Educational Change A Humanistic Approach:

Educational Change Ray Eiben, Alan P. Milliren, 1976 *Educational Change*, 1976 *International Handbook of Interpretation in Educational Research* Paul Smeyers, David Bridges, Nicholas C. Burbules, Morwenna Griffiths, 2015-01-06

This handbook focuses on the often neglected dimension of interpretation in educational research. It argues that all educational research is in some sense interpretive and that understanding this issue belies some usual dualisms of thought and practice such as the sharp dichotomy between qualitative and quantitative research. Interpretation extends from the very framing of the research task through the sources which constitute the data, the process of their recording, representation and analysis to the way in which the research is finally or provisionally presented. The thesis of the handbook is that interpretation cuts across the fields both philosophically, organizationally and methodologically. By covering a comprehensive range of research approaches and methodologies, the handbook gives early career researchers what they need to know in order to decide what particular methods can offer for various educational research contexts. An extensive overview includes concrete examples of different kinds of research, not limited for example to teaching and learning examples as present in the Anglo Saxon tradition but including as well what in the German Continental tradition is labelled *pädagogisch*, examples from child rearing and other contexts of non formal education with full description and explanation of why these were chosen in particular circumstances and reflection on the wisdom or otherwise of the choice combined in each case with consideration of the role of interpretation in the process. The handbook includes examples of a large number of methods traditionally classified as qualitative, interpretive and quantitative used across the area of the study of education. Examples are drawn from across the globe thus exemplifying the different opportunities and constraints that educational research has to confront in different societies.

Education for Social Change Douglas Bourn, 2021-12-16. This book introduces students to education as a vehicle for social change. Douglas Bourn begins by providing historical context of how education has been linked to social change around the world and moves on in the second section of the book to discuss potential theoretical and conceptual frameworks for thinking about education for social change. The third section covers how social change has been explored and promoted within different areas of learning including schooling, youth work and higher education. The fourth section looks at the opportunities and challenges for promoting education for social change and reviews current international initiatives including those of global citizenship and climate change. Key theorists are introduced throughout the book including bell hooks, Dewey, Giroux, Gramsci and Freire. Each chapter begins with an opening question and ends with bulleted concluding points, questions for discussion and a further reading list. The book includes a foreword written by Tania Ramalho, State University of New York USA.

Policy Transfer and Educational Change David

Scott, Mayumi Terano, Roger Slee, Chris Husbands, Raphael Wilkins, 2016-05-15 Improving education through policy learning is an important notion for countries in need of educational reform. However, identifying a successful set of practices and transferring them from one national setting to another is a complex exercise. Drawing from their extensive experience, the authors explore a single case study of policy transfer in India, demonstrating how and under what conditions educational reforms can be put into practice successfully and sustainably. Coverage includes Policy Learning, Inclusive Practices, School Autonomy, and School Leadership in India and its system of education. This book offers a unique international perspective on educational reform and is a useful resource for teachers, policy makers, and postgraduate level students. Educational Reform

New Directions in Educational Leadership Theory Scott Eacott, Colin Evers, 2018-02-02 Educational leadership has a rich history of epistemological debate From the Theory Movement of the 1950 1960s through to Greenfield s critique of logical empiricism in the 1970s the emergence of Bates and Foster s Critical Theory of educational administration in the 1980s and Evers and Lakomski s naturalistic coherentism from 1990 to the present time debates about ways of knowing doing and being in the social world have been central to advancing scholarship However since the publication of Evers and Lakomski s work questions of the epistemological preliminaries of research have become somewhat marginalised This is not to suggest that such discussions are not taking place but rather that they have been sporadic and piecemeal In *New Directions in Educational Leadership Theory* the contributors sketch possible alternatives for advancing scholarship in educational leadership The coherence of this volume comes not from the adoption of a single theoretical lens but rather from its engagement with epistemology ontology and methodology The choice of the plural alternatives is deliberate and its use is to evoke the message that there is more than one way to advance knowledge The approaches adopted across this collection offer fruitful directions for the field and hopefully will stimulate substantive dialogue and debate in the interest of advancing knowledge This book was originally published as a special issue of *Educational Philosophy and Theory*
