The Business of Densification Gabriela Debrunner, 2023-12-31 Affordable housing shortage and social exclusion have become severe societal problems across the globe Increasing numbers of people are suffering from social eviction and displacement due to urban densification modernization rising rents and intense housing commodification Vulnerable resident groups such as old aged or

households with children who often live in old housing stocks planned to be densified renovated or upgraded with higher rents are forced to leave the urban core centers because they can no longer afford to live in central locations or because they experience unstable or insecure housing conditions A scenario that is highly unsustainable So far studies on densification have mainly considered the process as technological architectural or design based problem e g Kytt et al 2013 Broitman Bibby et al 2018 However systematic knowledge on how to implement densification objectives sustainably regarding economic environmental and social aspects is still lacking This book tackles this gap by analyzing densification from a governance perspective Its point of departure is that densification per se does not necessarily lead to sustainable outcomes in terms of social inclusion cohesion or community stability Rather it politicizes densification by neglecting how the process is planned implemented and governed by the actors involved The book applies an actors centered neoinstitutionalist political ecology approach to reveal the specific objectives and strategies of actors involved as well as the socio political structures i e rules laws and policies that govern densification Four Swiss in depth empirical qualitative case studies Zurich Basel K niz and Kloten illustrate the political and legal conditions for success or failure for un sustainable implementations of densification Ultimately this book advises stakeholders governments urban practitioners and academics on more effective community oriented collective and de commodified forms of governance to respond to the needs of the public at large rather than simply catering to private individuals and firms Such governance initiatives entail active municipal land policy approaches outside a purely market based investment logic that not only limit but also work with property rights This is an open access book

Small and Medium-Sized Enterprise (SME) Resilience Susanne Durst, Thomas Henschel, 2024-03-18 Small and medium sized enterprises SMEs are considered particularly vulnerable to crisis situations due to their limited assets and resources as well as their great dependency on local customers Holistic risk management is critical to the development of resilience in organizations This book explores this situation by addressing risk management for SMEs holistically with a focus on continuous learning and the development of dynamic capabilities to increase resilience It provides a broad overview of crisis risk situations and their possible treatment in theory and practice discussed from different resilience perspectives Featuring contributions from carefully selected experts this book explores different types of small businesses and sectors to map the diversity and complexity of small business resilience practices It not only helps SMEs facilitate rapid recovery from crises but it also helps managers and professionals look to the future of their business with success by providing them with unique comparative research Spatial Transformation Milad Abassiharofteh, Jessica Baier, Angelina Göb, Insa

Thimm, Andreas Eberth, Falco Knaps, Vilja Larjosto, Fabiana Zebner, 2022 What can be understood by spatial transformation how does it manifest itself and what are the characteristics of transformation processes This Research Report addresses these questions and presents current research projects and approaches from an academic and practical planning perspective A central point of reference is the concept of a Great Transformation which stems from an expert report by the German

Advisory Council on Global Change WBGU It outlines the profound changes in the economy and society towards sustainability that will become necessary in the future describing them as a Great Transformation Likewise social upheavals also manifest themselves in space enabling spatial changes to be understood as spatial transformations However on a detailed level it remains unclear what is to be understood by spatial transformation processes and how they manifest themselves Against the background of this need for further research this Research Report addresses concrete issues in the research and shaping of spatial transformation processes The aim is to systematise the largely unordered or disordered knowledge of spatial transformation processes and to contribute to a common understanding of the associated concepts which can form the basis for further research and for the steering of these processes The articles on the following topics show how spatial and social transformation processes are mutually dependent and what opportunities and challenges inter and transdisciplinary research designs can offer in this context Perspectives on transformation processes Social and settlement structures in change Regional development and innovation Transformation processes in the so called Global South New challenges for planning processes and stakeholders Research on transformation The contributions to theoretical methodological and practical approaches are intended to stimulate a critical discussion on spatial transformation that is open to new interdisciplinary perspectives

Handbook of Transdisciplinary Research Gertrude Hirsch Hadorn, Holger Hoffmann-Riem, Susette Biber-Klemm, Walter Grossenbacher-Mansuy, Dominique Joye, Christian Pohl, Urs Wiesmann, Elisabeth Zemp, 2007-12-15 Transdisciplinary Research TR is an emerging field in the knowledge society for relating science and policy in addressing issues such as new technologies migration and public health This handbook provides a structured overview of the manifold experiences gained in these fields In the first part 21 projects from all over the world present their research approaches In the second part cross cutting challenges of TR are discussed in reference to the same projects

Transdisciplinary Higher Education Paul Gibbs, 2017-05-23 This book is not just about thinking or acting in transdisciplinary ways but about being transdisciplinary To achieve this requires a deconstruction of our current way of acting within the definition of being that others impose upon us Transdisciplinarity is a phenomenological perspective of reality and its manifestation in the world in which we exist The volume develops a widely based transdisciplinary understanding of the issues faced by higher education institutions and those who work within and with these institutions to educate professionals It incorporates international contributions from organisational theory anthropologists historians psychologists social sciences philosophers and practitioners to create a volume that makes an important and distinct contribution to the literature on higher education and professional practice Transdisciplinarity provides one of our greatest challenges in higher education both to the way it is organized and to the nature of the curriculum This book is an important contribution to the debate about its implications Higher education is being challenged by the nature of knowledge and how it is organized the world is transdisciplinary but our institutions are constrained by the disciplines This book contributes to the

important debates about the challenges transdisciplinarity provides to our institutions Professor David Boud Emeritus
