Matson, Berrien Moore III, Frank Oldfield, Katherine Richardson, Hans-Joachim Schellnhuber, Billie L. Turner, Robert J. Wasson, 2005-12-29 The interactions between environmental change and human societies have a long complex history spanning many millennia but these have changed fundamentally in the last century Human activities are now so pervasive and profound that they are altering the Earth in ways which threaten the very life support system upon which humans depend This book describes what is known about the Earth System and the impact of changes caused by humans It considers the consequences of these changes with respect to the stability of the Earth System and the well being of humankind as well as exploring future paths towards Earth System science in support of global sustainability Wild Earth , 2000 **Future Survey Annual** , 1994 Thriving on Our

Changing Planet National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Space Studies Board, Committee on the Decadal Survey for Earth Science and Applications from Space, 2019-01-20

We live on a dynamic Earth shaped by both natural processes and the impacts of humans on their environment. It is in our collective interest to observe and understand our planet and to predict future behavior to the extent possible in order to effectively manage resources, successfully respond to threats from natural and human-induced environmental change, and capitalize on the opportunities social economic security and more that such knowledge can bring. By continuously monitoring and exploring Earth, developing a deep understanding of its evolving behavior and characterizing the processes that shape and reshape the environment in which we live, we not only advance knowledge and basic discovery about our planet but we further develop the foundation upon which benefits to society are built. Thriving on Our Changing Planet presents prioritized science applications and observations along with related strategic and programmatic guidance to support the U.S. civil space Earth observation program over the coming decade.
