### **Manifesto for New Social Movements**

César Augusto Rossatto, 2019-10-01 The world is currently witnessing the emergence of a new context for education labor and transformative social movements Global flows of people capital and energy increasingly define the world we live in The multinational corporation with its pursuit of ever cheaper sources of labor and materials and its disregard for human life is

the dominant form of economic organization where capital can cross borders but people can't. Affirmative action, democracy, and human rights are moving in from the margins to challenge capitalist priorities of efficiency, i.e., exploitation. In some places, the representatives of popular movements are actually taking the reins of state power. Across the globe, new progressive movements are emerging to bridge national identities and boundaries in solidarity with transnational class, gender, and ethnic struggles. At this juncture, educators have a key role to play. The ideology of market competition has become more entrenched in schools even as opportunities for skilled employment diminish. We must rethink the relationship between schooling and labor, developing transnational pedagogies that draw upon the myriad social struggles shaping students' lives and communities. Critical educators need to connect with other social movements to put a radically democratic agenda based on the principles of equity, access, and emancipation at the center of educational praxis. Many countries in Latin America, like in other continents, are developing new alternatives for the reconstruction of social projects; these emerging sources of hope are the central focus of this book.

Major historical change always starts with people's social movement. Democracy can be one of the best political and social systems in the world, but for it to work entails the sustainable participation of citizens. Above all, it requires that people be informed and critically educated, since the quality of democracy depends on the quality of education. There are 2 kinds of power: money and people. If people exercise their agency, they can be more powerful than money. There are some organizing principles of social movements as don't do for others what they should do for themselves. Saul Alinsky wrote *Rules for Radicals*, a pragmatic primer for realistic radicals. Mary Rogers Cold's *Anger: A story of faith and power politics*, Michael Gecan's *Going Public: An organizer's guide to citizen action*, and Ernesto Cortez's *Industrial Area Foundation* are all great sources for organized activism that do work. I put some of these principles to the test, and they produced positive results. I was a founder and president of a union at my university, and I lived my whole life as an activist and learned that we can do more together than alone. Now we also have a new digital war with the Cambridge Analytica and Breitbart's fake news manipulation; however, we also have social justice hacktivism to counteract it, as well as other democratic social media venues that critical thinkers and activists use. The chapters in this book demonstrate the importance of widening and diversifying social movements at the same time, emphasizing the need to build cohesive alliances among all the different fronts. What some people think is impossible can become a transformed reality for those who dare attempt changing the world as global citizens.

*Moravian Americans and their Neighbors, 1772-1822* Ulrike Wiethaus, Grant McAllister, 2022-11-28. *American Moravians and their Neighbors 1772-1822* edited by Ulrike Wiethaus and Grant McAllister offers an interdisciplinary examination of Moravian Americanization in the Early Republic. With an eye toward the communities that surrounded Moravian settlements in the Southeast, the contributors examine cultural, social, religious, and artistic practices of exchange and imposition framed by emergent political structures that encased social privilege and marginalization. Through their multidisciplinary approach, the authors convincingly argue that Moravians

encouraged assimilation converged with core values and political forces of the Early Republic but also contributed uniquely Moravian innovations Residual newly dominant and increasingly subjugated discourses among Moravians other European settlers Indigenous nations and free and enslaved communities of color established the foundations of a new Moravian American identity Contributors include Craig D Atwood David Bergstone David Blum Stewart Carter Martha B Hartley Geoffrey R Hughes Winelle Kirton Roberts Grant P McAllister Thomas J McCullough Paul Peucker Charles D Rodenbough John Ruddiman Jon F Sensbach Larry E Tise Riddick Weber and Ulrike Wiethaus BIBLICAL RESISTANCE

Anglicanism can be seen as irredeemably English. In this book, Kevin Ward questions that assumption. He explores the character of the African, Asian, Oceanic, Caribbean, and Latin American churches, which are now a majority in the world-wide communion, and shows how they are decisively shaping what it means to be Anglican. While emphasising the importance of colonialism and neo-colonialism for explaining the globalisation of Anglicanism, Ward does not focus predominantly on the Churches of Britain and North America, nor does he privilege the idea of Anglicanism as an expansion of English Christianity. At a time when Anglicanism faces the danger of dissolution, Ward explores the historically deep roots of non-Western forms of Anglicanism and the importance of the diversity and flexibility which has so far enabled Anglicanism to develop cohesive yet multiform identities around the world.
