Embodying Democracy Electoral System Design In Post Communist Europe:

Embodying Democracy S. Birch, F. Millard, M. Popescu, K. Williams, 2002-10-04 *Embodying Democracy* analyzes the politics of electoral reform in eight post communist states including Poland Hungary the Czech Republic Slovakia Romania Bulgaria Russia and Ukraine By exploring the multiple factors that shaped the design of electoral institutions during the first ten years of post communist transition it accounts for an important element of the post communist reform process and illuminates general features of institutional design in post transition states *The SAGE Handbook of Comparative Politics* Todd Landman, Neil Robinson, 2009-06-16 *The SAGE Handbook of Comparative Politics* presents in one volume an authoritative overview of the theoretical methodological and substantive elements of comparative political science The 28 specially commissioned chapters written by renowned comparative scholars guide the reader through the central issues and debates presenting a state of the art guide to the past present and possible futures of the field **Electoral Systems and Political Transformation in Post-Communist Europe** S. Birch, 2003-11-25 *Electoral Systems and Political Transformation in Post Communist Europe* assesses the influence of electoral systems on political change in 20 post communist European states The main finding is that electoral institutions have systematic effects on the formation of representative structures Party enabling aspects of electoral laws such as list proportional representation tend to foster popular inclusion in politics and institutionalized party systems whereas politician enabling rules such as single member districts and ballots that allow voters to select individuals often favour the development of weakly structured systems and high levels of popular exclusion from the representative process **Institutional Design and Party Government in Post-communist Europe** Csaba Nikolenyi, 2014 This book examines the institutional foundations of coalition government in the ten post communist democracies of Eastern and Central Europe for the 1990-2010 period Bulgaria the Czech Republic Estonia Hungary Latvia Lithuania Poland Romania Slovakia and Slovenia Its central argument is that differences in the arrangement of political institutions systematically explain variations in patterns of multi party government across these states The book starts with the premise that electoral systems and constitutional provisions about the powers the structure and the relationship between parliament and the presidency determine the degree to which political power is dispersed or concentrated in the political system On the basis of these institutional features three groups of states are distinguished with regard to their degree of power concentration the substantive chapters of the book demonstrate how these institutional combinations and differences shape three specific facets of party government which capture the main stages of the lifecycle of coalitions governments the formation of electoral coalitions government formation and government duration Specifically three comparative chapters assess the impact of institutional power concentration on the size of electoral coalitions the likelihood that political parties form a minority government and the number of days that a government lasts in office The main finding of the book is that power concentration matters political parties in those democracies where institutions are designed to concentrate political

power tend to form large electoral coalitions they tend to form majority rather than undersized governments and they build more durable cabinets In addition the book contains a detailed case study of government formation in Hungary and a previously unstudied comparison of indirect presidential elections in four states the Czech Republic Estonia Hungary and Latvia Comparative Politics is a series for students teachers and researchers of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.ecprnet.eu

Structural Origins of Post-Yugoslav Regimes Valentina Petrović, 2024-09-16 This analysis of the Yugoslav democratisation process explains the variation of regime outcomes within a structuralist framework Focusing on the post socialist world it goes beyond ethnicity and elite agency to bring the role of class and the state into discussions of third wave democracies Offering an in depth study of four post Yugoslav cases and relying on extensive field work it examines how civil society state structures and elite agency influence the trajectories of Croatia North Macedonia Serbia and Slovenia after the end of socialism The analysis also considers the impact of the European Union on domestic conditions The author argues that no single factor explains the occurrence of democracy It is instead the result of the combination of an autonomous civil society a non captured state and ruling elites willing to implement democratic reforms Concomitant with this the analysis provides evidence that the only sufficient condition for the occurrence of democracy is non captured state structures State capacity therefore plays a central role in democratisation This book will be of interest to scholars and students of Eastern Europe Southeastern Europe the EU and democratisation as well as to policymakers and nongovernmental organisations

