Edited For Television Matthew Robert Kerbel, 2019-04-15 This book discusses the words and pictures that constituted coverage of the 1992 presidential campaign on ABC and CNN It addresses the implications of the news product for the viewing audience and the impact of the forces that create television news on the political system

The Influence of Polls on Television News Coverage of Presidential Campaigns Vincent M. Fitzgerald, 2018-06-12 Since the election of Richard Nixon in 1968 to Donald Trump's victory in 2016 both presidential campaigns and television news have undergone significant changes perhaps most noticeably in the use of public opinion polls in campaign reporting by the national evening newscasts of ABC CBS and NBC *The Influence of Polls on Television News Coverage of Presidential Campaigns* explores how during the past 50 years the three networks have quadrupled their use of polls during general election campaigns while the amount of time spent covering the actual issues facing the nation has dwindled The increasing focus on polls over the years by television news has resulted in an overall diminished quality of journalism which is relying more and more on sensationalism and theatrics The competition between the candidates has become a central focus of reporting which has led to presidential campaigns being covered like sporting events Major party candidates are portrayed increasingly less like potential leaders of the free world and more like athletes who are winning or losing a ballgame The problem is not exit polls prematurely projecting a winner several hours before voting ends but pre election polls which do the same thing weeks before Election Day Recommended for scholars interested in communication political science history and sociology

Edited For Television Matthew Robert Kerbel, 1998 An examination of the role of network and cable news media in American presidential campaigns This second edition acknowledges the political changes that have taken place since the first edition namely the key policy battles of Clinton's first two years the mid term and 1996 elections

Missed Opportunity E. D. Dover, 2002-03-30 While the 2000 presidential election had a number of unique features including the decisive role of the Supreme Court it actually was quite similar to three earlier television age campaigns For the fourth time since 1960 an incumbent president retired and his party nominated the vice president as a potential successor The nomination of the vice president has become so commonplace that we now expect it Unfortunately we lack theoretical explanations of why vice presidents win nominations while often losing the general election Dover seeks to advance this needed theory Dover looks at the recurring features of television age elections with surrogate incumbents and applies them to a description of the leading events of Election 2000 The emphasis is on mediated incumbency a phenomenon that occurs when mass media particularly television exert enormous influence in defining the context and meaning of politics for most voters The first topics considered are the growth of the modern vice presidency and the nature of surrogate incumbent elections The outcome of such elections often turns on how effectively the vice president and his opponent overcome dilemmas unique to their strategic positions as incumbent or challenger Dover then describes the campaign from January 1999 through December 2000 from the perspective of television news media and shows how Gore failed to overcome his dilemma during a time marked by peace and prosperity The text is an important resource for scholars students and other researchers involved with American elections political communication and the American presidency The Theory and Practice of Political Communication Research Mary E. Stuckey, 1996-01-01 Focusing on theoretical and methodological insight this book brings together scholars from a variety of fields whose research is guided by diverse analytical approaches Instead of focusing on what divides scholars the authors explore areas of intellectual community building a more systematic and rigorous understanding of political communication By broadening and deepening understanding of the field this book

provides insight into political processes that would otherwise be lacking Image Bite Politics Maria Elizabeth Grabe,Erik Page Bucy,2009-03-02 Image Bite Politics is the first book to systematically assess the visual presentation of presidential candidates in network news coverage of elections and to connect these visual images with shifts in public opinion Presenting the results of a comprehensive visual analysis of general election news from 1992 2004 encompassing four presidential campaigns the authors highlight the remarkably potent influence of television images when it comes to evaluating leaders

Political Communication Richard M. Perloff,2013-10-18 In this political communication text Richard M Perloff examines the various ways in which messages are constructed and communicated from public officials and politicians through the mass media to the ultimate receivers the people With a focus on the history of political communication he provides an overview of the most significant issues in the study of politics and the media In addition to synthesizing facts and theories and highlighting the scholarly contributions made to the understanding of political communication effects Political Communication addresses such factors as the rhetorical accomplishments of American presidents the ongoing tangles between the press and the presidency and the historical roots of politics as it is practiced and studied today It also addresses major issues about the press and politics that continually resurface such as question of press bias and the use and manipulation of media by politicians to accomplish national goals As a comprehensive and engaging introduction to contemporary political communication this volume provides all readers with a historical perspective on American politics and press and offers a unique appreciation of the strengths and virtues of political communication in America *The Parties*

Respond Louis Sandy Maisel,2002-08-21 This classic text examines the issues surrounding party politics in the United States The fourth edition considers the demise of the Reform Party in 2000 and discusses campaign finance reform **The Making of the Presidential Candidates 2008** William G. Mayer,2008 Discusses the presidential election process with eight chapters that cover such topics as how television covers the nomination process the origins of the presidential selection process and nomination finance in the post Bipartisan Campaign Reform Act era **The Media and Neo-Populism**

Gianpietro Mazzoleni,Julianne Stewart,Bruce Horsfield,2003-02-28 Mazzoleni Stewart Horsfield and their contributors analyze the two way relationship of the mass media and the contemporary phenomenon of extreme right wing neo populist political parties which emerged in the closing years of the 20th century across the world The success of Jean Marie Le Pen leader of the neo populist Front National in the first French presidential ballot in April 2002 shows that these extremist parties have strong if varying electoral support Drawn into reporting on the policies and antigovernment critiques of the new parties the mass communication institutions especially those engaged in news production have been challenged by a variety of unconventional but effective political campaign strategies that caused many media professionals considerable challenge Taking an approach informed by mass communication theory this book analyzes eight case studies of the interaction of news media dynamics and neo populism in Austria Australia France Canada India Italy the United States and the Latin American

region against the background of widespread disenchantment with traditional parties and the complacency and cynicism of popularly elected governments Insights into media responses reveal how dependent on media coverage the neo populist parties were and how in many cases the media were initially unequal to the confronting ideologies of the new parties Although the news media exploited the new parties new parties exploited the news media as well in quite shrewd and original ways This is an important resource for scholars students and other researchers involved with political mass communications and right wing political organizations

Mapping the Cultural Space of Journalism Samuel P. Winch, 1997-04-30 Addressing the controversial issues of the blurring boundaries between news and entertainment and the movement toward sensationalism in broadcast journalism this study examines these distinctions how boundaries are constructed and by whom how they are enforced or broken and why Rather than reflecting essential attributes by which news can be distinguished from other kinds of communication boundary setting is viewed as a social construction determined and changed by journalists wishing to assert their jurisdiction and authority and the prestige of the profession Four instances of boundary work rhetoric are examined in depth 1 the development of roles and rules of television journalism during the early years of television 2 attempts at Congressional and FTC regulation broadcasting codes defining bona fide news 3 responses to a 1992 journalistic scandal over a Dateline NBC story on exploding GM pickup trucks and 4 reporting sex scandals during recent political campaigns such as the allegations of Gennifer Flowers of her involvement with Bill Clinton In these and other cases journalists developed strategies to minimize harm to the profession
