The Philippines David Joel Steinberg, 2018-02-19 A unified nation with a single people the Philippines is also a highly fragmented plural society Divided between uplander and lowlander rich and poor Christian and Muslim between those of one ethnic linguistic and geographic region and those of another the nation is a complex mosaic formed by conflicting forces of consensus and national identity and of division and instability It is not possible to comprehend the many changes in the Philippines such as the rise and fall of Ferdinand Marcos or the revolution that toppled him without an awareness of the religious cultural and economic forces that have shaped the history of these islands These forces formed the focus of the first edition of The Philippines Of that 1982 edition the late Benigno Aquino Jr noted that anyone wanting to understand the Philippines and the Filipinos today must include this book in his must reading list The fourth edition has been updated through the final years of the Ramos presidency and contains a new section on the impact of President Estrada

Financing Human Development in Africa, Asia and the Middle East Rob Vos, Marco V. Sánchez, 2014-01-09 How much would poor nations need to invest to eliminate poverty get all children in school and provide adequate basic health care for all Can they afford it Financing Human Development in Africa Asia and the Middle East provides some clear answers to these questions The contributors assess feasible financing strategies underpinning actions to enhance human development in pursuance of the United Nations Millennium Development Goals MDGs The contributors analyse these strategies in the context of broader concerns of economic development in nine countries in Africa Asia and the Middle East The assessments stress the importance of redesigning macroeconomic policies so as to make these more supportive of long term economic growth and employment creation while ensuring sufficient investments in human development in order to end poverty and overcome deep rooted inequalities Post-Development from the Global South Sally Matthews, Alba

Castellsagué, 2025-04-22 Post development advocates and decolonial thinkers are calling for radical alternatives to

development but how do these ideals sit with the day to day reality of marginalised communities struggling with poverty precarity and the deprivation of human rights This book investigates how post development alternatives are being understood and negotiated on the ground in the Global South Indigenous concepts and practices attributed to people in the Global South are seen by post development thinkers as offering transformative alternatives to dominant development models of progress and economic growth For example buen vivir from particular regions of South America points to a culture of life and ubuntu in Southern Africa emphasises human connectedness and mutuality Such terms are associated with social and environmental sustainability and a greater connection to Southern epistemologies Drawing on extensive fieldwork this book takes us directly to Global South communities from around the world to consider the complex ways in which they negotiate the ideas and practices associated with post development and their views on the supposed indigenous alternatives The book encourages a contextual approach that embraces the tensions and contradictions that exist within different communities Taking the reader from abstract post development theory right into the heart of communities directly impacted by development this book will be an important guide for students researchers and practitioners looking for better ways to address the desires and aspirations of marginalised communities in the Global South

State and Finance in the Philippines, 1898-1941 Yoshiko Nagano, 2015-04-20 During the First World War ill advised steps by colonial officials in the Philippines who were responsible for the colony s finances created a crisis which lasted from 1919 until 1922 The circumstances shook the foundations of the American colonial state and contributed to Manuel L Quezon s successful effort to replace Sergio Osme a as leader of the politically dominant Nacionalista Party These events have generally been blamed on a corruption scandal at the Philippine National Bank which had been established in 1916 as a multi purpose semi governmental agency whose purpose was to provide loans for the agricultural export industry to do business as a commercial bank to issue bank notes and to serve as a depository for government funds Based on detailed archival research Yoshiko Nagano argues that the crisis in fact resulted from mismanagement of currency reserves and irregularities in foreign exchange operations by American officials and that the notions of a corruption scandal arose from a colonial discourse that masked problems within the banking and currency systems and the U S colonial administration Her analysis of this episode provides a fresh perspective on the political economy of the Philippines under American rule and suggests a need for further scrutiny of historical accounts written on the basis of reports by colonial officials

State Structure, Policy Formation, and Economic Development in Southeast Asia Antoinette R. Raquiza, 2013-06-17 Why do some small developing countries industrialize and others don t What factors account for different economic performance among states that are vulnerable to external shocks crony capitalism and political instability This book argues that the answer lies in the structuring of state power specifically the way different sets of governing elites political leaders and economic technocrats are embedded in political organisations and state institutions and the way these elites relate to each other in the economic

development policy process Conducting a comparative historical analysis of Thailand and the Philippines the book argues that the institutional settings of governing elites influence economic outcomes In Thailand political power traditionally connects to state institutions in ways that has limited the impact of political turnovers and global downturns conducive to long term industrial activities In contrast Philippine state power derives from family networks that merge social and political power suited to fast moving short term commercial interests In focusing on this political and institutional story the author analyses the current development dilemmas of countries weighed down by historical legacies of unstable regimes dependency and social conflict and how they are likely to develop in the future

Pro-poor Development Policies Hal Hill,Majah-Leah V Ravago,James A. Roumasset,2022-10-03 This collection of essays provides a

wealth of information and analysis about the Philippine economy and the role of agriculture and economic policy in it The Philippine experience has been quite different from the highly successful Asian economies with a long period of low growth until the turn of the century and only then greater success The authors cover not only the Philippine experience but also place it in its Asian context and that of developing countries more generally They report on the lessons learned both positive and negative from the various economic policies that have been adopted with regard to both agriculture and to economic

inequality Those interested in Philippine economic development and Asian development more broadly will find this an important reference work Anne O Krueger Senior Research Professor Johns Hopkins School of Advanced International Studies 1st Deputy Managing Director IMF 2001 6 Vice President of Economics and Research World Bank 1982 86

The Philippine Economy in the 1970's: Prospects and Problems of Development ,1972 **Making World Development Work** Grégoire Leclerc, Charles A. S. Hall, 2007-06-16 The authors reexamine world development usually the province of economists as professionals trained in the natural sciences They show how we have and might use tested scientific and technical procedures and concepts as well as science itself to achieve much better results than what has been characteristic of the past Leclerc and Hall contend that to scholars with a scientific background the process of development and the economic logic behind it often look almost surrealistic The basic question at the foundation of this review is this Why should something so important as world development something capable of absorbing such vast sums of money and of human goodwill something that impacts the people and the environment so much continue to be organized and planned using economic techniques and theories that are both unconfirmed experimentally and proven to have led to development failures
