn a curious whale a determined woodpecker and others she gives us a glimpse of their souls Benvenuti strongly makes the case that to change the way we think about animals and our way of relating to them holds the possibility of changing all life on Earth for the better

Thirty-Three Ways of Looking at an Elephant Dale Peterson, 2020-10-20 Elephants have captivated the human imagination for as long as they have roamed the earth appearing in writings and cultures from thousands of years ago and still much discussed today In *Thirty Three Ways of Looking at an Elephant* veteran scientific writer Dale Peterson has collected thirty three essential writings about elephants from across history with geographical perspectives ranging from Africa and Southeast Asia to Europe and the United States An introductory headnote for each selection provides additional context and insights from Peterson's substantial knowledge of elephants and natural history The first section of the anthology *Cultural and Classical Elephants* explores the earliest mentions of elephants in African mythology Hindu theology and Aristotle and other ancient Greek texts *Colonial and Industrial Elephants* finds elephants in the crosshairs of colonial exploitation in accounts pulled from memoirs commoditizing African elephants as a source of ivory novel targets for bloodsport and occasional export for circuses and zoos *Working and Performing Elephants* gives firsthand accounts of the often cruel training methods and treatment inflicted on elephants to achieve submission and obedience As elephants became an object of scientific curiosity in the mid twentieth century wildlife biologists explored elephant families and kinship behaviors around sex and love language and self awareness and enhanced communications with sound and smell The pieces featured in *Scientific and Social Elephants* give readers a glimpse into major discoveries in elephant behaviors *Endangered Elephants* points to the future of the elephant whose numbers continue to be ravaged by ivory poachers Peterson concludes with a section on fictional and literary elephants and ends on a hopeful note with the 1967 essay *Dear Elephant Sir* which argues for the moral imperative to save elephants as an act of redemption for their systematic abuse and mistreatment at human hands *Essential to understanding the history and experience of this beloved and misunderstood creature* *Thirty Three Ways of Looking at an Elephant* is a must for any elephant lover or armchair environmentalist

Encyclopedia of Distances Michel Marie Deza, Elena Deza, 2012-10-28 This updated and revised second edition of the leading reference volume on distance metrics includes a wealth of new material that reflects advances in a developing field now regarded as an essential tool in many areas of pure and applied mathematics Its publication coincides with intensifying research efforts into metric spaces and

especially distance design for applications Accurate metrics have become a crucial goal in computational biology image analysis speech recognition and information retrieval The content focuses on providing academics with an invaluable comprehensive listing of the main available distances As well as standalone introductions and definitions the encyclopedia facilitates swift cross referencing with easily navigable bold faced textual links to core entries and includes a wealth of fascinating curiosities that enable non specialists to deploy research tools previously viewed as arcane Its value added context is certain to open novel avenues of research

Wildlife and People Matt J. Walpole, 2003 **The Last Elephants**, 2019-04-09 Amazing photographs of elephants accompany narratives from researchers scientists and conservationists celebrating elephants and calling for their preservation African savanna elephants among the most magnificent and beloved of our fellow mammals are an extraordinary social and intelligent species The Last Elephants an homage to these animals and a clarion call for their preservation is based upon a shocking finding savanna elephant populations across Africa are being decimated with two to three murdered every hour for their ivory Without action these elephants soon will vanish from our world They are a species in imminent danger of extinction and it is up to us to save them Featuring more than 250 full color photos of the breathtaking animals by some of the world s top wildlife photographers The Last Elephants was inspired by the devastating results of the continent wide Great Elephant Census of 2016 undertaken by Elephants without Borders in tandem with the world s most prominent conservation groups The book joins together the voices and vision of scientists lawmakers rangers conservationists and on the ground researchers to speak out against elephant killings to close loopholes in international law that allow the ivory trade to continue and to pay tribute to the thousands who work to protect the animals including African communities who have elected to preserve and protect their elephant neighbors Offering both profiles of preservation plans that work and hope for elephants future this is a must read for everyone concerned for the future of one of Earth s most captivating species

Empires between Islam and Christianity, 1500-1800 Sanjay Subrahmanyam, 2018-12-27 Empires Between Islam and Christianity 1500 1800 uses the innovative approach of connected histories to address a series of questions regarding the early modern world in the Indian Ocean the Mediterranean and the Atlantic The period between 1500 and 1800 was one of intense inter imperial competition involving the Iberians the Ottomans the Mughals the British and other actors Rather than understand these imperial entities separately Sanjay Subrahmanyam reads their archives and texts together to show unexpected connections and refractions He further proposes in this set of closely argued studies that these empires often borrowed from each other or built their projects with knowledge of other competing visions of empire The emphasis on connections is also crucial for an understanding of how a variety of genres of imperial and global history writing developed in the early modern world The book moves creatively between political economic intellectual and cultural themes to suggest a fresh geographical conception for the epoch
