Education Autonomy And Critical Thinking:

Education, Autonomy and Critical Thinking Christopher Winch, 2006 The concepts of autonomy and of critical thinking are of key importance in many contemporary accounts of the aims of education Education Autonomy and Critical Thinking analyzes their relationship to each other and to education explores their roles in morality and politics and examines the part critical thinking has to play in fulfilling the educational aim of preparing young people for autonomy Assessing the significance of the concern with critical rationality as a key intellectual component for a worthwhile life involving autonomy this book also examines important views about what critical thinking is and how it can be cultivated Drawing from discussions on epistemology and the philosophy of language which concern the nature of rationality Christopher Winch produces a powerful critique of concepts central to contemporary philosophy of education autonomy and critical thinking

Leaders in Philosophy of Education , 2008-01-01 Since the 1960s we have witnessed the development of philosophy of education as a vital intellectual field Beginning with the work of Israel Scheffler at Harvard and spreading rapidly to the United Kingdom under the influence of R S Peters and Paul Hirst at the London Institute of Education analytical philosophers of education worked toward a new understanding of such central educational concepts as teaching learning explanation curriculum aims and objectives freedom and authority equality and liberal education They also examined theoretical issues in educational research and critiqued reigning ideas in educational psychology By the 1970s interest in the analysis of educational concepts and research methods had waned A new generation of philosophers of education turned to new issues including intellectual and practical virtues individual well being the education of girls and women the ethics of care creative thinking and imagination multicultural education globalization and many others In this book 24 leading philosophers of education since 1970 who remain influential today present the fascinating stories of their lives and important new contributions to the field They trace their early experiences initial encounters with philosophy and philosophy of education creative directions in their work mature ideas and perceptions of future directions for the field Each chapter contains a list of works chosen by the authors as their personal favorites *Education's Epistemology* Harvey Siegel, 2017 Education's Epistemology extends and defends Siegel's reasons conception of critical thinking developing it in both philosophical and educational directions Of particular note is its emphasis on epistemic quality and epistemic rationality and its concerted defense of universal educational and philosophical ideals in the face of multicultural postmodern and other challenges

Self-directed learning research and its impact on educational practice Elsa Mentz, Roxanne Bailey, 2021-05-17 This scholarly book is the third volume in an NWU book series on self directed learning and is devoted to self directed learning research and its impact on educational practice The importance of self directed learning for learners in the 21st century to equip themselves with the necessary skills to take responsibility for their own learning for life cannot be over emphasised The target audience does not only consist of scholars in the field of self directed learning in Higher Education and the

Schooling sector but includes all scholars in the field of teaching and learning in all education and training sectors The book contributes to the discourse on creating dispositions towards self directed learning among all learners and adds to the latest body of scholarship in terms of self directed learning Although from different perspectives all chapters in the book are closely linked together around self directed learning as a central theme following on the work done in Volume 1 of this series Self Directed Learning for the 21st Century Implications for Higher Education to form a rich knowledge bank of work on self directed learning *Competency-based Language Teaching in Higher Education* María Luisa Pérez Cañado, 2012-11-28

Spanning the divide between the theory and praxis of competency based teaching in tertiary language education this volume contains invaluable practical guidance for the post secondary sector on how to approach teach and assess competencies in Bologna adapted systems of study It presents the latest results of prominent European research projects programs of pedagogical innovation and thematically linked academic networks Responding to a profound need for a volume addressing the practical aspects of the newly designed language degrees now being rolled out across Europe this essential contribution pools the insights of a prestigious set of scholars practitioners and policy makers from diverse parts of Europe and the US It will inform crucial decisions about instituting and evaluating competencies in a new generation of language studies programmes

Philosophy and the Metaphysical Achievements of Education Ryan McInerney, 2021-06-17 Tracing the deep connections between philosophy and education Ryan McInerney argues that we must use philosophy to reflect on the significance of educational practice to all human endeavour He uses a broad approach which takes in the relationships governing philosophy education and language to reveal education s fundamental achievements and metaphysical significance The realization of educational ideals and policies are read alongside growing skepticism regarding the theoretical and practical significance of philosophical thinking and the emphasis on resource efficiency and measurable outcomes which characterise schooling today It is from this context that McInerney defends the value inherent to the philosophy of education Drawing upon contemporary continental and analytic thinkers including Nietzsche Gadamer and Wittgenstein McInerney charts the role of education in shaping the child s metaphysical transformation through language acquisition Connecting early years and primary school education McInerney pinpoints rationality as the crucial factor which produces critical thinking beings He presents the pursuit of philosophically minded education as a rational pursuit which enables us to philosophise and educate others in turn dispensing with the epistemological and conceptual foundationalisms of the past

Brain, Decision Making and Mental Health Nima Rezaei, 2023-01-01 Brain Decision Making and Mental Health acknowledges that thinking is not a constant phenomenon but varies considerably across cultures Critical thinking is particularly important in bridging thinking divisions and its applicability across sciences particularly medical sciences We see critical thinking as educable and the arts as means to achieve this purpose We address the multidimensional relationship between thinking and health and related mechanisms Thinking mainly affects emotion regulation and executive function in

other words both mental and physical health are related as a function of thoughts Considering the thinking feeling emotion regulation executive function pathway it would be reasonable to propose thinking capacities based interventions to impact emotion regulation and executive function such as mindfulness and psychotherapy We review decision making taking place in integrated and social contexts and discuss the decision making styles decision outcomes relation Finally artificial thinking and intelligence prepare us for decision making outside the human mind Education and Free Will Johan

Dahlbeck,2018-10-09 Education and Free Will critically assesses and makes use of Spinoza s insights on human freedom to construe an account of education that is compatible with causal determinism without sacrificing the educational goal of increasing students autonomy and self determination Offering a thorough investigation into the philosophical position of causal determinism Dahlbeck discusses Spinoza s view of self determination and presents his own suggestions for an education for autonomy from a causal determinist point of view The book begins by outlining the free will problem in education before expanding on a philosophical understanding of autonomy and how it is seen as an educational ideal It considers Spinoza s determinism and discusses his denial of moral responsibility Later chapters consider the relationship between causal determinism and autonomy the educational implications of understanding free will and how free will can be utilised as a valuable fiction in education This book will be of great interest to academics and postgraduate students in the field of education especially those with an interest in moral education and philosophy of education It will also be of interest to those in the fields of philosophy and psychology and specifically those focusing on the free will problem on Spinoza studies and on the relation between moral psychology and external influence Artificial General and Super Intelligence in Education KHRITISH SWARGIARY,2024-11-01 This book Artificial General and Super Intelligence in Education Theoretical Foundations Practical Applications and Future Implications is an endeavor to explore the possibilities opportunities and challenges that AGI and ASI may bring to the educational sector It delves into the intricate details of what AGI and ASI entail highlighting how these advanced forms of intelligence might one day emulate or surpass human intelligence By considering both the technological frameworks and the educational implications of AGI and ASI this book aims to provide a holistic examination of how these technologies could fundamentally alter the roles of educators the experiences of learners and the structure of educational institutions Educational Change in International Early Childhood Contexts Linda R. Kroll,Daniel

R.
