Emergency Patient Care Prehospital Ground And Air Procedure:

Emergency Patient Care Lenworth M. Jacobs, Barbara R. Bennett, 1983 Injury Epidemiology: Fourth edition Leon S. Robertson, Ph.D., 2015 Research on injuries is a high priority to inform public policy that reduces deaths hospitalizations and associated costs Principles for research design and analysis of injury incidence and severity are emphasized Review of extant surveillance data reveals numerous flaws that must be changed to increase usefulness of the data Research designs of studies of injury causation and evaluation of countermeasures are often inappropriate and mislead analytic and injury control efforts Appendices to chapters illustrate research projects that influenced public policy affecting the reduction of motor vehicle fatalities per population by half in the U S The principles illustrated by these studies can be applied to other types of injury **Injury Epidemiology** Leon Robertson, 2007-07-03 The previous edition of this useful text on epidemiologic methods for studying injuries and evaluating interventions to prevent them provides specific objectives for research in the various stages of injury control planning and implementation including the types of data needed to reach the objectives Using a progressive step by step analysis it illustrates how to pose research questions and design the best research studies to answer those questions This new edition will update all chapters and include new examples of studies The chapters will also be organized into more precise topic areas for ease of reference The chapter on policy analysis would be dissolved and topic treated as part of other chapters **Injury Epidemiology** Leon S. Robertson, 1998 This text provides a comprehensive overview of the epidemiologic methods used to study injuries and evaluate interventions to prevent them The author explains the formation of research questions the sources of reliable and valid data and the selection of research methods The difficulties of applying rates and ratios to the evaluation of programs are discussed as well and the use of economic concepts and policy analysis is covered The Second Edition provides specific objectives for research in the various stages of injury control planning and implementation including the types of data needed to reach the objectives The new edition of Injury Epidemiology is a unique comprehensive guide to this specialized field It will benefit students newcomers and seasoned researchers in the areas of injury prevention injury control and epidemiology *Textbook of Pediatric Emergency Procedures* Fred M.
