Elusive Quest Accountability In Hospitals:

The Elusive Quest Carolyn L. Wiener, Wiener Research Sociologist School of Nursing U of California examines the large oversight apparatus that has been established to promote hospital accountability and the arena that has developed around it comprised of consultants measurement experts researchers software developers and numerous others

The Gold Standard Stefan Timmermans, Marc Berg, 2010 The first book to explore the effects of dramatic changes in the delivery of medical care

Life and Death in Intensive Care Joan Cassell, 2005 A penetrating look at the values systems and life and death dramas in the world of the surgical intensive care unit

Theory and Method in Socio-Legal Research Reza Banakar, Max Travers, 2005-12-19 Socio legal researchers increasingly recognise the need to employ a wide variety of methods in studying law and legal phenomena and the need to be informed by an understanding of debates about theory and method in mainstream social science The papers in this volume illustrate how a range of topics including EU law ombudsmen judges lawyers Shariah Councils and the quality assurance industry can be researched from a socio legal perspective The objective of the collection is to show how different methods can be used in researching law and legal phenomena how methodological issues and debates in sociology are relevant to the study of law and the importance of the debate between structural and action traditions in researching law It also approaches the methodological problem of how sociology of law can address the content of legal practice from a variety of perspectives and discusses the relationship between pure and applied research The editors provide a critical introduction to each of the six sections and a general introduction on law sociology and method The collection will provide an invaluable resource for socio legal researchers law school researchers and postgraduates

Cancer Patients, Cancer Pathways C. Timmermann, E. Toon, 2012-10-10 Eleven essays by historians and sociologists examine cancer research and treatment as everyday practice in post war Europe and North America These are not stories of inevitable medical progress and obstacles overcome but of historical contingencies cultural differences hope and often disappointed expectations

Abortion, Motherhood, and Mental Health Ellie Lee, Whatever reproductive choices women make whether they opt to end a pregnancy through abortion or continue to term and give birth they are considered to be at risk of suffering serious mental health problems According to opponents of abortion in the United States potential injury to women is a major reason why people should consider abortion a problem On the other hand becoming a mother can also be considered a big risk This fine well balanced book is about how people represent the results of reproductive choices It examines how and why pregnancy and its various outcomes have come to be discussed this way The author's interest in the medicalization of reproduction its representation as a mental health problem first arose in relation to abortion There is a very clear contrast between the construction of women who have abortions implied by moralized argument against abortion and the construction that results when the case against abortion focuses on its effects on women's mental health Lee argues that claims that connect abortion with mental illness have been limited in their influence but this is

not to suggest that they have not become a focus for discussion and have had no impact The limits to such claims about abortion do not by any means suggest limits to the process of the medicalization of pregnancy more broadly that is a process of demedicalization The final theme of Ellie Lee's book is the selective medicalization of reproduction Centering on the claim that abortion can create a post abortion syndrome the author examines the medicalization of the abortion problem on both sides of the Atlantic Lee points to contrasts in legal and medical dimensions of the abortion issue that make for some important differences but argues that in both the United States and Great Britain the post abortion syndrome claim constitutes an example of the limits to medicalization and the return to the theme of motherhood as a psychological ordeal Lee makes the case for looking to the social dimensions of mental health problems to account for and understand debates about what makes women ill Ellie Lee is research fellow in the Department of Sociology and Social Policy University of Southampton Highfield United Kingdom Managing Change Ewan Ferlie, Susanne Boch Waldorff, Anne Reff

Living with Alzheimer's Renée L. Beard, 2016-04-26 News of Alzheimer s disease is

constantly in the headlines Every day we hear heart wrenching stories of people caring for a loved one who has become a shell of their former self of projections about rising incidence rates and of cures that are just around the corner However we don't see or hear from the people who actually have the disease In *Living with Alzheimer's* Renée L. Beard argues that the exclusively negative portrayals of Alzheimer's are grossly inaccurate To understand what life with memory loss is really like Beard draws on intensive observations of nearly 100 seniors undergoing cognitive evaluation as well as post diagnosis interviews with individuals experiencing late in life forgetfulness Since we all forget sometimes seniors with an Alzheimer's diagnosis ultimately need to be socialized into medicalized interpretations of their forgetfulness In daily life people with the disease are forced to manage stigma and the presumption of incompetence on top of the actual symptoms of their ailment The well meaning public and not their dementia becomes the major barrier to a happy life for those affected Beard also examines how these perceptions affect treatment for Alzheimer's Interviews with clinicians and staff from the Alzheimer's Association reveal that despite the best of intentions pejorative framings of life with dementia fuel both clinical practice and advocacy efforts These professionals perpetuate narratives about self loss impending cures and the economic and emotional burden to families and society even if they do not personally believe them Yet Beard also concludes that in spite of these trends most of the diagnosed individuals in her study achieve a graceful balance between accepting the medical label and resisting the social stigma that accompanies it In stark contrast to the messages we receive this book provides an unprecedented view into the ways that people with early Alzheimer's actively and deliberately navigate their lives

