Permanent War Paul R. Carr, Brad J. Porfilio, 2012-05-31 What is the meaning of peace why should we study it and how should we achieve it Although there are an increasing number of manuscripts curricula and initiatives that grapple with some strand of peace education there is nonetheless a dearth of critical cross disciplinary international projects books that examine peace education in conjunction with war and conflict Within this volume the authors contend that war military conflict violence are not a nebulous far away mysterious venture rather they argue that we are all collectively involved in perpetrating and perpetuating militarization conflict violence inside and outside of our own social circles Therefore education about and against war can be as liberating as it is necessary If war equates killing can our schools avoid engaging in the examination of what war is all about If education is not about peace then is it about war Can a society have education that

willfully avoids considering peace as its central objective Can a democracy exist if pivotal notions of war and peace are not understood practiced advocated and ensconced in public debate These questions according to Carr and Porfilio and the contributors they have assembled merit a critical and extensive reflection This book seeks to provide a range of epistemological policy pedagogical curriculum and institutional analyses aimed at facilitating meaningful engagement toward a more robust and critical examination of the role that schools play and can play in framing war militarization and armed conflict and significantly the connection to peace **Peace Education from the Grassroots** Ian Harris,2013-09-01

Historians often ignore the day to day struggles of ordinary people to improve their lives They tend to focus on the accomplishments of illustrious leaders Peace Education from the Grassroots tells the stories of concerned citizens teachers and grassroots peace activists who have struggled to counteract high levels of violence by teaching about the sources for violence and strategies for peace The stories told here come from the grass roots meaning the educators are close to the forms of violence they are addressing This collection of essays tells how citizens at the grassroots level developed peace education initiatives in thirteen different nations Belgium Canada El Salvador Germany India Jamaica Japan Mexico the Philippines South Korea Spain Uganda and the United States A fourteenth article describes the efforts of the International Red Cross to implement a human rights curriculum to teachers on the ground in the Balkans Iran Senegal and the United States These chapters describe a variety of schools colleges peace movement organizations community based organizations and international nongovernmental organizations engaged in peace education **Encyclopedia of Peace Education**

Monisha Bajaj,2008-05-01 The rise of peace education both in scholarship and in practice has yielded numerous documents websites and publications with often divergent perspectives on what the field is does and means The Encyclopedia of Peace Education provides a comprehensive overview of the scholarly developments in the field to date so as to provide a common denominator for the various actors involved in advancing peace education internationally Thus this edited volume serves as an essential reference guide that traces the history and emergence of the field highlights foundational concepts contextualizes peace education practice across international and disciplinary borders and suggests new directions for peace educators From core conceptual perspectives to the moral and spiritual foundations of the field to the role of the United Nations the Encyclopedia grounds peace education in a solid theoretical and practical framework through the writings of the field's most renowned scholars This volume will target undergraduate and graduate students as well as scholars and practitioners working in international and non governmental organizations in the field of peace education *Peace Education*

B. Jeannie Lum,2018-04-19 In 1999 the UN instituted the Program of Action on a Culture of Peace leading to the Declaration of the International Decade for the Promotion of a Culture of Peace and Non Violence for the Children of the World 2001 2010 This represented a paradigm shift away from the prevailing conceptualization of peace as the absence of war to one of creating cultures of peace and indicated a significant opening for peace educators and the expansion of their

mission and field in peace research and scholarship This book seeks to address several questions about the emergence present state and future of the field of peace education and to ground the definition of the discipline in its origins origins deeply set in informal grassroots movements of concerned citizens faith based communities and professional organizations who work for peace as well as those working in formal institutions These origins are vital in imparting identity and in nurturing the current growing collective consciousness that combines the academic discipline and the worldwide peace movement a collective that can unify fuel and inspire dialogue among scholars researchers activists educators government leaders and the myriad of individuals committed to creating cultures of peace throughout the world This book was originally published as a special issue of the Journal of Peace Education Peace Education Nel Noddings,2011-11-14 There is a huge volume of work on war and its causes most of which treats its political and economic roots In Peace Education How We Come to Love and Hate War Nel Noddings explores the psychological factors that support war nationalism hatred delight in spectacles masculinity religious extremism and the search for existential meaning She argues that while schools can do little to reduce the economic and political causes they can do much to moderate the psychological factors that promote violence by helping students understand the forces that manipulate them **Three Decades of Peace Education around the World** Robin J. Burns,Robert Aspeslagh,2014-01-14 First Published in 1996 The current world order poses new challenges to the theory and practice of peace education Drawing on data gathered from around the world Burns and Aspeslagh focus on how peace is presented in formal and informal educational settings and what effects ideologies have in shaping that presentation The book views peace education in the context of education about other major social and political issues and in a variety of geopolitical settings exploring factors that affect the generation selection organization transmission and evaluation of knowledge for peace Following a review of major approaches to policy and praxis in peace education the editors draw on original research to offer interpretations based on pragmatic normative and conceptual approaches to the individual the state and the role of political literacy The use of a comparative educational framework that goes beyond curriculum studies and descriptive case studies presents a perspective that is innovative and timely The volume includes both bibliography and index

