Educational Theory As Political Theory:

Educational Theory as Political Theory Anne Michaels Edwards, 1993 **On the Politics of Educational Theory**

Tomasz Szkudlarek, 2016-11-03 *On the Politics of Educational Theory* considers the political significance of educational theory as a specific genre of public discourse. Rather than understanding educational theories solely as addressing issues of childrearing and instruction, this book aims to view educational theories in a broader socio-political context. It explores the role of educational theories in the construction of collective and political identities and analyses them as rhetorical strategies operating as political discourses. Defining the methodological framework through the perspectives of Michel Foucault and Ernesto Laclau, each chapter examines the ways in which theories of education contribute to the creation of social realities and identities. Such issues as the construction of visibility and invisibility of power, the tropes of temporality or the use of postulational language where theorists say what should be done in and by education are some of the threads that weave through particular theories from Rousseau to the discourse of education in the knowledge-based society, analysed as ontological rhetorics constitutive of political identities. This book suggests a direction for a more conscious way of dealing with the political in education. As such, it will appeal to researchers, academics and postgraduate students in the fields of educational research, philosophy of education, curriculum studies, social and political theory and theory of education. Towards a Political Theory of the University Morgan White, 2016-11-25 *Towards a Political Theory of the University* argues that state and market forces threaten to diminish the legitimacy, authority and fundamental purposes of higher education systems. The political role of higher education has been insufficiently addressed by academics in recent decades. By applying Habermas's theory of communicative action, this book seeks to reconnect educational and political theory and provide an analysis of the university which complements the recent focus on the intersections between political philosophy and legal theory. In this book, White argues that there is considerable overlap between crises in democracy and in universities. Yet while crises in democracy are often attributed to the inability of political institutions to adapt to the pace of social and cultural change, this diagnosis wilfully ignores the effects of privatisation on public institutions. Under present political conditions, the university is regarded in instrumental and economic terms which not only diminishes its functions of developing and sustaining culture but also removes its democratic capabilities. This book explores these issues in depth and presents some of the practical problems associated with turning an independent higher education system into a state-dominated and then subsequently marketised system. This book bridges political and educational theory in an original and comprehensive way.
