Abstract

The project LE-SIMPLE is an innovative attempt of building harmonized syntactic-semantic lexicons for twelve European languages, aimed at use in different Human Language Technology applications. SIMPLE provides a general design model for the encoding of a large amount of semantic information, spanning from ontological typing, to argument structure and terminology. SIMPLE thus provides a general framework for resource development, where state-of-the-art results in lexical semantics are coupled with the needs of Language Engineering applications accessing semantic information.

1. Introduction

SIMPLE is a large project sponsored by EC DGXIII in the framework of the Language Engineering programme, and represents an innovative attempt to develop wide-coverage semantic lexicons for twelve languages (Catalan, Danish, Dutch, English, Finnish, French, German, Greek, Italian, Portuguese, Spanish, Swedish), with a harmonised common model that encodes structured semantic types and semantic (subcategorization) frames. Even though SIMPLE is a lexicon building project, it also addresses challenging research issues and provides a framework for testing and evaluating the maturity of the current state-of-the-art in the realm of lexical semantics grounded on, and connected to, a syntactic foundation.