Evaluation of Fifteen Years of Constitutional Practice in Central and Eastern Europe Council of Europe, European Commission for Democracy through Law, 2005-01-01 This publication contains the papers presented at the UniDem seminar held in Warsaw 19 20 November 2004 A decade and a half after the democratic transition in the countries of central and eastern Europe the European Commission for Democracy through Law Venice Commission marked its fifteen years of existence by looking back over this period of institutional upheaval The Warsaw seminar which inaugurated the work of the Polish chairmanship of the Committee of Ministers of the Council of Europe viewed these fifteen years of change in the light of constitutional practice Thus two basic approaches were adopted the role of the executive in this practice and the influence of electoral systems in institutional change The papers and discussions in Warsaw brought together specialists from very different backgrounds Marking a convergence between constitutional law and electoral law this conference retraced fifteen years over which the outlines of powers have gradually taken shape Depending on the state the executive has moved towards a presidential semi presidential or parliamentary form of government with a trend towards the latter two During this period electoral systems underwent major changes sometimes dictated by general interest and sometimes responding to partisan demands In all institutions the electoral systems have kept pace with

constitutional practice and change and have thus led progressively towards honest and genuine choices for citizens

Coalition Governance in Central Eastern Europe Torbjörn Bergman, Gabriella Ilonszki, Wolfgang C.

Müller, 2019-12-12 Coalition government among different political parties is the way most European democracies are governed. Traditionally the study of coalition politics has been focused on Western Europe. Coalition governance in Central Eastern Europe brings the study of the full coalition life cycle to a region that has undergone tremendous political transformation but which has not been studied from this perspective. The volume covers Bulgaria, Estonia, the Czech Republic, Latvia, Lithuania, Hungary, Poland, Romania, Slovakia, and Slovenia. It provides information and analyses of the coalition life cycle from pre-electoral alliances to coalition formation and portfolio distribution, governing in coalitions, the stages that eventually lead to government termination, and the electoral performance of coalition parties. In Central Eastern Europe few single party cabinets form and there have been only a few early elections. The evidence provided shows that coalition partners in the region write formal agreements, coalition agreements to an extent that is similar to the patterns that we find in Western Europe, but also that they adhere less closely to these contracts. While the research on Western Europe tends to stress that coalition partners emphasize coalition compromise and mutual supervision, there is more evidence of ministerial government by individual ministers and their parties. There are also some systems where coalition governance is heavily dominated by the prime minister. No previous study has covered the full coalition life cycle in all of the ten countries with as much detail. Systematic information is presented in 10 figures and in more than one hundred tables. Comparative Politics is a series for researchers, teachers, and students of political science that deals with contemporary government and politics. Global in scope, books in the series are characterised by a stress on comparative analysis and strong methodological rigour. The series is published in association with the European Consortium for Political Research. For more information visit www.ecpr.net. The series is edited by Emilie van Haute, Professor of Political Science, Université libre de Bruxelles; Ferdinand Müller-Rommel, Director of the Center for the Study of Democracy, Leuphana University; and Susan Scarrow John and Rebecca Moores, Professor of Political Science, University of Houston.

Political Transitions in Dominant Party Systems Joseph

Wong, Edward Friedman, 2008-10-27 Using country specific case studies, top rank analysts in the field focus on the lessons that dominant parties might learn from losing and the adaptations they consequently make in order to survive, to remain competitive, or to ultimately regain power.