Managing to Care Ann E. P. Dill, The point of departure for *Managing to Care* is widespread concern that the present delivery of health and social welfare services is fragmented uncoordinated inefficient costly wasteful and ultimately detrimental to clients health and wellbeing Dill traces the evolution of case management from its start as a tool for integrating services on the level of the individual client to its current role as a force behind the most significant trends in health care Those trends include the entrenchment of bureaucracy the challenges of once dominant professions and the rise of corporate control The author's purpose in adopting this analysis is to invite further scrutiny of the case management profession and at the same time to identify new possibilities for its application This volume brings together thoughts developed over many years of observing and participating in case management programs It provides a multilayered perspective of case management showing linkages among its social and historical contexts and the ways it is practiced today in diverse service settings The author emerged convinced about the essential need for care coordination and that present ways of providing care can work against our highest objectives in doing so The paradoxes and contraindications embedded in case management practice became a major theme of the book *Managing to Care* is highly critical of the ways case management has come to absorb and reflect the organizational flaws of the very service systems it was intended to reform Too often management of the case comes to dominate care The author does not call for a rejection of professional systems in

favor of a resurrected informal community While much can and should be done to strengthen our ties to one another there will always be people whose problems require more expert help Dill argues here that case management can provide such help and provide it well but only if it is grounded in the human dimension of a caring relationship Ann E P Dill associate professor of sociology and gender studies at Brown University is a medical sociologist and social gerontologist Her research examines issues affecting the long term provision of health care and social services both in the United States and in countries formerly part of Yugoslavia *Handbook of Symbolic Interactionism* Larry T. Reynolds, Nancy J. Herman-Kinney, 2003 Symbolic interactionism has a long history in sociology social psychology and related social sciences In this volume the editors and contributors explain its history major theoretical tenets and concepts methods of doing symbolic interactionist work and its uses and findings in a host of substantive research areas **The Institution of Science and the Science of Institutions** Marcel Herbst, 2013-10-02 The present anthology edited by Marcel Herbst is partially based on a conference held in 2009 to reflect on the legacy of Ben David and contains a selection of substantially revised papers plus four contributions specifically written for this volume The book focuses on three major lines of Ben David's research namely Center and Periphery Part I Role and Ethos Part II and Organization and Growth Part III In addition comprehensive introductory Prologue and concluding chapters Epilogue Part IV by Marcel Herbst are provided The volume addresses the following disciplines higher education history and sociology of science philosophy of science history of medicine public administration policy studies Jewish studies and economics The anthology is one of two new publications on Joseph Ben David after the special Minerva edition Vol 25 Numbers 1 2 March 1987 and Gad Freudenthal's collection of Ben David's writings 1991 The text can be used in graduate studies it addresses higher education professionals or public officials and serves as a gateway to researchers in the field of higher education science studies or policy sciences *Seasons Such As These* Cynthia J. Bogard, 2003 Homelessness had become a social problem that was primarily not about solving the nation's housing crisis The pressing question becomes How and why did homelessness become the social problem in its own right one that was only tangentially related to the problem of inappropriate or insufficient housing Why when people demanded that something be done about homelessness did they get specific policies and unintended outcomes Cynthia Bogard is not content with the shorthand answers that rested on bias and ideology such as conservative politics bred conservative policies or American individualism precludes government investment in housing This did not explain homelessness sufficiently especially given all the advocacy and research that had occurred in the 1980s and 1990s Examining these claimsmaking activities as constructionists call them however is a daunting task because the activities engaged in by people in the attempt to persuade others are fluid subtle and complicated as are the responses to these social actions This raised a second set of issues that the author is concerned with How can we adequately represent and sociologically examine this very complicated human activity of social problems construction Who does the construction and to what effect Bogard's answer to these questions is a book

that can be read in two ways and on multiple levels For those who are interested in the story of the career of homelessness as a social problem in America s two national cities the book should be read from the beginning through the conclusion as a straight narrative The technical matter in the appendix can be ignored But for those readers with an interest in social problems constructionism however this book is meant as a cook book of sorts Each chapter emphasizes a feature of constructionism such as an important group of claims makers or an important aspect of the claims making process The work highlights a major feature in advanced societies the intersection of interests and claims Social constructions may be real but they are comprised of no less real social interests The work marks a real departure and advance over the original formulations of construction theory in social research Cynthia J Bogard is associate professor of sociology at Hofstra University

The Fight Against Big Tobacco Mark Wolfson, 2017-07-12 Tobacco control leaders were extremely proud of the movement s achievements in the state of Minnesota In sharing their perspectives and experiences with Mark Wolfson they found a way of making sure that the story would get told His training in social movements had given him an appreciation of the importance of understanding the social infrastructure on which movements are built and Minnesota had built heavily on the infrastructure of health care and public health What became apparent is that the struggle against the tobacco industry in Minnesota involved a close collaborative relationship between government or state actors and the leaders of the tobacco control movement Wolfson develops both of these themes building on the infrastructure of health and state movement interpenetration to understand the emergence growth and outcomes of the tobacco control movement in Minnesota He focuses on the advantages and constraints associated with these two related themes He goes beyond the case study method to assess the generalizability of the pattern and whether the same sort of movement can be used by other states in North America and even in other countries and their social movements How has the tobacco control movement become such a significant and successful force in shaping public policy social norms and the habits of millions of Americans In this first such detailed study by a sociologist Wolfson documents how the movement has grown over nearly three decades by building an infrastructure of health organizations and health professionals and by fostering relationships with government Rich in survey data extensive interviews and archival sources this text is essential reading for courses in social problems social movements and public health The general reader will also find it engaging given the issues of tobacco use as an addiction and a social problem
