and English Education in Taiwan I-Chung Ke, 2021-11-29 Ke's book examines and reflects on English education in Taiwan from a global English perspective starting with a discussion on globalization and global Englishes. English education in Taiwan has gone through various major transformations since the intensification of globalization after the 1990s. On one hand, children start to learn English ever earlier while on the other hand the curriculum and materials in the vocational schools and at the tertiary level become diversified to meet various specific needs of English use. Internationalization of education has brought increasing numbers of international students and the roles of English in Taiwan are changing constantly with the dynamic environment from a foreign language to a lingua franca, medium of instruction and an international language. In his book the author documents the historical development of education and the roles of English in Taiwan before reviewing curriculum reforms and changes in the past half century. He then presents teachers' and students' perceptions on global Englishes. He proposes global Englishes pedagogies and his views on what changes can be made to textbooks, learning materials, entrance exams, translation and the linguistic environment. Practical suggestions to English education in Taiwan in the globalizing context serve as a tentative conclusion for the book. Offering insights into English education and its relationship with globalization, Ke's book will be useful to researchers and students in the fields of global Englishes and English education as well as offering practical pedagogical suggestions for English educators around the world. **Taking Teaching Seriously** Christopher Bjork, D. Kay Johnston, Heidi A. Ross, 2015-12-03 Taking Teaching Seriously expands and enriches discussions about teacher preparation in the United States. Its authors describe the unique contexts for teacher preparation offered by liberal arts institutions and analyze the effects of these programs on their graduates and on K12 schools. They emphasize that the goals and conditions for teacher preparation differ from larger public institutions in several key respects including supervisor-student relationships, philosophical foundations and approaches to clinical fieldwork. Taken together, the essays provide compelling evidence that educational studies programs in liberal arts colleges and universities constitute a vital component of the teacher education system in the United States. **The World is My Classroom** Joanne Benham Rennick, Michel Desjardins, 2013-12-06 International education and learn abroad programs have received heightened interest in the knowledge economy and universities are keen to create successful programs for students. The World Is My Classroom presents diverse perspectives on these experiential learning programs and ways of globalizing Canadian classrooms.
