Ethics and the Foundations of Education Patrick Slattery, Dana Rapp, 2003 *Teaching Convictions Critical Ethical Issues and Education* explores ethical issues in schools and society from the

vantage point of critical theory democratic community aesthetics ecology hermeneutics and constructive postmodernism This text discusses social constructions of reality and the contribution of postmodern theories to justice compassion and ecological sustainability in the challenging and difficult context of today's global society The authors present life experiences and personal convictions in a narrative autobiographical style without positioning themselves as passive observers of education or ethics nor as dispassionate investigators of ethical systems Rather they actively promote vision and aesthetic sensibilities as they examine their understanding of schools and society using examples from their life experiences By referring to the arts ecology identity politics theology race and gender theories in their story of critical ethical issues and education the authors weave a narrative of their teaching convictions in relation to moral issues

Ethics Across the Curriculum—Pedagogical Perspectives Elaine E. Englehardt, Michael S. Pritchard, 2018-05-08 This book features articles by more than twenty experienced teachers of ethics who are committed to the idea that ethics can and should be taught virtually anywhere in the education curriculum They explore a variety of ways in which this might best be done Traditionally confined largely to programs in philosophy and religion the teaching of ethics has in recent decades spread across the curriculum education The contributors to this book discuss the rationale for supporting such efforts the variety of challenges these efforts face and the sorts of benefits faculty and students who participate in ethics across the curriculum endeavors can expect An overriding theme of this book is that the teaching of ethics should not be restricted to one or two courses in philosophy or religion programs but rather be addressed wherever relevant anywhere in the curriculum For example accredited engineering programs are expected to ensure that their students are introduced to the ethical dimensions of engineering This can involve consideration of ethical issues within particular areas of engineering e.g. civil mechanical electrical chemical as distinctive segments of certain courses e.g. those that focus on design problems or as a full semester course in ethics in engineering Similar approaches can be taken in nursing medicine law social work psychology accountancy management and so on That is some emphasis on ethics can be expected to be found in broad range of academic disciplines However many ethical issues require careful attention from the perspectives of several disciplines at once and in ways that require their joining hands Recognizing that adequately addressing many ethical issues may require the inclusion of perspectives from a variety of disciplines makes apparent the need for effective communication and reflection across disciplines not simply within them This in turn suggests that faculty and their students can benefit from special programs that are designed to include participants from a variety of disciplines Such programs will be a central feature of this book Although some differences might arise in how such issues might best be discussed across different parts of the curriculum these discussions might be joined in ways that help students faculty administrators and the wider public better appreciate their shared ethical ground

Justice, Morality and Education Les Brown, 1985-10-28 *Ethical Principles Underlying Education* John Dewey, 1897 *Justice and Caring* Michael S. Katz, Nel Noddings, Kenneth A. Strike, 1999-04-09 This thought

provoking volume confronts the expected tension between care and justice as moral orientations. These original essays by renowned educators reveal how these two moral orientations can work together to produce wiser and more practical policies and practices. The authors explore problems at every level of education and tackle tough questions in theory, practice, and policy making. Using real life examples, they illustrate the great value of theoretical collaboration instead of competing with each other; justice and care should complement each other in both moral theory and practice.

Ethics in Professional Education, Christopher Martin, Claudia W. Ruitenberg, 2018-03-20. Recent years have seen a growing emphasis on ethics education in different professions such as medicine and teaching. However, the implications of this emphasis for professional education programs have been underdeveloped. In this volume, philosophers of education and ethics educators engaged in a variety of professional contexts in Canada, the UK, Norway, Malta, and Sweden assess the state of ethics education and the role of any of philosophical approaches to ethics for those professional contexts. This volume speaks to teacher, medical, and business education and the education of school psychologists. Each of these fields has its own context, aims, and expertise, generating distinctive ethical challenges. As such, ethics curricula cannot be uncritically transplanted from one professional context to another. Nonetheless, the arguments and analyses in this volume point to a shared concern about the role of moral respect, self-understanding, and virtue in the education of professionals. The chapters examine a wide range of topics, including empirical ethics, core concepts in professional ethics, moral agency, the ethics of ethics education, risk-taking, professional ethics as a practice with its own ethical requirements, and the tensions between the individual client/patient/student and the increasing generalization of professional systems. This book was originally published as a special issue of *Ethics in Education*.

Ethics Teaching in Higher Education Daniel Callahan, Sissela Bok, 1980-09-30 A concern for the ethical instruction and formation of students has always been a part of American higher education Yet that concern has by no means been uniform or free from controversy The centrality of moral philosophy in the undergraduate curriculum during the mid 19th Century gave way later during that era to the first signs of increasing specialization of the disciplines By the middle of the 20th Century instruction in ethics had by and large become confined almost exclusively to departments of philosophy and religion Efforts to introduce ethics teaching in the professional schools and elsewhere in the university often met with indifference or outright hostility The past decade has seen a remarkable resurgence of the interest in the teaching of ethics at both the undergraduate and the professional school levels Beginning in 1977 The Hastings Center with the support of the Rockefeller Brothers Fund and the Carnegie Corporation of New York undertook a systematic study of the state of the teaching of ethics in American higher education
