Spirituality and Education Jacqueline Watson, Marian de Souza, Ann Trousdale, 2013-12-04 In recent decades and around the world much attention has been given to the role of spirituality in the education of children and young people While educationalists share many common goals and values in nurturing the spiritual lives of children and young people national and regional cultures religions and politics have impacted on the approaches scholars and practitioners have adopted in their investigations and practices The different contexts across nations and regions mean that educators face quite distinct conditions in which to frame their approaches to spiritual education and research and the nature and impact of these

differences is not yet understood This book brings together thinkers from around the globe and sets them the task of explaining how their research on children s spirituality and education has been shaped by the historical cultural religious and political contexts of the geographic region in which they work The book presents contributions in three sections Europe and Israel Australasia and The Americas and concludes with a chapter highlighting what is common and what is contextually unique about global approaches to spirituality and education *Alfred North Whitehead on Learning and Education* Franz G. Evans, 2021-10-25 That process philosophy can be the foundation of the theory and practice of educating human beings is the main argument of this book The process philosophy of Alfred North Whitehead

1861-1947 is the particular thinking on which this book is based. Readers are shown that Whitehead's process philosophy provides a frame, a conceptual matrix that addresses their concerns about education and offers direction for their educative acts. Whitehead theorized that all living entities are connected in some way. Relatedness, connectedness, and holism are recurring themes in this exploration of Whitehead's implied philosophy of education. Whitehead never wrote a philosophy of education, but his writings over a period of nearly thirty years reveal a persistent interest and concern with education. His work ranging from *Introduction to Mathematics* (1911) to *Adventures of Ideas* (1938) is drawn on here to construct not Whitehead's philosophy of education but a Whiteheadian philosophy of education. Whitehead and Philosophy of Education brings to scholars and students of education an understanding of Whitehead as an important figure in philosophy, particularly philosophy of education; an acquaintance with process philosophy; a brief treatment of Whitehead's life and an account of events and experiences that influenced his philosophizing; and an exploration of the educationally salient concepts found in Whitehead's formal and informal philosophy, with special attention to Whitehead's ideas about creativity, process, rhythm, wisdom, and knowledge. Whitehead writes of phases of the rhythm of education: romance, precision, and generalization. The book is organized with attention to these three phases. Part One, Romance, introduces readers to Whitehead, the person and the change of context for educating from a mechanistic world view to an organismic one. Part Two, Precision, examines Whitehead's writings as they relate to process philosophy and to educating. Part Three, Generalization, is an application of the explorations of Parts One and Two, yielding a construction of a Whiteheadian philosophy of education and suggestions for educational practice.

The False Promises of Constructivist Theories of Learning C. A. Bowers, 2005. In *The False Promises of Constructivist Theories of Learning: A Global and Ecological Critique*, C. A. Bowers examines why constructivist-based educational reforms fail to take into account these current critical issues: the deepening ecological crisis, globalization, and undermining of the world's diverse cultural commons. Special attention is given to the ethnocentrism and Social Darwinism that created the foundations for the ideas of Dewey, Piaget, and Freire. Also considered is how the neo-liberal promoters of economic globalization share their taken-for-granted assumptions. Additionally, Bowers explains how teachers in different cultures can contribute to the revitalization of their cultural and environmental commons without engaging in the cultural imperialism that characterizes constructivist approaches to educational reform.

Teaching with the Wind Michael Dallaire, 2011-08-25. *Teaching with the Wind* tackles the question: Can education for a Canadian civic spirituality bridge the sometimes incommensurable worldviews of faith-based schools and secular public schools? An affirmative answer is offered based on two foundations. First, that a national soul can be identified and thus serve as the content of spiritual education in Canada's schools. Second, that a reconstructed approach to the contemplation-in-action method found in world religions and philosophy can provide an appropriate pedagogy for Canadian spiritual education. This book argues that education for civic spirituality is of paramount importance as Canada continues its transition from a Judeo-Christian and bicultural nation to a

multi faith and multicultural nation within a secular democracy It offers a direction that would enrich religious and secular education systems as well as Canada as a whole **Understanding Curriculum** William F. Pinar, 1995 Perhaps not since Ralph Tyler s 1949 Basic Principles of Curriculum and Instruction has a book communicated the field as completely as Understanding Curriculum From historical discourses to breaking developments in feminist poststructuralist and racial theory including chapters on political theory phenomenology aesthetics theology international developments and a lengthy chapter on institutional concerns the American curriculum field is here It will be an indispensable textbook for undergraduate and graduate courses alike
