## **Educating The Higher Self Evoking Altruism Caring And Purpose In Our Schools:**

**Resources in Education** ,1992      **Philanthropists in Higher Education** Gregory Cascione,2004-06-01 The main purpose of this book is to explore and understand the motivation behind major donations to higher education and what the role of religion is in these motivations Features interviews with major donors      *Professional Ethics Education: Studies in Compassionate Empathy* Bruce Maxwell,2008-04-01 1 1 Practical Ethics Education at an Impasse Why is some practical ethics training a requirement of nearly all programmes in higher education The short answer is that it is thought to be conducive to ethical decision making and ethical behaviour In recent years the received idea that competency in moral reasoning implies moral responsibility on the ground has been the subject of critical attention Today researchers in moral education widely regard moral reasoning as but one among at least four dimensions of moral development alongside moral motivation moral character and moral sensitivity Rest 1986 Reflecting these changes educationalists in the diverse fields of medicine education business and applied ethics can now be found openly questioning how to take practical ethics education beyond the development of skills in moral reasoning Frequently topping the list of suggested improvements is to provide support for empathic capacities of response This work gives this proposal the systematic attention that it deserves Contemporary applied ethics and by extension practical and professional ethics education can be considered an offshoot of the broad philosophical doctrine of moral realism Moral realism takes many forms but in broad outline it is an established meta ethical position that emerged as a seemingly attractive alternative to another family of established philosophical positions that sometimes goes under the name of expressivism      **Resources in Education** ,1992      Handbook of the Sociology of Medical Education Caragh Brosnan,Bryan S. Turner,2009-09-10 The Handbook of the Sociology of Medical Education provides a contemporary introduction to this classic area of sociology by examining the social origin and implications of the epistemological organisational and demographic challenges facing medical education at the beginning of the twenty first century Leading sociologists explore topics such as gender ethnicity disability and evidence based medicine in the context of current international debates over medical curricula      Current Index to Journals in Education ,1998-04      **Women in Higher Education, 1850-1970** E. Lisa Panayotidis,Paul Stortz,2017-09-19 This edited collection illustrates the way in which women's experiences of academe could be both contextually diverse but historically and culturally similar It looks at both the micro individual women and universities and macro level comparative analyses among regions and countries within regional national trans national and international contexts The contributors integrally advance knowledge about the university in history by exploring the intersections of the lived experiences of women students and professors practices of co education and intellectual and academic cultures They also raise important questions about the complementary and multidirectional flow and exchange of academic knowledge and information among gender groups across programmes disciplines and universities Historical inquiry and interpretation serve as efficacious ways with which to understand

contemporary events and discourses in higher education and more broadly in community and society This book will provide important historical contexts for current debates about the numerical dominance and significance of women in higher education and the tensions embedded in the gendering of specific academic programs and disciplines and university policies missions and mandates
