Bauhaus with a split between design and production teaching As the result of current teaching models African American architects tend to work on the production or technical side of building rather than in the design studio It is essential to understand the centrality of culture gender space and knowledge in design studios Space Unveiled is a significant contribution to the study of architecture education and the extent to which it has been sensitive to an inclusive cultural perspective The research shows that this has not been the case in American education because part of the culture remains hidden

*Place of Science in a World of Values and Facts* Loucas G. Christophorou, 2005-12-27 This is an engrossing book It is also an unusual book it is written by a scientist who is quite willing to talk about the softer side of life about things such as love and respect and responsibility and to try and position them in the context of his science He is also willing to talk about religion the manner in which it relates to science and science to it and to attempt reconciliation of both He sets himself a tough task to tread the narrow path between the maudlin and the severely sober In this he is eminently successful He is successful not because he aims at any grand synthesis but because he has chosen the more modest path of simply laying out the cards on the table This work is also unusual for another reason The majority of books that attempt to explain science to a lay public that try to describe its workings its raison d'être its hidden contents its societal impact its implications for our future etc are written by theorists This is hardly surprising The theoretician after all is expected to think deeply to be the great unifier to be concerned with meaning Very few books about science are written by scientists ones who spend their time in a working experimental laboratory This is such a book And because it is it is also a very different book

*Web-Teaching* David W. Brooks, Diane E. Nolan, Susan M. China will be of real interest to geographical and environmental educationists professional educators and teachers elsewhere Not only will it generate interest and create greater awareness but also it is hoped that these experiences will provide a platform for scholarly exchange and contribute insights on education policy and curriculum changes across Asian Pacific communities in an increasingly globalised world
