Hayes,2007-12-26 The classic medical text known as Gray's Anatomy is one of the most famous books ever written Now on the 150th anniversary of its publication acclaimed science writer and master of narrative nonfiction Bill Hayes has written the fascinating never before told true story of how this seminal volume came to be A blend of history science culture and Hayes's own personal experiences The Anatomist is this author's most accomplished and affecting work to date With passion and wit Hayes explores the significance of Gray's Anatomy and explains why it came to symbolize a turning point in medical history But he does much much more Uncovering a treasure trove of forgotten letters and diaries he illuminates the astonishing relationship between the fiercely gifted young anatomist Henry Gray and his younger collaborator H V Carter whose exquisite anatomical illustrations are masterpieces of art and close observation Tracing the triumphs and tragedies of these two extraordinary men Hayes brings an equally extraordinary era the mid 1800s unforgettably to life But the journey Hayes takes us on is not only outward but inward through the blood and tissue and organs of the human body for The Anatomist chronicles Hayes's year as a student of classical gross anatomy performing with his own hands the dissections and examinations detailed by Henry Gray 150 years ago As Hayes's acquaintance with death deepens he finds his understanding and appreciation of life deepening in unexpected and profoundly moving ways The Anatomist is more than just the story of a book It is the story of the human body a story whose beginning and end we all know and share but that like all great stories is infinitely rich in between Death in the Middle Ages and Early Modern Times Albrecht Classen,2016-04-11 Death is not only the final moment of life it also casts a huge shadow on human society at large People throughout time have had to cope with death as an existential experience and this also of course in the premodern world The contributors to the present volume examine the material and spiritual conditions of the culture of death studying specific buildings and spaces literary works and art objects theatrical performances and medical tracts from the early Middle Ages to the late eighteenth century Death has always evoked fear terror and awe it has puzzled and troubled people forcing theologians and philosophers to respond and provide answers for questions that seem to evade real explanations The more we learn about the culture of death the more we can comprehend the culture of life As this volume demonstrates the approaches to death varied widely also in the Middle Ages and the early modern age This volume hence adds a significant number of new facets to the critical examination of this ever present phenomenon of death exploring poetic responses to the Black Death types of execution of a female murderess death as the springboard for major political changes and death reflected in morality plays and art Handbook of Forensic Medicine Burkhard Madea,2022-08-16 Der Goldstandard unter den Referenzwerken der Rechtsmedizin In der zweiten Auflage des Handbook of Forensic Medicine vermittelt der Herausgeber Burkhard Madea der Leserschaft einen umfassenden

The Deritualization of Death

Charles Lynn Gibson, 2019-10-15. The problematic field of investigation for this study was for the care of bereaved human beings in the context of significant cultural shifts now shaping the twenty-first century. Deritualization was identified as a significant interdisciplinary concern that contributes to potential distress in processes of grieving. The objective of the research was the development of a practical theology of compassionate caregiving for the bereaved with deference to the problem of deritualization. The theoretical framework was guided by the Oxford Interdisciplinary Research model and the Loyola Institute of Ministries model of practical theology. The study was designed for applied research for funeral directors and vocational pastors utilizing qualitative research methods. Hermeneutical and empirical components addressed six research questions through two domains of inquiry: disciplinary perspectives and educational dynamics of bereavement caregiving. Using the method of hermeneutics to critically evaluate the first two research questions, three disciplinary fields of knowledge were examined and integrated from the perspective of pastoral care, funeral service, bereavement psychology, and practical theology. Each discipline individually converged upon meaningful caregiving, meaning reconstruction, and meaning reframing as significant modes of bereavement care. Using ethnographic, semi-structured interviews to critically evaluate the remaining four research questions, data were collected from a Christian university and a mortuary college. The interview questionnaire included twenty-five main questions organized in four parts: Philosophy of Education, Hermeneutics of Bereaved

Families Care of Bereaved Families and Encounter of Bereaved Families The study utilized two cycles of qualitative coding techniques to report the findings of each participating school A hybrid form of in vivo and holistic coding as well as a second cycle of pattern coding distilled the interview responses into actionable statements that reinforced bereavement caregiving By synthesizing all of the findings a compelling case was made for a paradigm of comforting presence supported by principles from a Louwian perspective of practical theology including theological anthropology promissiotherapy bipolarity and hermeneutics The study connected a philosophy of meaning reframing and a paradigm of comforting presence to a meta theoretical framework within a narrative approach to care The research elucidated an interdisciplinary understanding that contributed toward a compassionate practical theology of caregiving for the bereaved
