Elements Neo Natural Botanical:

Elements, 1993 *Elements botanical*, 1989 In Our Element Lindsay Fauntleroy, 2025-08-05 Immerse Yourself in the Wisdom and Healing Power of the Elements All five elements live within you and experiences like heartache anxiety and procrastination are signs that one of them is out of balance This beginner friendly book introduces you to each of the elements Water Wood Fire Earth and Metal and shows you how to use them to improve your mental emotional and spiritual health In Our Element weaves together Eastern medicine Western psychology Indigenous traditions and African ancestral principles of spirituality With a practical approach that incorporates journal prompts flower essences yoga poses and music Lindsay Fauntleroy teaches you how to tap into the five elements for a balanced and empowered life that aligns with your soul's calling The Herbal Power of Orchids Alexander Friesen, Bruno Friesen, 2012-05-01 Orchids are some of the nature's most gorgeous creation The authors try to reveal the treasures and secrets of orchids The book provides the currently available information on ethnomedicine ethnobotany and traditional knowledge It identifies its phytochemical and pharmacological important compounds and discusses the results of experimental preclinical and clinical studies with extracts of orchid species The authors introduce the reader into the chemistry of plant toxins and the major alkaloids synthesized by the biochemistry of orchids TCM uses many orchids as ingredient in their herbal formulation They transfer the indication and results into the nomenclature and terminology of the western medicine in a way easy to read and to understand The authors do not intend to write a scientific book for the scientist but to meet the challenge of a reader interested in herbal orchids who would like to view this subject from different angles eager to discover the secrets of orchids and learn how difficult it is to unlock their treasures We compiled the available up to date knowledge and the opinion of different authors in this field to present a comprehensive over all view of the herbal use of orchids *Plants of Subtropical Eastern Australia* Andrew Benwell, 2020-12-01 Plants of Subtropical Eastern Australia describes the rich flora of this biogeographically distinct region located on the east coast of Australia covering the north coast of New South Wales and coastal South East Queensland This guide presents a selection of common threatened and ecologically significant plants found in the region's major vegetation habitats including rainforest heathland grassy forest wetlands and rock outcrops More than 500 plants are featured with photographs and descriptive features enabling the reader to identify these species if encountered Interesting biological cultural and historical characteristics of each species are included along with notes on the plant's biogeography and a map of its distribution Suitable for anyone with an interest in plant ecology and botany Plants of Subtropical Eastern Australia is the definitive guide to this fascinating region of Australia and its unique flora *Species* John S. Wilkins, 2018-01-29 Over time the complex idea of species has evolved yet its meaning is far from resolved This comprehensive work is a fresh look at an idea central to the field of biology by tracing its history from antiquity to today Species is a benchmark exploration and clarification of a concept fundamental to the past present and future of the natural

sciences In this edition a section is added on the debate over species since the time of the New Synthesis and brings the book up to date A section on recent philosophical debates over species has also been added This edition is better suited non specialists in philosophy so that it will be of greater use for scientists wishing to understand how the notion came to be that living organisms form species Key Selling Features Covers the philosophical and historical development of the concept of species Documents that variation was recognized by pre Darwinian scholars Includes a section on the debates since the time of the New Synthesis Better suited to non philosophers

History's Peru Mark Thurner,2011-02-13 Mark Thurner here offers a brilliant account of Peruvian historiography one that makes a pioneering contribution not only to Latin American studies but also to the history of historical thought at large He traces the contributions of key historians of Peru from the colonial period through the present and teases out the theoretical underpinnings of their approaches He demonstrates how Peruvian historical thought critiques both European history and Anglophone postcolonial theory And his deeply informed readings of Peru s most influential historians from Inca Garcilaso de la Vega to Jorge Basadre are among the most subtle and powerful available in English

Plant Evolution in the Mediterranean John D. Thompson,2020-08-21 Since the first edition of this book published in 2005 there has been an immense amount of new and fascinating work on the history ecology and evolution of the Mediterranean flora During this time human impacts have continued to increase dramatically significantly influencing both the ecology and evolution of the region s biota This timely and comprehensive update of the original text integrates a diverse and scattered literature to produce a synthetic account of Mediterranean plant evolutionary ecology It maintains the accessible style of its previous version whilst incorporating recent work in a new structural framework This is not a traditional plant science book per se but a novel integration of history ecology biogeography and evolution all set in the context of a dramatically increasing human footprint There is a particular emphasis on the role of human activities as an ecological factor and their subsequent impact on plant evolution Conversely it demonstrates how an understanding of the evolutionary ecology of the region s flora can be used to provide insights into its future conservation and management *Plant Evolution in the Mediterranean* is aimed at all those who are interested in the biology of the Mediterranean region whether it is taxonomy ecology evolution conservation policy and management or the regional history of its biodiversity in general It will be of relevance and use to all graduate students and researchers of Mediterranean type ecosystem ecology and geography as well as professional ecologists evolutionary biologists conservation biologists and environmental practitioners requiring a concise authoritative overview of the topic