Preferential Voting Systems Gianluca Passarelli, 2019-07-30 This book examines the effects of preferential voting on intraparty electoral competition and voting behavior. Using data covering 19 countries and over 200 elections, this study sheds light on a somewhat neglected aspect of electoral systems. The author demonstrates that the ability of voters to influence the selection and deselection of MPs under preferential voting systems is not as important as is often assumed. Instead, their ability to shape the election of a given candidate depends heavily on the balance between party power and voter power. In this way, this book advances the understanding of the effect of preferential

voting on intra party dynamics parliamentary turnover and voter behavior Based on a rigorous data led methodological approach the book contributes to both the theory and practice of the study of electoral systems and should be read by scholars students and practitioners interested in preferential voting systems Developments in Central and East European Politics 3 Stephen White,Judy Batt,Paul G. Lewis,2003 **Understanding Electoral Reform** Reuven Hazan,Monique Leyenaar,2014-06-03 The field of elections and electoral systems and particularly electoral reform has exhibited tremendous growth and cross national appeal over the last two decades However beyond an increased knowledge of voting rules and their consequences for political representation little attention has been devoted to the question of why electoral systems have recently undergone substantial change in several liberal democracies This book addresses several new approaches to electoral reform First the scope of the study of electoral reform has been expanded Second contrary to previous studies of electoral reform the conviction that the determinants of reform can be explained by one single approach has been replaced by a belief in a more comprehensive framework for analysis Third we move beyond political parties acting in parliament and government as the most significant source of electoral reform Fourth a focus on the determinants of electoral reform allows us to include motivations and objectives of electoral reform A final advancement in the study of electoral reform is the inclusion of countries other than established democracies This book was published as a special issue of West European Politics *Democratic Elections in Poland, 1991-2007* Frances Millard,2009-10-16 This book offers a detailed electoral perspective on Poland s political development since 1991 charting the problematic development of electoral processes and political parties in the context of post authoritarian change It constitutes a comparative benchmark for analysis of democratic developments elsewhere **Developments in Central and East European Politics 4** Stephen White,Judy Batt,Paul G. Lewis,2007 The face of Central and Eastern Europe has been dramatically transformed since the collapse of communism The region faces new challenges including the needs to find a balance between effective leadership and accountability and to reverse the economic decline of the late communist years Addressing these concerns and others Developments in Central and East European Politics 4 brings together specially commissioned chapters by leading scholars from both sides of the Atlantic The chapters all of which are new to this edition focus on key features of the political systems that have emerged following the transition to postcommunist rule and the enlargement of the European Union through 2006 Full attention is given to the pattern of events in individual nations but the main emphasis is on the framework of politics across the region constitutions leadership parliaments parties and electoral systems and the process of politics as it is revealed in political participation civil society economic change and the quality of democratic government within and beyond the region Clearly written and well supported with references and suggestions for further reading Developments in Central and East European Politics 4 is the ideal guide to the process of change in a group of states that were formerly modeled on the Soviet Union but are now a distinctive and varied presence within a continent that has been redefining its boundaries its values its economic

systems and its international allegiances Contributors Judy Batt Dirk Berg Schlosser Sarah Birch Heather Grabbe Tim Haughton Krzysztof Jasiewicz Petr Kopeck Paul G Lewis Frances Millard Cas Mudde D Mario Nuti Mark Pittaway Ray Taras Stephen White Andrew Wilson Kataryna Wolczuk *Electoral Malpractice* Sarah Birch,2011-12-22 Electoral Malpractice shows how this phenomenon might be reduced by means of a variety of strategies designed to raise the cost of electoral manipulation by increasing the ability of civil society and international actors to monitor and denounce it **Party Politics in Russia and Ukraine** Bryon Moraski,2022-06-07 This book investigates the effects of similar electoral system changes on candidate selection election outcomes and party development in two post Soviet states Russia and Ukraine during a period when Russia's rulers were consolidating a dominant party electoral authoritarian regime and Ukraine appeared to be moving towards electoral democracy **European Politics** Tim Bale,2017-04-28 A fully revised fourth edition of a popular introduction to the comparative politics of Europe written by a highly respected authority on the subject This lively and thematically organised text provides an accessible guide to the institutions and the issues that matter in a continent where the boundaries between East and West and between domestic and European affairs are increasingly breaking down Covering a wide array of countries it is a concise yet comprehensive overview of one of the world's most important and fascinating regions Written in an approachable style and packed with up to date real world examples and information this is the ideal place for students to begin and to deepen their understanding of Europe's politics It can be adapted as a standalone text on modules on Comparative European Politics and will be of use as a key reading on undergraduate courses on Comparative Politics more broadly as well as European Union Politics New to this Edition Updated throughout to provide coverage of developments such as the Eurozone crisis the growth of left and right wing populism the rise of nationalism and Europe's on going immigration challenge Includes a short concluding chapter rounding up and considering the future of the book's core themes of Europeanization and multilevel governance Additional country profiles on Croatia and Greece to ensure representative treatment of the key countries in Europe today **The Politics of Electoral Reform** Alan Renwick,2010-02-04 Elections lie at the heart of democracy and this book seeks to understand how the rules governing those elections are chosen Drawing on both broad comparisons and detailed case studies it focuses upon the electoral rules that govern what sorts of preferences voters can express and how votes translate into seats in a legislature Through detailed examination of electoral reform politics in four countries France Italy Japan and New Zealand Alan Renwick shows how major electoral system changes in established democracies occur through two contrasting types of reform process Renwick rejects the simple view that electoral systems always straightforwardly reflect the interests of the politicians in power Politicians' motivations are complex politicians are sometimes unable to pursue reforms they want occasionally they are forced to accept reforms they oppose The Politics of Electoral Reform shows how voters and reform activists can have real power over electoral reform *Women's Access to Political Power in Post-Communist Europe* Richard E. Matland,Kathleen A.

