Education And Community:

Community Schools JoAnne Ferrara, Reuben Jacobson, 2019-05-24 Ferrara and Jacobson go inside community schools across the country to explore the different roles that make this collaborative education reform work This book provides practitioners policymakers family members youth and local leaders a greater understanding of the different roles that make up a community school and tools for action Built on years of practice research and continuous improvement community schools are an innovative effective and grassroots strategy for bringing schools and communities together in order to improve outcomes for students families and communities This education reform is growing as school site local and state leaders seek collaborative solutions to our schools most persistent challenges The contributors experts in the field represent a diverse group of people with longstanding commitments to the community school strategy From principals to family members from community partners to teachers this book illustrates how together we all have a part to play in the development of successful community schools

The Educative Community Roger Hiemstra, 1972 This book has been created to meet the basic needs of future teachers educational specialists parents and those citizens who desire to become better informed on current educational concepts and practices Eight chapters discuss the nature of the community the activation of the educative community the community school and community education the modern family s educational needs in light of the changing family structure community coordination and cooperation processes for community change community investments in education and higher education and the community

Creating Learning Communities Larry E. Decker, Mary Richardson Boo, 1995 Schools cannot succeed without collaboration with parents and the community Defining community education as active community involvement in the education of children this booklet describes aspects of community education Community education the booklet points out can take place at physical locations such as formal school buildings which lie dormant much of the year and recreation centers The booklet argues that community members must be involved in designing a community education program that meets a large variety of needs by providing diverse educational services by promoting interagency cooperation and public private partnerships and by providing community improvement and citizen involvement Possible components of a community education program are suggested

- 1 remedial and enrichment activities
- 2 noncredit enrichment classes for adults
- 3 sports craft and other recreation activities for adults and children
- 4 preschool and after school child care
- 5 programs serving senior citizens and other special populations
- 6 career education
- 7 volunteer programs
- 8 literacy programs
- 9 family education programs and
- 10 community newsletters

Sources of possible funding for community education are also listed including

- 1 school or city budgets
- 2 municipal or county agencies
- 3 fees paid by program participants
- 4 federal and state programs and
- 5 grants from

corporations and foundations Two important aspects of programs ongoing assessment and public relations are noted

Descriptions of various existing community education programs conclude the booklet JW *Community Education for Social Justice* Cameron White, 2014-01-01 What is community How important is community in the 21st century Where might the idea of community fit in education and schooling teaching and learning These are the questions and themes embedded in this book The general critique is that community is an add on in our schools and often is dismissed as a result of the individualistic and competitive nature of schooling today Our focus is to provide critical investigations as to the possibility of community and that we need community now more than ever The concept of community education brings many ideas and issues to mind Related themes include place based field based environmental service learning and outdoor education Each has its own more narrow focus with community education perhaps an umbrella term than encompasses them all Nevertheless the suggestion here is that instead of community education serving as an extension or add on to traditional approaches it should be the focus of all education What is often missing in teaching and learning are contexts and connections that make education meaningful Community education engages participants in problem and issues based approaches to the local community thereby facilitating that local to global link Instead of compartmentalized subjects integrated approaches use what students and the community know or understand to develop further questions solutions or even problems Community education offers efficacy in that it provides opportunities for collaboration in addressing local issues and problems It enables the community to become the classroom thus ensuring a more long term connection to active rather than passive endeavors as citizens

Community Educators Patricia Moore Harbour, 2012 *Community Educators A Resource for Educating and Developing Our Youth* asserts that the relationships between education community and democracy are inseparable and illustrates that education is broader than just schooling Harbour challenges current thinking about education and reveals how the public participates in the education and development of youth This book is a call for action and responsibility both individual and collective to transform education beyond simply reforming schools The author's professional educational experiences combined with stories from the field by and about youth and community educators exemplify the importance of citizen collaboration among the various sectors of the community including youth parents schools businesses and neighborhood residents The book includes a foreword by Kettering Foundation president David Mathews

The Power of Community-centered Education Michael L. Umphrey, 2007 We face an epidemic of disengagement in American high schools as our institutions fail to offer meaningful and relevant ways to connect curriculum with students emerging life stories These students do not see how schooling as it is presently constituted is important to their own developing identities One solution to this problem is to organize the curriculum around the concept of community and to link the study of abstract concepts and principles to their manifestations in the places that students know and care about local history shared traditions civic pride etc *The Power of Community Centered Education* provides psychological sociological historical and philosophical insights
