Interactions of Photons and Neutrons with Matter Sow-Hsin Chen, Michael Kotlarchyk, 2007 This invaluable book is based on lecture notes developed for a one semester graduate course entitled Interaction of Radiation with Matter taught in the Department of Nuclear Engineering at the Massachusetts Institute of Technology The main objective of the course is to teach enough quantum and classical radiation theory to allow students in engineering and the applied sciences to understand and have access to the vast literature on applications of ionizing and non ionizing radiation in materials research Besides presenting the fundamental physics of radiation interactions the book devotes individual chapters to some of the important modern day experimental tools such as nuclear magnetic resonance photon correlation spectroscopy and the various types of neutron x ray and light scattering techniques This new edition contains added sections on such subjects as synchrotron radiation neutron spin echo and diffusive wave spectroscopy End of chapter problems have also been added

**Nuclear Radiation Interactions (Second Edition)** Sidney Yip, Mingda Li, 2025-02-10 The urgency to address climate change and the diminishing sustainability of fossil fuels has propelled nuclear energy into the forefront of global energy solutions This advanced textbook aims to provide nuclear science and engineering students with a holistic view and mechanistic understanding on the underlying nuclear physics processes Based on the award winning classes the authors have been teaching to first year graduate students at MIT Nuclear Science and Engineering Department this book aims to equip the next generation nuclear scientists and engineers with the knowledge and insights needed to harness the vast potential of nuclear energy responsibly and innovatively Through the pages of this book students will journey into the heart

of nuclear physics exploring its foundational principles and the recent technological advancements that promise to redefine our energy future Numerous Questions Problems and research project level Capstone Projects are added to facilitate active learning Fundamentals such as quantum mechanics and latest progress such as machine learning and fusion breakthroughs are introduced in a balanced manner Our goal is to provide a thorough grounding in the subject matter preparing students to tackle the challenge on global climate change from a perspective of nuclear radiation interactions