Montgomery, 2003-05-01 This book considers women's access to formal positions of power in the newly formed democracies of post communist Europe. While acknowledging the relevance of recent history, this book takes an important step away from the communist legacy and explicitly argues for a framework based on causal variables identified in the existing literatures from industrialized democracies on women and politics and legislative recruitment. After a brief introduction, the second chapter sets forth a general theoretical framework which posits that the level of female legislative representation in a given country is a function of the relative supply of and demand for female candidates. After a chapter considering a broad overview of public opinion on women and politics in Eastern Europe, thirteen country chapters spanning the spectrum of Eastern European democracies address and test hypotheses about the key variables affecting the supply and demand sides of the equation in individual countries. Relevant aspects of the communist cultural and developmental legacy are addressed, but authors give particular attention to political factors such as electoral rules and the characteristics of the emerging party systems that vary within the Eastern European countries. The new democracies of Eastern Europe provide a novel context in which to test and extend our theories about the consequences of political institutions for the quality of democracy. Since institutional arrangements are more malleable than developmental or cultural characteristics, those variables also offer the greatest promise to scholars and practitioners wondering what can be done to improve women's access to formal arenas of political power. How can we build democracies that are stable, lasting, and representative? A careful analysis of the post communist context can help us to address issues concerning institutional design and development that has relevance well beyond the Eastern European context.

Faces on the Ballot Alan Renwick, Jean-Benoît Pilet, 2016 One of the key shifts in contemporary politics is the trend towards greater personalization. Collective actors such as political parties are losing relevance. Citizens are slowly dealigning from these actors, and individual politicians are therefore growing in importance in elections, in government, within parties, and in media reporting of politics. A crucial question concerns how this new pattern could be restructuring politics over the long run, notably whether the personalization of politics is changing the institutional architecture of contemporary democracies. The authors show that the trend towards personalization is indeed changing core democratic institutions. Studying the evolution of electoral systems in thirty-one European democracies since 1945, they demonstrate that since the 1990s there has been a shift towards more personalized electoral systems. Electoral systems in most European countries now allow voters to express preferences for candidates, not just for political parties. And the weight of these voters' preferences in the allocation of seats has been increased in numerous countries. They examine the factors that appear to be driving this evolution, finding that the personalization of electoral systems is associated with the growing gap between citizens and politics. Politicians and legislators appear to perceive the personalization of electoral systems as a way to address the democratic malaise and to restore trust in politics by reducing the role of political parties in elections. The book also shows, however, that whether these reforms have had any success in achieving their aims is far less clear.
