Marta Verginella,2023-12-15 Women Nationalism and Social Networks in the Habsburg Monarchy 1848 1918 focuses on the lives of women in Southeastern Europe during the nineteenth and twentieth centuries exploring the intersection of gender and nationalism By looking at a wide range of sources and employing rich historiography this collection investigates the

currents of women's emancipatory efforts in a climate of conflicting assumptions relating to nationhood and nationalization. This book sheds light on a time when both women and nations were working to assert themselves and how women promoted the national cause in an attempt to assume stronger roles in the public sphere. The volume studies areas that were nationally mixed and linguistically plural, thus pointing to the dynamic role of peripheries and pluralism affecting women's approaches to and experience of nationalization. These essays speak to women's agency as individuals and members of the social networks and their roles in cultural, ethnic, and political movements in pluralistic societies of the late nineteenth and early twentieth centuries, thereby arguing that they enacted borders and were not simply acted on by them while also elucidating the ways they transgress the borders.

**Ideas of Education** Christopher Brooke, Elizabeth Frazer, 2013-07-18. There has always been a strong relationship between education and philosophy, especially political philosophy. Renewed concern about the importance and efficacy of political education has revived key questions about the connections between the power to govern and the power to educate. Although these themes are not always prominent in commentaries, political writings have often been very deeply concerned with both educational theory and practice. This invaluable book will introduce the reader to key concepts and disputes surrounding educational themes in the history of political thought. The book draws together a fascinating range of educational pioneers and thinkers from the canon of philosophers and philosophical schools from Plato and Aristotle down to Edward Carpenter and John Dewey, with attention along the way paid to both individual authors like Thomas Hobbes and Mary Wollstonecraft as well as to intellectual movements such as the Scottish Enlightenment and the Utopian Socialists. Each thinker or group is positioned in their historical context, and each chapter addresses the structure of the theory and argument, considering both contemporaneous and current controversies. A number of themes run throughout the volume: an analysis of pedagogy, socialisation, schooling, and university education with particular relation to public and private life and personal and political power; references to the historical and intellectual context; an overview of the current reception, understanding, and interpretation of the thinker in question; the educational legacy of the theories or theorists. This book will be of interest to students, researchers, and scholars of education as well as students and teachers of political theory, the history of political thought, and social and political philosophy.