peace and human rights education in diverse global sites The book untangles the core concepts that define both fields unpacking their histories and conceptual foundations and presents models and key research findings to help consider their intersections convergences and divergences Including an annotated bibliography the book sets forth a comprehensive research agenda allowing emerging and seasoned scholars the opportunity to situate their research in conversation with the global fields of peace and human rights education Social Education for Peace C. P. Udayakumar,2013-02-01 Exploring the field of peace education the bulk of the book analyzes and critically evaluates contemporary schools and universities Providing some successful and not so successful alternative school and university projects and experiments the book proposes peace and development education as a life process and presents a whole array of non conventional tools and approaches The unique feature of the book is that instead of putting emphasis on teaching peace and development it insists on being and becoming what we teach It makes a great textbook for education courses and programs and a good handbook for peace educators and peace researchers around the world The authors of the book are two teachers who are not attached to any regular educational institution anywhere in the world and are qualified to say what they have said in the book The two authors have played significant instrumental roles in promoting peace studies **Education for Sustaining Peace through Historical Memory** Markus Schultze-Kraft,2022-02-12 Informed by the author's long standing work on violent conflict peace and education in countries of the Global South particularly Colombia this open access book presents a comprehensive narrative about the relationship between peace education historical memory and the sustaining peace agenda advocating for the adoption of a new perspective on education for sustaining peace through historical memory Education on and for peace in countries wrestling with or emerging from protracted violent conflict is up against major challenges and both conventional and critical approaches to peace education are limited to address these Incorporating a focus on historical memory without losing sight of its own pitfalls into peace education can support learners

and teachers to come to grips with achieving positive peace sustaining change at both the micro individual and macro social and institutional levels and to develop concepts and practices of effective and legitimate alternatives to violence and war. Conceived in these terms historical memory oriented peace education also stands to enhance the work in progress that is the UN led sustaining peace agenda including its Sustainable Development Goals. Educating for Peace Lokanath Mishra, 2013-05-20. We know that peace education helps individuals transform conflict in their own lives, understand and respect other cultures and ways of living and treasure the Earth. Teachers of peace education encourage their students to cooperate with each other, think critically, solve problems constructively, take part in responsible decision making, communicate clearly and share their feelings and commitment openly. These skills and values are essential for survival in an increasingly interdependent world where violence has become an instrument of policy. Peace education seeks to enable learners to envision a range of possibilities that could lead from a culture of war and violence to a culture of peace. One widely used method to encourage such envisioning is posing an inquiry into the characteristics of peace. Efforts are being made to educate students and teachers about non violence and human rights via peace education programs. This book lays a foundation for students, teachers and peace educators to explore the elements necessary to create a peaceful society. Educating for Peace will help to build a peaceful, just and sustainable world for our children. Educating for Peace consists of seventeen chapters. Chapter one deals with the promotion of education for a peaceful society, chapter two details how to emphasise the importance of peace to children, chapter three of this book sketches out peace education in a non formal way while chapter four deals with education for peace and non violence. The following chapter clearly defines the conceptualization of peace education. Chapter six defines what exactly a culture of peace entails while chapter seven deals with a research study on non violence. Chapters eight and nine address pressing concerns in peace education and creating a violence free school respectively. Chapters ten and eleven deal with the role of value education for world peace. Chapter twelve deals with pedagogical approaches and chapter thirteen defines human rights education. The remaining chapters deal with different aspects of peace education. This book is an attempt to identify and deliberate on topics that should be addressed if we are to fully establish peace education. This book is written mainly for researchers, peace educators and students. Schooling for Peaceful Development in Post-Conflict Societies Clive Harber, 2019-05-13. This book explores how and if formal education affects peacebuilding in post conflict societies. As schooling is often negatively implicated in violent conflict, the author highlights the widely expressed need to build back better and transform schooling by changing both its structures and processes and its curriculum. Drawing upon research from a wide range of post conflict developing societies including Cambodia, Colombia and Kenya, the author examines whether there is any empirical support for the idea that schooling can be transformed so it can contribute to more peaceful and democratic societies. In doing so, the author reveals how the myth of building back better is perpetuated by academics and international organisations and explains why formal

education in post conflict developing societies is so impervious to radical change This important volume will appeal to students and scholars of education in post conflict societies **Peace Education in Conflict and Post-Conflict Societies**
C. McGlynn, 2009-04-13 This collection of peace education efforts in conflict and post conflict societies brings together an international group of scholars to offer the very latest theoretical and pedagogical developments Rather than focus on ad hoc peace education efforts this book investigates the need for long term systemic approaches and innovative pedagogies
