Continuités et ruptures dans l'apprentissage Jim Plumet, Céline Mousset, Pierre

Smets, Philippe Soutmans, 2019-04-02 L'apprentissage dans l'enseignement obligatoire n'est pas un long fleuve tranquille Sous l'apparente continuité du curriculum se cachent des ruptures au niveau des contenus disciplinaires C'est le constat que des enseignants formateurs dans différentes disciplines français mathématiques sciences langues modernes histoire et éducation physique et différents niveaux de formation du primaire l'université ont pu faire lorsqu'ils se sont réunis lors d'une journée d'études du Centre de recherche interdisciplinaire sur les pratiques enseignantes et les disciplines scolaires L'objet de la réflexion était d'étudier la manière selon laquelle un concept particulier ou une compétence par exemple le concept de l'égalité en mathématiques ou la compétence de lecture en français pouvait voyager et être enseigné tout au long de la scolarité Les analyses effectuées dans les diverses disciplines révèlent que la progression curriculaire que certains imaginaient continue présente régulièrement des tensions voire des ruptures L'apprentissage longitudinal d'un concept ou d'une compétence s'avère souvent lacunaire et dès lors difficile pour les élèves Au départ de ce constat les équipes de formateurs impliquées dans ce projet proposent des pistes d'action très concrètes qui invitent leurs étudiants futurs enseignants travailler de manière davantage conjointe et se forger une image plus construite du savoir enseigner
