Embryology Of Dolphins Staging And Ageing Of Embryos And Fetuses Of Some Cetaceans:

Embryology of Dolphins Oldrich Sterba, Milan Klima, Bernd Schildger, The rapid development of molecular biology and genetics has led to renewed interest in embryology comparative embryology and studies of the relations between ontogeny and phylogeny In fact genes have been identified which are involved in the formation of shapes and structures and it is becoming apparent that their primary morphological expressions are conspicuously similar in different species The primarily identical shapes do not become diversified until advanced individualization of embryos and it is here that it is possible to employ the knowledge of comparative embryology the branch of science engaged in the study of the development and differentiation of tridimensional structures in different animal groups However comparative embryology has been neglected during the past decades as its development has appeared to have been completed In our opinion the decreased interest in comparative embryology has been caused by the fact that often the time factor was not or could not be respected In fact in the case of embryos of wild animals even their ontogenetic age and sometimes the duration of intrauterine development are unknown

Thomas, Ronald A. Kastelein, 2013-11-11 This book evolved through the efforts of several organizations and the dedication of many individuals In 1987 we received a request to propose a workshop topic for the Fifth International Theriological Congress ITC to be held in August 1989 in Rome Italy After looking up the meaning of the word theriological in the dictionary and discovering that it pertains to mammalian behavior we decided a symposium on sensory abilities of whales and dolphins would be an interesting topic The ITC convenes only every five years and has the distinction of being very well attended by scientists from around the world We thought that hosting a workshop in conjunction with the ITC would attract a variety of international scientists that rarely have the opportunity to interact Fortunately for all involved our prediction was correct The first two days of the workshop 23-24 August 1989 were held in conjunction with ITC and the nearly 1 000 attending scientists were able to view our posters and listen to lectures The third day was limited to only about 65 invited scientists who were divided into topical working groups chaired by a rapporteur **Deutsche Nationalbibliographie und Bibliographie der im Ausland erschienenen deutschsprachigen Veröffentlichungen** , 2001
