shallow tide of Modernism in the decades after the First World War they have since resurfaced with a new relevance and urgency for twenty first century society Written with the non specialist in mind yet drawing on the rich resources of post millennial scholarship on Elgar as well as geographical studies of place the book also includes many new insights relating to such aspects of Elgar s output as his use of landscape typology in *The Apostles* and his encounter with Modernism in the late chamber music It also calls on the resources of contemporary social commentary poetry and especially English landscape art to place Elgar and his thought in the broader cultural milieu of his time A survey of recent recordings is included in the hope that listeners both familiar and unfamiliar with Elgar s music will feel inspired to embark on a voyage of re discovery of its endlessly rewarding treasures

Understanding Urban Cycling Justin Spinney, 2020-10-28 Academic interest in cycling has burgeoned in recent years with significant literature relating to the health and environmental benefits of cycling the necessity for cycle specific infrastructure and the embodied experiences of cycling Based upon primary research in a variety of contexts such as London Shanghai and Taipei this book demonstrates that recent developments in urban cycling policy and practice are closely linked to broader processes of capital accumulation It argues that cycling is increasingly caught up in discourses around smart cities that emphasise technological solutions to environmental problems and neoliberal ideas on individual responsibility and bio political conduct which only results in solutions that prioritise those who are already mobile Accordingly the central argument of the book is not that the popularisation of cycling is inherently bad but that the manner in which cycling is being popularised gives cause for social and environmental concern Ultimately the book argues that cycling has now become a vehicle for sustaining pro growth agendas rather than subverting them or shifting to sustainable no growth de growth and less technologically driven visions of modernity This book makes an innovative contribution to the fields of Cycling Studies Mobilities and Transport and will be of interest to students and academics working in Human Geography Transport Studies Urban Studies Urban Planning Public Policy Sociology and Sustainability
