Educational Leadership And School Culture Series On Contemporary Educational Issues:

Educational Leadership and School Culture Marshall Sashkin, Herbert J. Walberg, 1993 Leadership has long been a topic of discussion among school administrators Stronger and more effective leadership is needed both in the school building and at the school district level Researchers have only recently begun to explore school culture leadership and the interaction of the two This book covers three topics school culture leadership and leadership and culture The 10 chapters and their authors are 1 The Culture of Schools Terrence E Deal 2 Bureaucratic and Cultural Linkages Implications for the Principal William A Firestone and Bruce L Wilson 3 Transforming School Culture Martin Maehr and Rachel Buck 4 New Sources of Leadership Authority Thomas J Sergiovanni 5 The Visionary Principal School Leadership for the Next Century Marshall Sashkin 6 Strategies for Building School Cultures Principals as Symbolic Leaders Terrence E Deal and Kent D Peterson 7 Principals and Their School Cultures Understandings from Quantitative and Qualitative Research Marshall Sashkin and Molly Goltman Sashkin 8 Creating a Mastery Oriented Schoolwide Culture A Team Leadership Perspective Russell Ames and Carole Ames 9 Visionary Superintendents and Their Districts Judith Endeman and 10 Leadership and Culture A Quantitative Perspective on School Leadership and Instructional Climate Samuel E Krug References are included at the end of each chapter JPT

Resources in Education, 2001 *Second International Handbook of Educational Leadership and Administration* Kenneth A. Leithwood, P. Hallinger, 2012-12-06 The first International Handbook of Educational Leadership and Administration Leithwood et al was published in 1996 and quickly became something of a best seller for reference works within education Such success we suggest was at least partly due to the unprecedented global waves of concern for improving schools launched in the mid 1980 s combined with a widespread belief in leadership as the single most powerful contribution to such improvement The roots of this belief can be found in evidence produced by the early effective schools research although there is a romance with leadership as an explanation for success in many non school enterprises as well During the two year period during which this current handbook was being written activity in the realms of school leadership school improvement and leadership development gained further momentum The English government created its new National College of School Leadership and several Asian nations announced new initiatives in leadership selection preparation and development

Handbook of Positive Psychology in Schools Michael J. Furlong, Richard Gilman, E. Scott Huebner, 2009-03-04 National surveys consistently reveal that an inordinate number of students report high levels of boredom anger and stress in school which often leads to their disengagement from critical learning and social development If the ultimate goal of schools is to educate young people to become responsible and critically thinking citizens who can succeed in life understanding factors that stimulate them to become active agents in their own learning is critical A new field labeled positive psychology is one lens that can be used to investigate factors that facilitate a student's sense of agency and active school engagement The purposes of this groundbreaking Handbook are to 1 describe ways that positive emotions

traits and institutions promote school achievement and healthy social emotional development 2 describe how specific positive psychological constructs relate to students and schools and support the delivery of school based services and 3 describe the application of positive psychology to educational policy making By doing so the book provides a long needed centerpiece around which the field can continue to grow in an organized and interdisciplinary manner Key features include Comprehensive this book is the first to provide a comprehensive review of what is known about positive psychological constructs and the school experiences of children and youth Topical coverage ranges from conceptual foundations to assessment and intervention issues to service delivery models Intrapersonal factors e g hope life satisfaction and interpersonal factors e g positive peer and family relationships are examined as is classroom and school level influences e g student teacher and school community relations Interdisciplinary Focus this volume brings together the divergent perspectives methods and findings of a broad interdisciplinary community of scholars whose work often fails to reach those working in contiguous fields Chapter Structure to insure continuity flow and readability chapters are organized as follows overview research summary relationship to student development examples of real world applications and a summarizing table showing implications for future research and practice Methodologies chapters feature longitudinal studies person centered approaches experimental and quasi experimental designs and mixed methods

Values for Educational Leadership Graham Haydon, 2007-06-04 If you are intending to embark upon or support others taking part in any of the programmes of the National College for School Leadership I would definitely keep this book close by Cliff Jones CPD Update What are values Where do our values come from How do our values make a difference to education For educational leaders to achieve distinction in their practice it is vital to establish their own clear sense of values rather than reacting to the implicit values of others This engaging book guides readers in thinking for themselves about the values they bring to their task and the values they intend to promote Crucially the book promotes critical thought and constructive analysis about the underlying values involved with aims and moral purpose in education individual qualities in educational leadership vision in education school ethos and culture the school as an educational community By inviting reflection using valuable case studies and work through activities as well as referring to a wide range of academic literature this book will be an important resource for those working towards professional qualifications such as NPQH and invaluable for anyone aspiring to excellence in educational leadership Graham Haydon is Senior Lecturer in Philosophy of Education at the Institute of Education University of London where he teaches on Masters courses in Values in Education and Applied Educational Leadership and Management
