Local Government E-disclosure & Comparisons Timothy J. Turner, 2005. In Local Government e Disclosure Comparisons, author Tim Turner proposes an information system to counterbalance the social complexity represented by over 87 000 local governments and their myriad subordinate units. Turner focuses on three critical choices: whether web posted data will sufficiently disclose information to interested stakeholders, whether standards will be uniform across state lines, and whether disclosure systems will be integrated nationally. Under his plan, an e disclosure regimen will populate a federated system of state based electronic repositories, creating a nationwide data warehouse.
